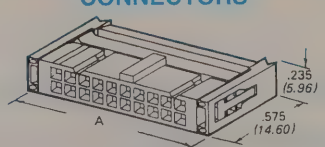
IDS-PK SERIES 0.100 x 0.100″ (2.54 x 2.54) GRID IDC SOCKET CONNECTORS



For quick connect/disconnect with 0.025″ (0.635) post headers. Compatible with MIL-C-83503. Center polarization tab meets DIN-41651 and BT-224. Phosphor bronze copper contacts plated with 10µ″ ROBEX® over nickel on contact area and 100µ″ tin on terminal area. Black, glass-filled polyester body and lid rated UL94V-0. Temperature range: –55°C to +105°C. UL recognized, CSA certified. *Order strain reliefs separately, contact your local Newark sales office.*

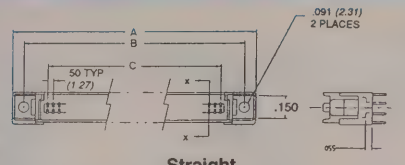
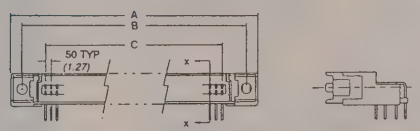
RN PAK-50® P50E SERIES BOARD MOUNT 50 MIL IDC PLUGS



Straight



Right Angle

Accepts 28 AWG flat cable. Mates to **P25E series** IDC sockets, *ordered separately on this page.* Accommodates backward and forward compatibility with standard 0.100″ (2.54) and 0.050″ (1.27) centerline connectors used on one cable. Offers 3-dimensional mating: vertical, horizontal and parallel. Latching eject mechanism facilitates mating/unmating. Available in straight or right-angle termination styles. Redundant ribbon contact design provides lower insertion/withdrawal forces, lower contact resistance, high normal force and high wear resistance. Contacts are recessed and fully protected on three sides, minimizing pin deformation. Phosphor bronze contacts plated gold over nickel on contact area, tin over nickel on terminal area. Contact resistance: 30MΩ. Current rating: 0.5A. Black, glass-filled nylon body, rated UL94V-O. Temperature range: –55°C to +105°C.

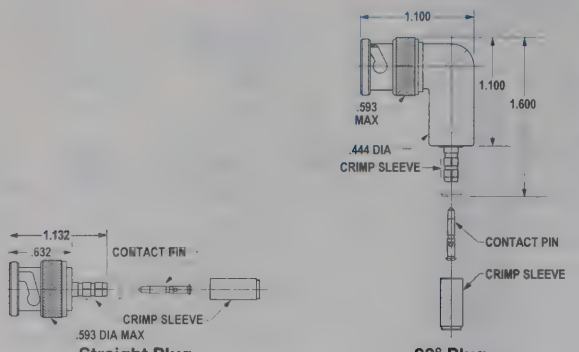
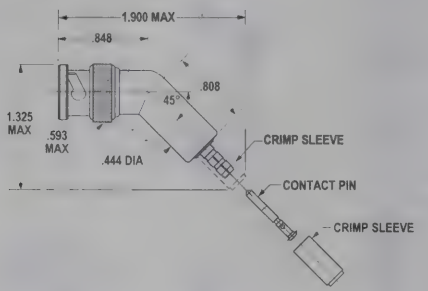
BNC-75 OHM CONNECTORS



Straight Plug

90° Plug



45° Plug

50µ" gold-plated captive center contact pin. Spring-loaded coupling ring utilizes a beryllium-copper crescent washer. Full 0.50" machined crimp sleeve, 0.300" support ferrule with radial and axial grooves. 45° and 90° BNCs allow routing and cable management in tight packaging requirements. Type number suffix (following dash) indicates cable group size.

Type 70 twinaxial/triaxial connectors are concentrically designed with 2 concentric contacts isolated from each other, the center contact, and the shielding connection. They are used in digital data bus, MIL-STD-1553B (airborne/ground, primary/redundant) base-band circuits, and video pair applications (FLIR). Field serviceable wrench crimp version for quick termination of cables up to 0.250″ diameter. Tool crimp version requires hand tools for assembly ("C" in **type** number). Digits in type number following dash indicate cable/group size. Connectors do not require mechanical alignment for mating. Nominal impedance non constant. Frequency range: 0-500MHz. Voltage rating 400 (100 @ 70,000). Insulation resistance: 5000MΩ . Temperature range: -65° to +165° C. Cable retention force (min.) 40 lbs. with 0.200-0.325″ O.D. cable. **Type 150** connectors have the same electrical characteristics but are smaller in size.

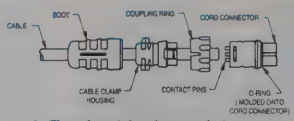
MINI WEATHERTIGHT™ CONNECTORS



1. Feed cable through boot.

2. Strip cable, solder connectors.

3. Push coupling ring onto cord connector.

4. Snap clamps into compartments.

5. Push boot to seat tightly.

Ideal for process control, marine electronics, medical instrumentation, geothermal instrumentation, communications, transportation, general industrial electronics. Superior leakage protection. The contact area is double-sealed for excellent moisture and chemical resistance. Thermoplastic rubber body simulates closed entry contact system to prevent probe damage or accidental loss of spring retention due to misaligned or bent pins. Housing rated at UL94V-0 against flammability. Panel connector shell features a positioning keyway to prevent misalignments and a polarizing single "D" design for proper panel mounting and to prevent rotations. Made of thermoplastic polymer glass fiber. Rear boot and connector shell interior are thermoplastic rubber. Contacts are copper-base alloy, gold-plated over nickel underplate.

Solder Lug

0.250″ (6.35) HI-D JAX® ENCLOSED PHONE JACKS

Choice of solder lug terminals for panel/chassis mounting or spring lock PC terminals that close during insertion into PC board and upon insertion open to hold jack to board during soldering. Unitized molded housing. Threaded metal bushing mount through 0.375″ diameter hole on 0.625″ centers for panels up to 0.156″ thick; with PC terminals up to 0.094″ thick. Type number with **M prefix** mate with phone and MIL-standard plugs. *Order mating plugs listed in table on page 326.* PC terminals also available; *contact your local Newark sales office.*

3.5mm HEAVY-DUTY STEREO PLUGS

NEW

Stereo plugs feature one-piece tip rod and large solder terminal for easy solderability. Heavy-duty cable clamp provides better strain relief for larger cables. Larger design allows for easier plug assembly and more room for solder connections. Large handle with knurled back provides ergonomic gripping surface. Tubular insulator prevents solder joints from contacting handle. Meet Military standards MIL-STD-202F, Method 107G (thermal shock), and Method 201 (vibration).

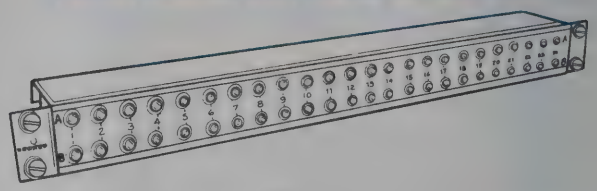
PATCH PANELS AND CABLE ASSEMBLIES



NYS-SPP

NPP-TT and **NPP-TB** panels feature all switching configurations. Top and bottom rows linked by internal connectors that are easily accessible and replaceable. Fully PCB wired. Contacts: gold-plated. Accept solid and stranded wire up to 20 AWG (0.5mm^2). Connector contact resistance: **type NPP-TT** <12mΩ; **type NPP-TB** <10mΩ. Switch contact resistance: <15mΩ. Spring-force push terminals for fast connection and termination. Jack lifetime: >5,000 insertion/withdrawal cycles. Dimensions: 19" W x 1U rack space. **Type NYS-SPP** features a modular ¼" patch panel with 48 balanced channels. Front and rear sides of **type NYS-SPP** both have 2 rows of 24 sockets with ¼" jacks mating with stereo phone plugs. Fully PCB wired. Individually-replaceable PC cards eliminate solder set up.

SPEAKON & POWERCON CONNECTION SYSTEMS

Fig. 1

Fig. 2

Fig. 3

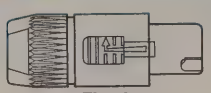

Fig. 4

Speakon and PowerCon utilize the same connector design but for different applications: Speakon is used for speakers and amplifiers and PowerCon for AC power connections.

Types NL4 are 4-pole, **NL8** are 8-pole. Cable O.D. for 4-pole is 6-15mm; pole is 8-20mm. Termination can be either soldered or screw compression on cable mount; solder or quick disconnect on panel mount. P.C. board mount versions available, *contact your local Newark sales office. Order coupler for linking (extending) cables separately below.*

91 SERIES MICROPHONE CONNECTORS

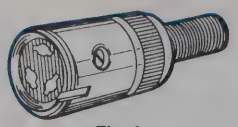

Fig. 1

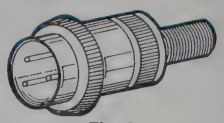

Fig. 2

Fig. 3

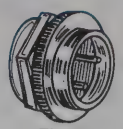

Fig. 4

91 series 3-, 4-, and 6-contact connectors, designed primarily for audio equipment, find extensive use with all types of portable equipment. Cord protector spring ID on 3 contact units = 0.281″ (7.14); on 4 and 6 contact units = 0.385″ (9.78). Connectors feature positive screw-type coupling ring connection and squeeze-type clamp cable grips. Shells are chrome-plated brass, with molded black phenolic dielectric. 600Vrms voltage rating. Current ratings: female contacts, 3A; male contacts, 5A. Voltage breakdown: 2000V.

POLARIZED AND NON-POLARIZED AC INLET WITH ON/OFF SWITCH

Fig. 1

Fig. 2

Fig. 3

Features SPST on/off line switch and is PCB mountable with snap-in stabilizing legs and center screw. Designed for "cold" connections, Protection Class I and II. Electrical connections between inlet and switch are made on the PCB. Units are available with polarized and non-polarized AC inlet. Casing: thermoplastic PA6.6 rated UL 94V-0. Terminals: tin-plated brass. Dimensions: 18 H x 53.3 W x 24.3mm D. UL recognized, CSA certified, VDE approved.

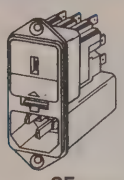
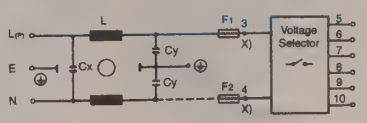
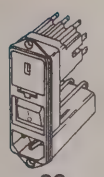
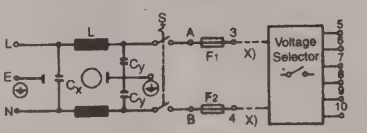
CE AND CG SERIES LINE FILTERS WITH AC CONNECTOR





CE





CG

CE and **CG series** line filters have AC connector and interchangeable fuse drawers for ¼ x 1¼" or 5 x 20mm fuses. Available with single- or double-pole shock-safe fuse holder and series parallel voltage selection. Quick-connect terminals are 4.8 x 0.8mm. CG series with DPST have 35A in-rush current; dimensions: 97H x 30W x 69mmD. **CE** dimensions: 69.5H x 30W x 69mmD. UL recognized, CSA certified, and VDE approved.

Two self-mating halves so no separate male or female parts are needed. Polycarbonate insulation housings can be stacked together using molded-in dovetails for quick assembly of multipole connectors. Crimp or solder terminal to wire and insert tin-plated spring loaded contact into housing. The locking 75 amp Powerpole utilizes the same contacts and crimp tooling as standard 75 amp housing. The locking 75 amp Powerpole is a single-pole connector with a latching design. To mate locking Powerpole connectors together into modular, multipole configurations, simply slide the locking clip of one connector into the adjoining cavity of its mate. UL recognized, CSA certified. Includes housing and contact. *Order replacement housings and contacts below; insertion and crimping tools separately on this page.*

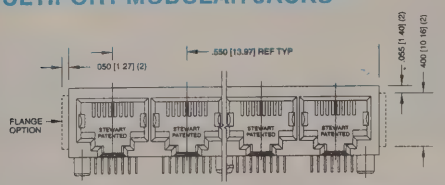
MULTIPORT MODULAR JACKS



66 series single-row harmonica jacks, shielded and unshielded, are used for twisted-pair networking environments. Most systems that use unshielded twisted-pair cable can use shielded multiport jacks to block EMI leakage from the enclosure. Phosphor bronze contacts with selective gold plating in contact area. Fully enclosed and available in 6- or 8-contact positions. Thermoplastic housing, rated UL94V-0. Meet FCC Part 68.5 rules and regulations. UL recognized, CSA certified.

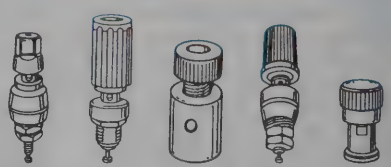
STANDARD BINDING POSTS



3-876 3-881 874 3-880 MBP

Type 3-876 is nylon with gold-plated brass insert washers, hex head, and body. Accepts phone tip, spade lug, banana plug, alligator clip, wire to 15 AWG. **Type 3-880** has keyed insulators to prevent turning. Gold-plated metal body. Current rating: 15A, 1000VACrms min. Fits 0.063-0.25″ (1.60-6.35) panel thicknesses. **Type 3-881** is nylon insulated with silver-plated metal body. Panel thicknesses to 0.281″ (7.14). Current rating: 15A, 8000VDC breakdown. **Type 874** has nickel-plated brass head and body; accepts standard phone tip or banana plug. **Type MBP-159** is a compression-type post for grounded, single-wire connections. Nickel-plated brass. Mounts #6 screw clearance hole. Rated: 15A.

PRESS FIT TIP JACKS

Nylon body installs by pressing into mounting hole. Requires no mounting hardware. Silver-plated contact with turret terminal sets in a nylon body. Closed-end feature prevents access of probes over 0.085″ (2.16). Current rating: 5A. Breakdown voltage: 5000VDC. Contact resistance: 0.005 ohms maximum. For panel thicknesses up to ⅜″.

Products at Your Door— When You Need Them, The Way You Need Them

Newark Electronics® now offers value-added services. So when your order arrives, you can put it to work without delay.

Products Customized to Your Specifications

- **Custom-Cut Cable** – We cut Belden Infinity® and Olflex® cable to the length you need.
- **Tape-on-Reel** – Looking for surface mount and thru-hole passive components in less-than-reel quantities? We have them.
- **Kitting** – Need parts grouped in kits? We build the kits you need.
- **Bagging and Tagging** – We can bag individual parts and label the bag to your specifications.
- **Assembly** – We perform basic assembly of compatible components.
- **Part Numbers and Special Information** – We can add your bonded inventory and special receiving information about the products in your order to your shipping and packing slip.
- **Bar-Coded Shipments** – Do you use bar coding to track items? We can add bar codes to your products.

We have it today, so you'll have it tomorrow.™

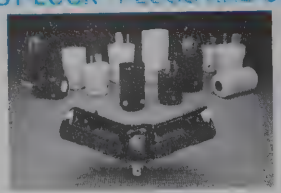
VALISE® TWIST-LOCK® PLUGS AND CONNECTORS



Valise® Twist-Lock® plugs and connectors feature devices available in traditional black with white cord grips. Yellow with black cord grips are also available; *contact your local Newark sales office.* The removable cord grip inserts offer a simple way of accommodating a wide range of cord diameters, while providing a powerful hold to prevent slippage and strain. One-piece Valise style body offers unique interlocking lugs which secure the body together for strength and security as the device folds to grip the cord, even with rough use. Cord range: **types HBL45** and **HBL47** = 0.220-0.660″ (5.6-16.8); **type HBL23** = 0.325-0.720″ (8.26-18.3); **type HBL26** = 0.590-0.930″ (15.0-23.6). UL listed, CSA certified, CE compliant.

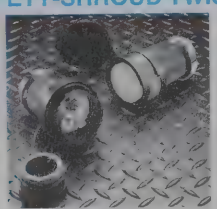
WATERTIGHT SAFETY-SHROUD TWIST-LOCK SYSTEM



NEMA type 4X rated product line is offered in a complete family consisting of plugs, connector bodies and receptacles. Universal neoprene diaphragm seal accommodates a wide range of cord sizes from #16-3, SJ-#85, S, SO. All screws are Phillips/slotted combination. All models 20 amps. More ampere and voltage combinations available; *contact your local Newark sales office.*

INDUSTRIAL AC WALL SWITCHES AND WALL PLATES

Industrial switches feature one-piece rivetless copper alloy spring contact arm and terminal plate to secure proper contact alignment and provide low heat rise. Silver cadmium oxide contacts reduce contact erosion and prevent welding. Nickel-plated steel bridge resists corrosion. One-piece integral grounding terminal with #8 brass screw complies with NEC® Article 380-12. Nylon toggles. Rated 20A @ 120-277VAC, except **HBL 1201, HBL 1201L, HBL1201I, 1201IL, 1201PL,** 15A. Dimensions: 2.38H x 1.25W x 1.05″D. UL listed, CSA certified.

CIRCUIT GUARD® PORTABLE GFCI's

GFP

Waterproof ground fault circuit interrupters interrupt electrical power for loads when leakage to ground reaches 4-6mA. Work with 2-pole, 3-wire receptacle. Ground fault interrupters protect people from the hazards of line-to-ground electrical current leakage. No-voltage-release feature. Manual set. NEMA 5-15 plug; NEMA 5-15R connector. 15A, 120VAC, 60Hz. **Types GFP5266CY,** and **GFP1C** are user attachable **GFI** plugs designed to allow portable equipment manufacturers the ability to provide ground fault protection to their equipment. They feature large neon power "ON" light, manual set, positive verification of power status, prevents unintentional restart of equipment after loss of primary power. Rated: 2-pole, 3-wire 15A, 120VAC. All are UL listed, CSA certified.

(2686) (de00548)

GFI AND RECEPTACLE CIRCUIT TESTERS

Circuit tester neon lights indicate and identify improper wiring conditions in electrical circuits. Plugs into single-phase, 125V, 2-pole, 3-wire outlet. UL listed.

34F1145 Type HBL5200. **Each** **63.04**

GFI tester measures trip level of portable or "wired-in" GFIs within 2-7 mA and leakage in small tools, appliances within 1-7 mA. 110, 120, 130V circuit at 15, 20A.

34F1150 Type GFT2-G. **Each** **157.27**

(2864) (de50078)

WIRING PLUGS, CONNECTORS AND RECEPTACLES

HOSPITAL & SPECIFICATION GRADE AC RECEPTACLES

Hospital grade meets Federal Specification WC-596-F. Impact resistant nylon face. Self-grounding, side and back wiring for copper wire sizes 14 to 10 AWG. UL listed, CSA certified.

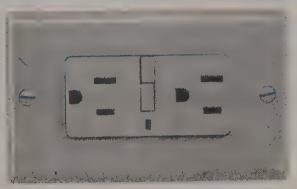
GROUND FAULT CIRCUIT INTERRUPTER

NEW UL



The only GFCI with a standard test light for proper line and and load connections. The test light illuminates only if the proper line and load terminations have been made. If the test light remains off, the GFCI is miswired and needs to be corrected. Protects from electrical shock hazards and is used in offices, homes, schools and hotels. Provides easy access to top ground screw and accepts wire with a AWG of 14-10.

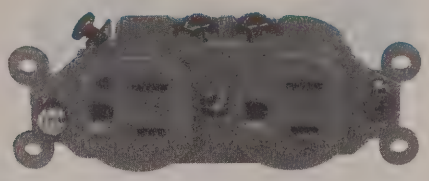
STRAIGHT-BLADE DUPLEX RECEPTACLES WITH ISOLATED GROUND

NEW UL



MADE IN USA

Grounding system isolated from common building ground. Triple-wipe line contacts provide excellent long-term plug retention. Double-wipe ground contacts, reinforced by face and back body, ensure long-term ground retention. Automatic grounding secures wall plate grounding in grounded metal enclosure. Face/body assembled with dual drive pins for superior assembly security. Back-and-side-wire terminals accept 14, 12, and 10 AWG solid or stranded wire. UL listed, made in the U.S.A.

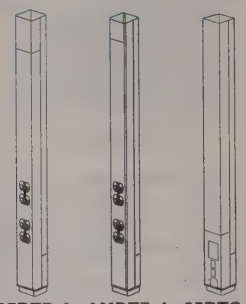
TELEPOWER® POWER, TELEPHONE & DATA SERVICE POLES

WIREMOLD Wire Management Systems



25DTP-4 AMDTP-4 25DTC-4

- **Distributes Power and Data Services from Overhead Wiring Systems**
- **Easily Relocated for a Flexible Office Environment**
- **Dual Channel Poles for Both Power and Data Cabling**
- **Easy Installation; Complete Installation Accessories Included**

Poles come with feed fittings, ceiling trim plates, T-bar mounting hardware, and carpet/floor grippers. A variety of knockouts and twistouts on the bottom of the poles allow easy access to update wiring. Maximum ceiling height: 10′. **Type 25DTP-4** is steel constructed, has an ivory finish, and is factory wired with two spec grade 20A, 125VAC duplex receptacles. K.O.'s provided for RJ11/RJ45 and furniture communications connectors. **Type AMDTP-4** is anodized aluminum construction/finish and factory wired with two spec grade 20A, 125VAC duplex receptacles. An opening for communications and a ½″ hole for power is provided at the top of the pole. **Type 25DTC-4** is an ivory steel constructed pole with dual compartments for communications wiring only. Blank unwired without outlets. UL listed.

PLUGMOLD® MULTI-OUTLET, PRE-WIRED RACEWAY

WIREMOLD Wire Management Systems

- **Provides Multiple Outlet Convenience for Electrically Busy Areas**
- **Hardwired for Permanent Installation**
- **15A Spec Grade Receptacles at 6″ or 12″ or 18″ Centers**
- **Pre-Wired with 12-Gauge Insulated Solid Wire**
- **3-, 5- or 6-foot Lengths Available**
- **Optional Entrance End Fitting Adapts Outlet Strip to Existing Power Circuits and Mounts to Existing Electrical Box**

Pre-wired electrical raceway provides multiple outlet convenience for electrically busy areas. Raceways are hard-wired for permanent installations. 15A spec grade receptacles on 6″ or 12″ centers. Feature steel construction, ivory Scuffcoat™ finish, compact low-profile design (1⁹⁄₃₂″ W x ¾″ D), and prewired 12-gauge insulated solid wire. Optional entrance end fitting (**type V2010A2**) adapts outlet strip to existing power circuits and mounts to existing electrical box. UL listed, CSA certified.

MULTI-OUTLET STRIPS

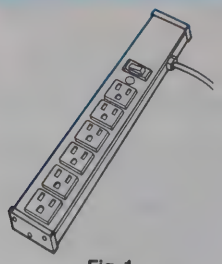

Fig. 1

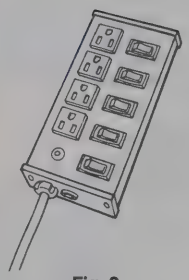

Fig. 2

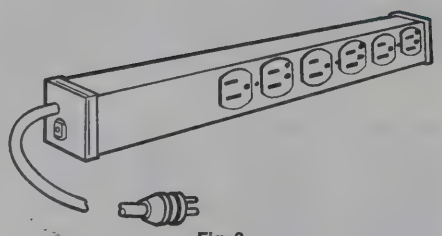

Fig. 3

Power outlet strips provide power where space is limited. All are rated 15 amps @ 125 volts and feature circuit breaker, non-corrosive aluminum construction (except **type P6**, plastic housing), 14/3 SJT power cord and impact resistant plastic end caps. Types with (*) do not have master pilot light/power switch. Compact models available with 4 to 10 outlets are gray with snap-on/off mounting clips (except 10-outlet units, beige with keyhole mounting). Deluxe control models include individually switched receptacles and master power switch. **Types UL208** and **UL209** are beige with keyhole mounting. 90° right-angle outlet strips have rotated outlets to allow angled plugs or small power supplies to be plugged in without covering adjacent outlets. No power switch. Silver with snap-on mounting clips. 20-amp models are rated at 20 amps/125 volts, 2500 watts continuous duty with 20-amp breaker and NEMA-5-20R receptacles. Beige with black 12/3 SJT power cord and mount with snap-on mounting clips. Medical-grade power strips feature UL1363 listed hospital-grade plug and receptacles designated by green dot. 15A/125V rating and circuit breaker. All types offer 14/3 SJT power cord and impact-resistant plastic end caps. Noncorrosive white aluminum housing. Snap-on/off mounting clips included. Power switch is not included per hospital requirement. 3-year warranty.

ROUND VINYL WORK LIGHTS

NEW UL OSHA

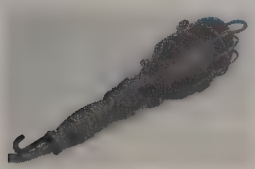

Fig. 1

Fig. 2

Feature a dual-hook system that permits the work light to hang by either its guard or handle. Durable, heat-resistant housing stays cool even with short-neck bulbs. Round orange vinyl jacket is versatile and easy to see. Will not mark floors or walls. All metal grounded guard lights are UL rated for 100-watt bulbs. AWG/conductors for **types 0680, 0681,** and **0682**: 18/3; for **types 0691, 0692,** and **0649**: 16/3; for **types 0200** and **0201**: 18/2 and have a 75W bulb rating. Cord color: orange. Wire type: SJTW-A. UL listed. OSHA compliant for temporary lighting.

RETRACTABLE REEL LIGHTS

NEW UL OSHA

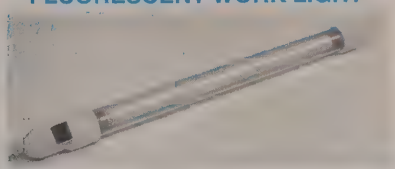
Perfect to use around the garage, basement, or shop. Both have a switch and outlet in the handle. Reel cases are made of epoxy-finished steel. Feature dual-hook system and complete mounting hardware. 100W bulb rating. AWG/conductors for **type 0212,** 18/3, for **type 0211,** 16/3. Wire type SJT. UL listed. OSHA compliant for general use.

Stock No.	Type	Cord Length	125V Rating	Each
50N522	0212	20′	7A	**58.95**
50N523	0211	30′	10A	**59.95**

(34085) (ne34085)

FLUORESCENT WORK LIGHT

NEW UL



Powerfully built with shatter-resistant housing, fluorescent light for energy savings and cool-in-use operation. Bulb is easy to replace. Includes on/off switch and adjustable hanger hooks. 25′ cord length. AWG/conductors: 18/2. Bulb rating: 15W. Wire type SJT. UL listed.

50N524 Type 0221. **Each** **49.95**
(34086) (ne34086)

RETRACTABLE CORD REEL POWER BLOCK

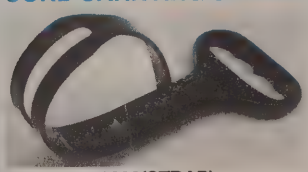
NEW UL OSHA

Convenient 3-outlet plug avoids the cost and clutter of running 2 or 3 cords for tools and appliances around the home, job, or recreational area. Rugged steel case with hanging hardware. AWG/conductors: 16/3. 125V rating: 10A. Rating: 300V. 30′ cord length. Wire type SJTW-A. UL listed. OSHA compliant for general use.

50N526 Type 0548. **Each** **58.95**
(34087) (ne34087)

CORD CARRYING STRAPS

NEW UL



2802(STRAP)

2869

Type 2869 is a luggage-grade nylon strap with convenient handle. Perfect for carrying cords, tubing, pipe, hose or rope. **Type 2802 (STRAP)** has a sturdy 1-piece construction design which holds up to 150′ of 16 gauge/3 conductor cord. UL listed.

Stock No.	Type	Description	Each
50N527	2802(STRAP)	Black Plastic	**2.95**
50N528	2869	Yellow Nylon	**4.95**

PowerBrite™ FLUORESCENT-TYPE POWER SUPPLY CORDS

PowerBrite™ is a line of colored plastic-jacketed cords. The neon-like pink, green, and yellow cord jackets can add value to a consumer-related OEM/EOEM product. These bright, distinctive colors make color-coding power cords easy. Especially useful in high-density broadcast and computer applications or in any rack-mounted electronic equipment installation where multiple cords are utilized in a close or confined area. Practical to use where a number of computer or peripheral devices access a power strip. PowerBrite™ cords provide a high degree of differentiation and allow for immediate identification of cords by type and/or usage. Also available in red. *Contact your local Newark sales office.*

FUSES FOR BRITISH PLUGS

NOTE: Loose fuses are supplied on the condition that they are only fitted to the appropriate plug, ie., 3 amp fuses should only be fitted to plugs designated with 3 amp fuse size. Under no condition should they be fitted to any other size. This statement applies to each individual amperage of fuse. Under no circumstances will Powercords or Belden accept any liability for any deviant.

Products at Your Door— When You Need Them, The Way You Need Them

Newark Electronics® now offers value-added services. So when your order arrives, you can put it to work without delay.

Products Customized to Your Specifications

- **Custom-Cut Cable** – We cut Belden Infinity® and Olflex® cable to the length you need.
- **Tape-on-Reel** – Looking for surface mount and thru-hole passive components in less-than-reel quantities? We have them.
- **Kitting** – Need parts grouped in kits? We build the kits you need.
- **Bagging and Tagging** – We can bag individual parts and label the bag to your specifications.
- **Assembly** – We perform basic assembly of compatible components.
- **Part Numbers and Special Information** – We can add your bonded inventory and special receiving information about the products in your order to your shipping and packing slip.
- **Bar-Coded Shipments** – Do you use bar coding to track items? We can add bar codes to your products.

We have it today, so you'll have it tomorrow.™

RACK AND CABINET BUYING GUIDE

HOW TO SIZE A RACK OR CABINET THAT MEETS YOUR NEEDS:

Make a list of what equipment you need to house. You need to determine the size and the weight of all your equipment. You want the cabinet or rack to be large and strong enough to hold your existing equipment and to provide room for future growth.
Typical items that are housed are: CPUs, Monitors, Keyboards, Modems, Switches, Hubs, CD towers, UPSs, Servers, Power Supplies, and Power Conditioners.

MEASURE TWICE, BUY ONCE.

Will the rack or cabinet fit in the space you have planned for it?
Check the following dimensions:

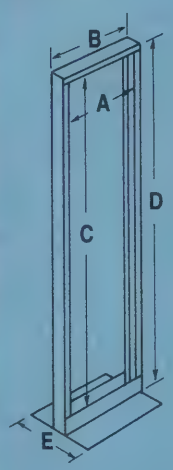
A. Inside Width
B. Outside Width
C. Inside Height
D. Outside Height
E. Depth

The most common cabinet and racks are designed to hold 19″ wide equipment. The height and depth may vary depending on the cabinet or rack. Standard heights range from 48″ to 83″ and depths range from 27″ to 33″.

WHAT DO YOU NEED?

After you have determined the size of cabinet or rack that you need, you will need to select accessories. Use the illustrated guide below and your requirements to design your rack or cabinet.

RACKS



Rack Dimensions

A: Inside Width: _____
B: Outside Width: _____
C: Inside Height: _____
D: Outside Height: _____
E: Base Depth: _____

What will you store?

NEMA ENCLOSURES

QLINE™ "E" POLYCAROBNATE TYPE 4X ENCLOSURES

Contoured body with flush cover screws for attractive, contemporary appearance. Can be used as insulated electrical junction boxes, terminal wiring boxes, instrument housings and as housings for electrical controls in wet, dusty and corrosive environments that may be subject to occasional submersion. Covers are clear or opaque (suffix **CC** in type number indicates clear cover) and are made of impact-resistant polycarbonate and feature a molded-in hole for a wire lead. Units are easily punched, drilled, filed or sawed. Seamless foam-in-place gasket provides oil-resistant, water-tight, and dust-tight seal. Meet NEMA enclosure types 4, 4X, Type 6, Type 12, and Type 13. Screws for mounting optional panel are included. UL listed, CSA certified.

Pushbutton Enclosures

QLINE™ "D" POLYCARBONATE NEMA TYPE 4X ENCLOSURES

Contoured bodies with flush cover screws designed to insulate and house 30.5mm or 22.5mm pushbuttons in wet, dusty, and corrosive environments. Meet NEMA/EEMAC enclosure types 4, 4X, 12, and 13 and IEC enclosure IP67 classification. Constructed of high-impact polycarbonate material. Polycarbonate is easily punched, drilled, filed, or sawed. Cross-point cover screws are zinc-plated steel. Polycarbonate screw cover caps and mounting hardware are included. Color: light gray. UL listed, CSA certified.

QLine "I"

QLINE™ "I" POLYCARBONATE NEMA TYPE 4X ENCLOSURES

Designed for use as insulated electrical junction boxes, terminal wiring boxes, instrument housings, electrical control boxes, and pushbutton housings in wet, dusty, and corrosive environments. Rated UL94-V5. Meet NEMA enclosure types 4, 4X, 12, and 13 and IEC enclosure IP65 classification. Constructed of impact-resistant polycarbonate. Clear and opaque covers are constructed of impact-resistant polycarbonate (**suffix CC** in type number denotes clear cover). Units are easily punched, drilled, filed, or sawed. Slotted cover screws are strong, durable polyamide. Mounting holes molded directly under cover screws. Molded internal pads provided for mounting optional panels, DIN rails, and other components. Molded internal rails for mounting adjustable depth panel kit and swing panel kits. Screws provided for mounting optional panel. Cover includes a molded hole for wire leads. Color: light gray. UL listed, CSA certified.

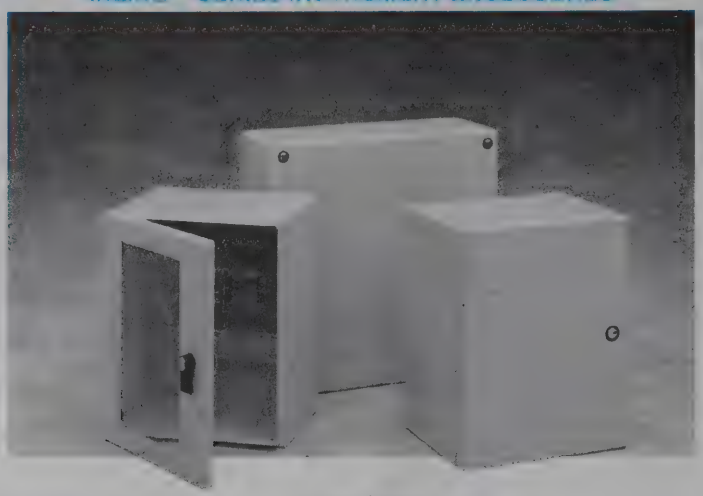
INSTRUMENT ENCLOSURES

INLINE™ SERIES INSTRUMENT ENCLOSURES



Window Cover
Screw Cover
Hinged Cover

Designed to house and protect sensitive electrical components from harsh, dirty environments. For installations where dirt, dust, oil, water, or other contaminants are present. Constructed of 16-gauge steel. Back fastening holes provide direct mounting; external mounting feet optional. Streamlined style with flush latching and durable textured light gray polyester powder coating finish. Units come complete with hardware, including: panel mounting screws, grounding hardware, and sealing washers for wall-mounting holes. Optional 12-gauge steel panels are available; *contact your local Newark sales office.*

INLINE™ SCREW COVER INSTRUMENT ENCLOSURES

Feature integral compression stops that maintain optimal gasket compression. Meet NEMA/EEMAC enclosure **types 4** and **12** and IEC enclosure IP66 classification. UL listed, CSA certified, VDE approved.

NEMA INSTRUMENT ENCLOSURES

SCREW COVER "DSC" ENCLOSURES

Units are designated for use as electrical junction boxes, terminal wiring boxes, and instrument housings, and are suitable for use with liquid-tight flexible conduit. Protection provided from dust, dirt, oil, and water. Enclosures have no holes or conduit knockouts. Covers are flat. Cover screws thread into enclosure outside gasket line to prevent leakage through cover screw holes. Units feature oil-resistant gasket and adhesive and external mounting feet. Meets NEMA enclosure types 4, 6, 12 and 13 and IEC enclosure IP67 classification. UL listed, CSA certified.

SCREW COVER "SC" ENCLOSURES

Designed for use as electrical junction boxes, terminal wiring boxes, instrument housings, and electric control enclosures. Protection provided from dust, dirt, oil, and water. Seams are continuously welded and ground smooth with no holes or knockouts. Captivated cover screws thread into sealed wells. Unit features oil-resistant gasket and adhesive and external mounting feet. Weldnuts provided for mounting optional panels and terminal kits in size 6.00 × 4.00″ and larger. Unit meets NEMA/EEMAC enclosure types 12 and 13 and IEC enclosure IP65 classification. *Order optional panels separately; see "Panel" table below.* UL listed, CSA certified.

(6960) (de52522)

AIR-TO-AIR HEAT EXCHANGERS

Feature streamlined appearance and modified heat pipe core that offers high performance. Units can be mounted on the front, side, top, or inside of an electrical enclosure. Note: Mounting the units horizontally will slightly reduce the cooling efficiency. Units feature closed-loop cooling, keeping contaminants outside the enclosure. Units operate on either 115VAC, 50/60Hz or 230VAC, 50/60Hz. Max. ambient temperature: +155°F, +68°C. Units are single phase. UL and cUL listed.

CONSIDER SPECIFIC APPLICATION NEEDS BEFORE CHOOSING A CLIMATE CONTROL SOLUTION

- VENTILATION DEVICES SUCH AS LOUVERS ARE USEFUL IF MAINTAINING A COOL, CONSTANT TEMPERATURE IS NOT A FACTOR
- FAN PACKAGES AND BLOWERS MAY INTRODUCE AMBIENT CONTAMINANTS LIKE OIL, MIST, AND DUST INTO THE ENCLOSURE
- HEAT EXCHANGERS† CANNOT COOL BELOW THE AMBIENT TEMPERATURE
- CLOSED-LOOP AIR CONDITIONERS‡ CAN COOL AND REDUCE HUMIDITY WITHOUT INTRODUCING CONTAMINANTS
- USE THE FORMULAS LISTED BELOW TO DETERMINE THE RIGHT AIR CONDITIONER OR HEAT EXCHANGER FOR YOUR APPLICATION:

1) WATTS -- 1 WATT = 3.413BTU/Hr: DETERMINE THE INTERNAL HEAT LOAD PRODUCED BY EQUIPMENT AS TOTAL OPERATING WATTS

2) ΔT (DESIRED TEMPERATURE DIFFERENCE) -- 1 °K ΔT = 1.8°F ΔT, °K ΔT = °C ΔT: TO DETERMINE THE ΔT (°F) WHICH IS THE TEMPERATURE DIFFERENCE BETWEEN THE MAXIMUM TEMPERATURE OUTSIDE THE ENCLOSURE (T_O) AND THE MAXIMUM DESIRED TEMPERATURE INSIDE THE ENCLOSURE (T_I) WHICH CAN BE CALCULATED AS: $T_O - T_I = \Delta T$ FOR AIR CONDITIONERS; $T_I - T_O = \Delta T$ FOR HEAT EXCHANGERS AND FANS

3) AREA (ft^2) 1 M^2 = 10.76ft^2 (CALCULATE THE EXPOSED SURFACE AREA OF THE ENCLOSURE IN SQUARE FEET): AREA (ft^2) = 2[(H″ X W″) + (H″ X D″) = (W″ X D″)] ÷ 144.

†TO DETERMINE THE RIGHT HEAT EXCHANGER PERFORMANCE RATING:

$$\frac{[\text{WATTS} \div \Delta T(°F)] - [0.22 \times \text{AREA}\ (ft^2)]}{\text{WATTS/°F}}$$

‡TO DETERMINE THE RIGHT AIR CONDITIONER CAPACITY:

$$\frac{(\text{WATTS} \times 3.413 + [1.25 \times \text{AREA}\ (ft^2) \times \Delta T(°f)]}{\text{BTU/Hr}}$$

(13730) (ne85141)

ENCLOSURE AIR CONDITIONERS

PROAIR™ SERIES CR29 SIDE MOUNT AIR CONDITIONERS

Units deliver up to 4000 BTUs per hour. Can be mounted on the door, side, or front of enclosure. Easy installation with mounting hardware and instructions included. Hinged front cover permits units to be easily serviced and maintained. Dimensions: 29.50H x 15.75W x 8.63"D (749 x 400 x 219). Max. ambient temperature: 131°F, 55°C. Units operate at either 115VAC, 50/60Hz or 230VAC, 50/60Hz. Units are single phase. UL and cUL listed.

Stock No.	Type	Voltage	BTU/Hr* (Watts) @ 131°F	Amps @ 131°F	BTU/Hr* (Watts) @ 95°F	Amps @ 95°F	Each
91F4799	CR29-0216-G002	115VAC	2000-2200 (585-645)	7.4/7.4	1700-2000 (500-585)	7.0/6.0	1979.20
91F4800	CR29-0226-G002	230VAC	2500-2700 (730-790)	4.6/3.9	1800-2000 (525-585)	4.4/3.3	2004.34
91F4801	CR29-0416-G002	115VAC	3500-4000 (1025-1170)	13.5/13.5	2400-2800 (703-820)	10.7/9.6	2151.10
91F4802	CR29-0426-G002	230VAC	3500-4000 (1025-1170)	6.7/6.6	2400-2800 (703-820)	5.9/5.3	2176.24

* Because air conditioners provide less cooling at lower operating temperatures, two cooling capacity ratings are provided.
(13029) (ne10030)

CR29

PROAIR™ SERIES CR43 SIDE MOUNT AIR CONDITIONERS

Units are designed to deliver 6000-8500 BTUs per hour cooling capacity. High-performance centrifugal blowers provide substantial air flow, even in tightly-packed enclosures. Units can be mounted on the door, side, or front of the enclosure. Easy installation with mounting hardware and instructions are included. Hinged front cover makes units easy to service and maintain. Max. ambient temperature: 131°F, 55°C. Dimensions: 43.31H x 15.75W x 10.25"D (1100 x 400 x 260). UL and cUL listed.

NEMA ENCLOSURES

SMALL NEMA 12 ENCLOSURES (SCREW COVER)

Type 1414SC are rugged, NEMA 12 type enclosures, featuring a captive screw cover. Units include inner panel (larger than 4 x 4″) and plated lid chain. Formed from 16-gauge steel. Features smooth continuously welded seams, enclosure grounding stud, welded wall mount brackets and permanently secured oil-resistant gasket. Enclosures are finished in recoatable ASA baked enamel; panels are finished in white baked enamel. UL listed and CSA certified.

SMALL NEMA ENCLOSURES (HINGED COVER)

Rugged, NEMA-type enclosures feature external screw clamps on 3 sides and continuous hinged cover. Choice of 3 versions: NEMA Type 12 enclosure with clamped, piano-hinged cover, finished in ASA 61 gray recoatable baked enamel; NEMA Type 4, 4X enclosure with piano-hinged cover, finished in high-solids epoxy, ASA 61 gray finish; or stainless steel NEMA Type 4, 4X enclosure with piano-hinged cover. All types include inner panel, except where noted, and are suitable for transformer or instrument housings. Use as electrical junction and terminal boxes, to mount pneumatic or hydraulic instruments, or as control tubing junction point. Watertight, oil- and petroleum-resistant. Protect against dirt and dust. UL listed, CSA certified.

PD SERIES ROLEC® MODULAR FIBERGLASS ENCLOSURES

- Designed for Use as Instrument Enclosures, Electrical Junction Boxes or Terminal Wiring Enclosures
- Provide Outstanding Protection Against Dust, Oil and Pressurized Water
- Impervious to Atmospheric and Marine Corrosion
- Meets NEMA Enclosure Types 1, 2, 3, 3R, 4, 4X, 5, 12, and 13
- Meets IEC 529 Enclosure IP66 Classification
- UL94V-0 Flammability Rating
- 2-Piece Molded Fiberglass Reinforced Polyester Construction
- Captive Polyfiber Cover Screws Are Provided with a Standard Slot Head
- Threaded Cover Screw Holes Also Provide Single-Channel Access to Rear-Mounting Positions
- Recessed Neoprene Gasket with Tongue-and-Groove Construction Is Oil and Petroleum Resistant
- Threaded Stainless Steel Inserts Provide for Internal Mounting
- Light Beige RAL 7032, Pantone® 413

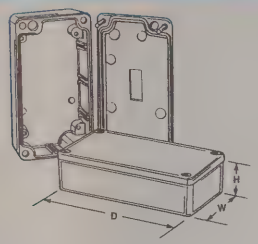
DIE-CAST ALUMINUM NEMA 4 BOXES

NEMA



- **Neoprene Gasket Installed**
- **PC Board Mounting Bosses**
- **Wall Mount Holes**

Resist atmospheric and marine corrosion. Wall mount and cover attaching screws are outside the sealed area to further allow integrity of the seal. Internal bosses for mounting PC boards horizontally or for connecting terminals. Internal guide slots for mounting PC board assemblies vertically. Include M4 stainless steel nonmagnetic screws, copper-plated ground screw and washer. Meets NEMA enclosure type 4 and IEC enclosure IP65 classification. Natural finish. Gray finish is also available; *contact your local Newark sales office for details.*

DIE-CAST ALUMINUM ECONOBOXES

Economical, lightweight, easy-to-machine enclosures are ideal as instrument and meter cases, filter networks, junction boxes, switches, and audio and radio frequency distributors. Die-cast 380 aluminum alloy construction offers excellent screening properties. Perfect for applications requiring a sturdier structure than sheet metal utility cabinets. Close-fitting flanged lids fasten to body with screws.

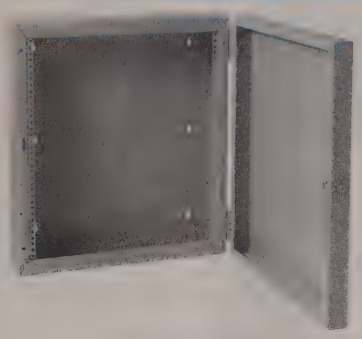
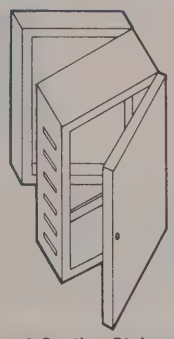
WALL MOUNT CABINETS



2-Section Style



3-Section Style

- **Plexiglas-Paneled or Steel Key-Lockable Front Doors**

Wall mount cabinets available in 2- and 3-section styles with plexiglas or steel door. Both cabinet styles feature standard 19″ EIA panel mounting rails in rear section with 1.1″ and 3″ diameter knockouts in both the top and bottom of the rear section for easy cabling access. 4.5″ deep rear section, 2″ deep door section, and 20.50″ length overall. Sturdy 16-gauge steel construction finished with durable black textured powercoat paint make cabinets suitable for telecom, datacom and other electronic equipment needs. Removable hinges allow for both left-hand and right-hand applications. 3-section styles have a swing frame center section, with adjustable 19″ EIA panel mounting rails and exhaust fan mounting option. Both cabinet styles also available in off-white textured finish; *contact your local Newark sales office for details.*

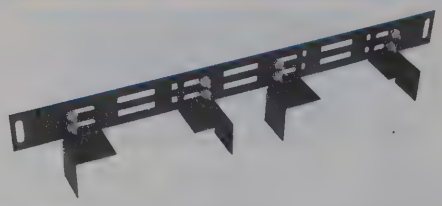
(6969) (de52601)

EQUIPMENT TIE-DOWN BRACKETS

NEW

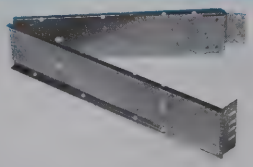


Secure equipment within cabinet rack. Available in two widths. Black finish. **Sold in packages of 2.**

Stock No.	Type	Panel W x H	Per Pkg.
91F3898	EB1781BT	19 x 1.75″	21.04
91F3900	EB1783BT	23 x 1.75″	21.96

(34485) (ne34485)

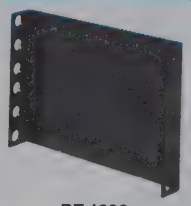
CABLE CARRIER/ORGANIZER



Type CC5190 permits up to 30″ of chassis extension. Mounts to rear panel mounting rails. Accommodates cabinet racks with 2 pairs of panel-mounting rails and 0.88″ clearance at the rear of the cabinet when closed. Ideal for ribbon or bundled cable.

95F6364 Type CC5190. **Each** **71.90**
(17327) (ne10597)

PANEL EXTENDERS



PE 1600

Heavy-gauge steel brackets extend panels 5″ beyond normal panel mounting rails. EIA universal spacing. Include all mounting hardware. Black finish. **Sold in packages of 2.**

Stock No.	Type	Panel Height	Per Pkg.
52F6514	PE 1600	3.5″	14.85

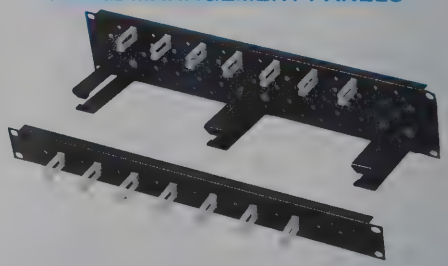
(34483) (ne34483)

CABLE MANAGEMENT PANELS



Cable management panels keep cable organized. Heavy 18-gauge formed steel panel. **Type CM 1225** includes 12 plastic cable clips and mounting hardware. **Type CM 1227** includes 24 plastic cable clips, 3 cable rings, and mounting hardware. Black finish.

Stock No.	Type	Panel W x H	Each
52F6509	CM 1225	19 x 1.75″	18.34
52F6510	CM 1227	19 x 3.50″	57.46

(17331) (ne10601)

CABLEWAY RINGS

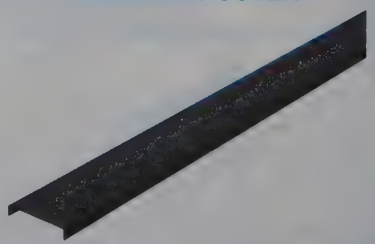
CM 1195

Steel cableway rings mount to side of open rack to provide vertical cableway. Can be used between 2 adjacent racks. Include all mounting hardware. Black finish.

Stock No.	Type	L x W	Each
52F6511	CM 1195	4 x 3″	8.34
52F6512	CM 1196	6 x 3″	9.23

(17332) (ne10602)

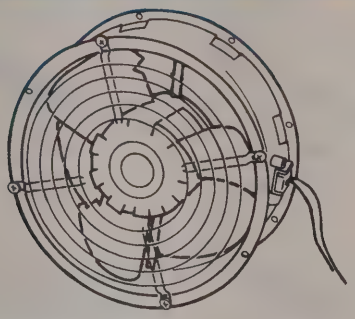
CABLEWAY COVER



Type CM 1197 formed steel cover mounts to the front and rear of cableway rings, *order separately on this page*, to protect cable. Offers a finshed look to cabling installations. For use on 7′ tall open racks. Includes all mounting hardware. Black finish. 83L x 3W x 0.5″H. **Sold in packages of 2.**

52F6513 Type CM 1197. **Per Pkg.** **72.28**
(17333) (ne10603)

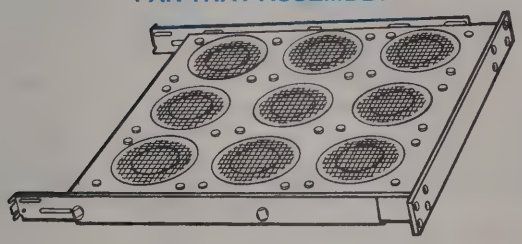
HIGH-CAPACITY EXHAUST FAN

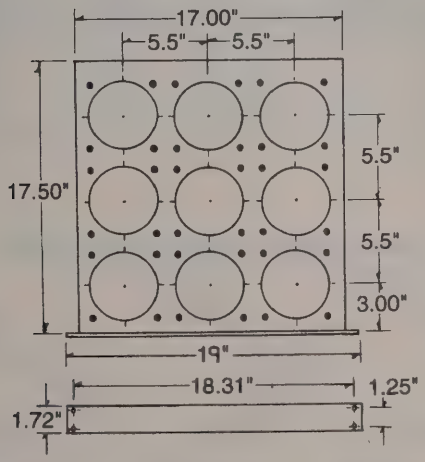


Lightweight, 10″ diameter fan mounts in top of ventilated Economizer™ cabinets. 115VAC fan includes finger guard, 36″ power cord, and mounting hardware. Aluminum housing. Noise level: 6.2 Bels. UL recognized, CSA certified. *Order optional Tem-Stat temperature controllers separately on this page.*

93F4057 Type FN-1282. **Each** **117.42**
(7145) (de52596)

FAN TRAY ASSEMBLY





- **Easy Installation**
- **Fits 1U (1.75″) Panel Height**
- **Choice of Fan Location**

Type FT-1170 fan tray assembly includes 9-position fan tray with preassembled front panel, a 9-outlet daisy chain cord, a 6′ power cord, adjustable support angles, and 9 knock-outs. Fan tray and support angles are constructed of 16-gauge steel. Front panel is 12-gauge steel. The fan tray and front panel available in your choice of white textured (**suffix WH**) or metallic-gray (**suffix MG**) finish. *Order fans for tray and finger guards separately below.*

89F1095 Type FT-1170WH. **Each** **174.23**
89F1096 Type FT-1170MG. **Each** **174.23**

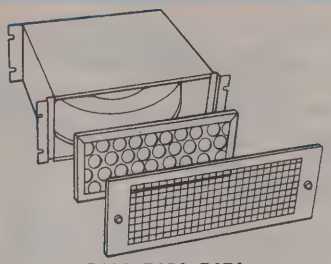
Type FN-1280 fans can be mounted in any pattern to suit individual cooling requirements. May be installed to blow up or down. Include one hardware cloth finger guard and mounting hardware. 110 volt, 0.21A. Airflow: 105 cfm. Operating temperature: –20°C to +60°C. UL recognized.

89F1097 Type FN-1280. **Each** **38.67**

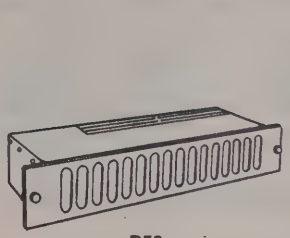
Type FG-1281 wireform finger guard is used for applications requiring finger guards on both sides of fan. Increases overall height of fan tray assembly to approximately 1.875″.

89F1098 Type FG-1281. **Each** **10.45**
(7169) (de53066)

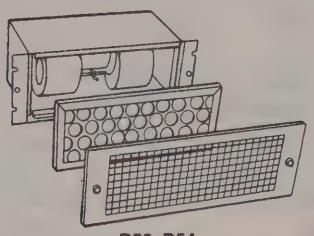
TRANS-AIRE BLOWERS AND REPLACEMENT FILTERS



B23A, B25A, B27A



B50



B52, B54

Designed for cooling electronic equipment in enclosures. All blowers are 115V, 50/60Hz, 19″ panel width with standard EIA notching for rack mounting. Dependable 20,000 hours continuous service. Include dust filter and 24″ power cord. UL listed.

Type B23A 2-speed blower requires only 3.5″ panel height. 1400/1150 rpm, 150/60-watt shaded-pole motor. Airflow: 180 cfm, high speed; 130 cfm, low speed. Permanently lubricated ball bearings. 3.5 x 19″ panel space. Depth: 12″.

91F1631 Type B23A. **Each** **354.90**

Type B25A 2-speed blower recommended for minimum back pressure. 1135/675 rpm, 410/225-watt P.S.C. motor. Airflow: 350 cfm, high speed; 215 cfm, low speed. Permanently lubricated ball bearings. 5.25 x 19″ panel space. Depth: 14.50″.

91F1632 Type B25A. **Each** **469.48**

Type B27A two-speed packaged blower with low noise level. Recommended for components that require maximum cooling. 1350/850 rpm, 580/370-watt P.S.C. motor. Airflow: 550 cfm, high speed; 345 cfm, low speed. Permanently lubricated ball bearings. 7 x 19″ panel space. Depth: 14.50″.

91F1630 Type B27A. **Each** **480.63**

Type B50 blower requires only 3.5″ panel height. Low audible noise level. 3100 rpm, 80-watt shaded-pole motor. Airflow: 150 cfm. Sleeve bearings. 3.5 x 19″ panel space. Depth: 6.375″.

91F1635 Type B50. **Each** **314.17**

Type B52 blower is designed for applications requiring higher back pressure. 2 extra-wide, small-diameter centrifugal blower wheels supply a large volume of clean filtered air. 3000 rpm, 70-watt shaded-pole motor. Airflow: 125 cfm. Permanently lubricated ball bearings. 5.25″ x 19″ panel space. Depth: 9″.

91F1633 Type B52. **Each** **372.82**

Type B54 dual, slow-speed, low-velocity centrifugal blower wheels. Low noise level 1550 rpm, 95-watt fan-cooled, rubber-mounted shaded-pole motor. Airflow: 300 cfm. Permanently lubricated ball bearings. 7 x 19″ panel space. Depth: 10.188″.

91F1634 Type B54. **Each** **372.82**

REPLACEMENT FILTERS

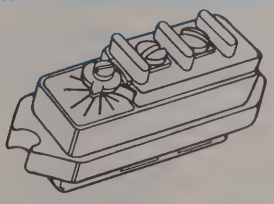
(7170) (de53067)

TEM-STAT TEMPERATURE CONTROL

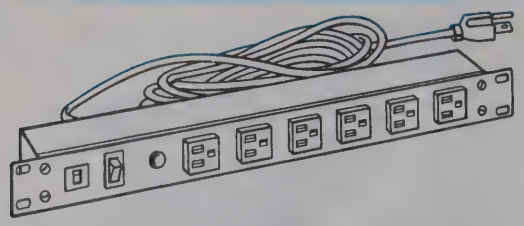


Tem-Stat controls react to gradual or sudden temperature changes in cabinets. When temperature reaches designated setting, contacts open or close (depending upon type) and remain open (or closed) until there is a 10°(±5°) decrease. UL listed, CSA certified.

Stock No.	Type	Contacts Type	Each
91F1636	TS-15	Normally Open — Closed on Temperature Rise	**23.35**
50F9836	TS-22	Normally Closed — Open on Temperature Rise	**24.44**

(7171) (de53068)

19″ RACK MOUNT POWER STRIP

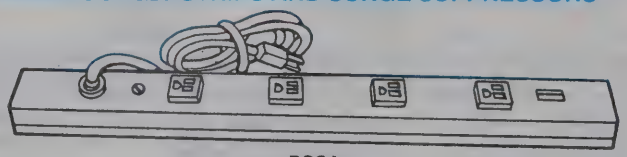


Easily installed to mounting surface of 19″ relay racks to provide instant power distribution from either the front or the rear of the unit. Units have 6 outlets rated 15A at 125VAC. 15′-14/3 SJT power cord. Combination on/off switch and pilot light on front panel. Steel housing with black finish; 1.75H x 19.00W x 2.37″D. **Type POS-193S** is surge protected. UL listed.

Stock No.	Type	Outlet Location	Surge Protected	Each
95F932	POS-192	Front	No	128.36
95F933	POS-193	Rear	No	113.48
95F934	POS-193S	Rear	Yes	131.80

(7168) (de53065)

POWER OUTLET STRIPS AND SURGE SUPPRESSORS



POS4

POS series power outlet strips can be used in cabinets, on walls, or along work and test benches. Housing color: silver-gray. No loose wires can come into contact with conductor wires. Strips snap into adjustable mounting clips. Grounded receptacles rated 15A, 125V. Thermal-type 15A circuit breaker with reset. Cord: 6′ 14-gauge 3-wire. UL recognized.

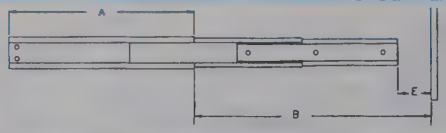
CHASSIS TRAK® TELESCOPING SLIDES

HOW TO ORDER SOLID BEARING SLIDES



- **Dimension A is the slide length in closed position, B is the length of extension from the front of the cabinet, E is the minimum required setback from front of cabinet.**
- **Overall extended length of slide is A+B–E.**
- **Standard 19″ cabinets have 17.75″W opening. Pair of 0.38″ slides and 17″W chassis will fit 17.75″ cabinet opening.**

(7072) (de01508)

C-230 SERIES SOLID-BEARING SLIDES, 125-LB CAPACITY

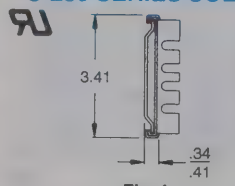


Fig. 1

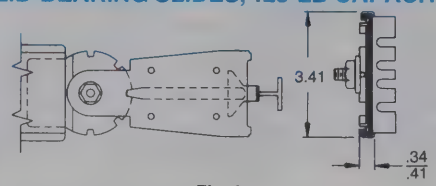

Fig. 2

3-section, fully extendable slides fit standard rack or enclosure and provide high resistance to shock and vibration. One pair of 2 interchangeable right-hand slides. UL recognized. To determine overall extended length of slide, *see How-to-Order information on this page.* **Sold in packages of 2.**

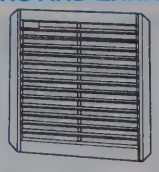
FILTER FANS AND EXHAUST FANS

CE



Filter fans provide protection against overheating of electrical/electronic components. Exhaust filters can be used with a fan or alone for passive ventilation. A screwless "click and fit" system reduces installation time significantly. A black fire-retardant plastic grille enhances the appearance of the enclosure. Fans are 115V/60Hz. CE compliant.

INTAKE FAN INCLUDING FILTERS

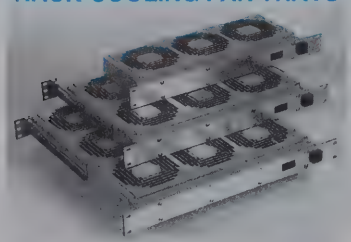
RACK-COOLING FAN TRAYS

NEW



Type KTS fan trays deliver cooling air to troublesome hot spots by localizing fan placement in the rack. All models available include 3 fans per row and steel housing. Feature long life ball-bearing motors rated at up to 105 cfm per fan, low sound level, and removable rear support brackets (on 2- and 3-row models). 115VAC operation. Use only a single panel space (1.75"). Units mount in standard 19" racks and are 16.13" wide.

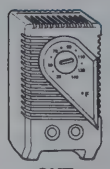
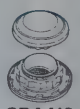
HEATERS, THERMOSTATS, AND BREATHER KITS

cULus CE

SHGL



SKT



SDA412

Type SHP heaters protect against low temperatures, condensation and corrosion in electrical/electronic enclosures by maintaining a stable temperature environment. Heaters are 115V/60Hz. **Type SHGL** heater fans are similar to **type SHP** heaters but have an axial fan for forced air circulation. **Type SKT** thermostats control and monitor air temperature. Type numbers with **suffix NC** (Normally Closed) for the control of heaters and heater fans. Type numbers with **suffix NO** (Normally Open) for the control of cooling units such as filter fans. Both are 2.4H x 1.3W x 1.4"D. **Type SDA412** breather kits (pressure compensation plugs) provide for controlled pressure compensation due to temperature variations (e.g., night/day operations) and protect against dust and humidity. Two plugs per cabinet in opposite locations are recommended. 2.16" diameter x 1.2" height. IP45 protection. CE complaint.

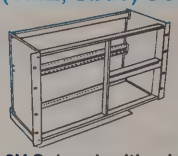
SUBRACKS

EUROCARD (VME, Sbus) SUBRACK KITS



CCK220-6U Subrack with added CG1-220 Card Guide

Subracks constructed of aluminum designed in accordance with DIN 41914 specifications. **CG1 series** card guides *ordered separately on this page.* Card guide mounting holes are positioned at each HP on T-struts. All side panels deeper than 160mm include mounting holes for positioning front extrusions at 60mm increments. 84 HP adapter strip allows mixing backplanes and DIN connectors. Designed for a maximum of 21 slots. Kits and subassemblies can be custom configured to your specifications. Accessories available are: DIN connectors, dress panels, cage handles and decorative enclosures. For assembled versions, substitute "A" for the "K" in Mfr. Type No. Easy to assemble, hardware included. *Order prototyping boards and extender cards separately; contact your local Newark sales office.*

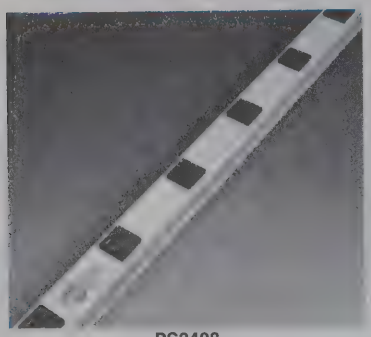
NEW CABINET RACKS AND POWER STRIPS



PS2408

POWER STRIPS

New power strips provide convenient multiple AC outlets wherever they're needed. Ideal for mounting inside rack enclosures, but can also be mounted on walls and workbenches. Hardwired models are ideal for applications that require permanent installation. Sturdy metal housing stands up to demanding network, lab or factory environments. Do not provide surge or line noise protection. UL listed.

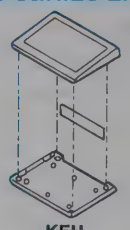
KE AND KEU SERIES ENCLOSURES



KEU

KEU series (keyboard/utility) enclosures are suited to desktop and benchtop applications. Sloped-top keyboard enclosures consist of a top and a bottom cover, aluminum keyboard panel and rear aluminum I/O panel. **"LP"** in type number indicates units have a molded-in recessed keyboard panel and matching color I/O panel. Applications include test equipment, medical and scientific devices, control panels, and timing devices. Colors: black (**suffixes BLACK**, **BK**, **000** in type number) and PC bone (**suffixes PC BONE**, **BO**, **039**).

HIGH-IMPACT (FRABS) PLASTIC HAND-HELD CASES

Molded in flame-retardant, high-impact ABS (FRABS) plastic, meets UL94V-0. Includes integral brass inserts and machine screws (M3 head) providing extra strength for repeated assembly and disassembly. Recessed top panel is ideal for membrane display; lap joint construction provides protection against dust and liquid. Extra-deep top and ultra-shallow base designed to enhance aesthetics and improve flexibility as a "hand-held" instrument. Twelve PCB bosses (six in both top and bottom) and vertical mounting slots (used with *optional* battery compartment dividers) are molded in. *Order battery dividers and belt clips separately; contact your local Newark sales office for details.*

1599 SERIES BATTERY ENCLOSURES

1599 Series enclosures feature battery door. Molded-in PCB card standoffs and vertical card guides. Styled for use as a hand-held instrument enclosure. 2-piece, lap joint construction provides protection against dust accumulation and splashing water. Recessed top panel for membrane display or pad. 2 keyhole knockouts facilitate wall mounting. Includes 4 machine screws. Meet IEC enclosure IP54 classification. *Order enclosure battery holder kits separately on this page.*

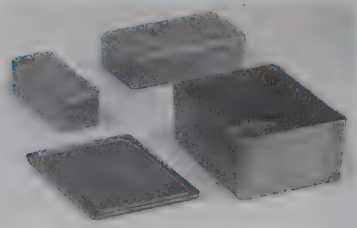
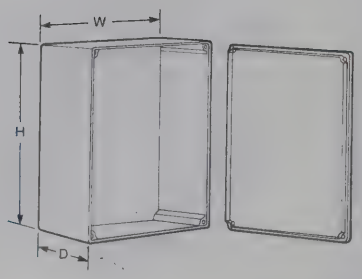
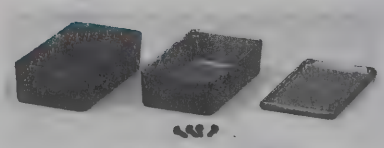
DIECAST ALUMINUM ENCLOSURES

DIE-CAST ALUMINUM BOXES



Natural Finish





Black Painted Finish

Aluminum alloy boxes with countersunk lid and tumbled surface have RF shielding capabilities, making them ideal for RF connectors. Type numbers with **suffixes D** and **E** have 2 center posts to provide an RF seal. Aluminum alloy allows for easy drilling and punching with the durability of metal. All units include four #6-32 Phillips screws. Select natural or black finish.

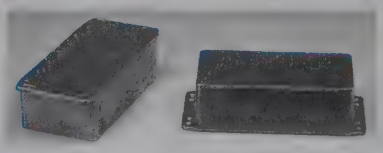
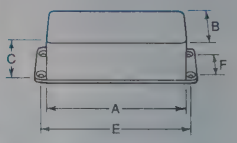
FLANGED LID-DIE-CAST ALUMINUM ENCLOSURES

NEW





Type 1590 flanged lid die-cast enclosures allow for easy mounting to walls or shelves. These enclosures share the same body and features as the regular **type 1590** enclosures except the lid is extended and four countersunk holes are cast into the flanges. The flanged lid also allows for added security as the lid/enclosure screws are hidden against the wall or shelf.

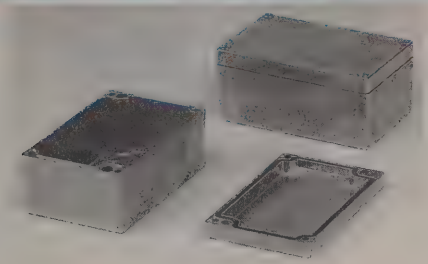
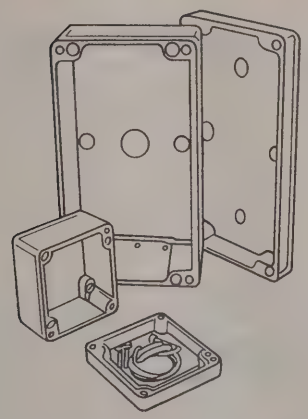
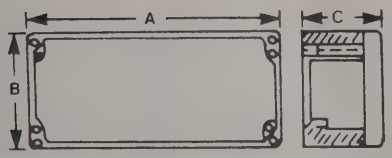
METAL ENCLOSURES

WATERTIGHT DIECAST ALUMINUM ENCLOSURES







Type 1590Z watertight aluminum diecast enclosures are designed to meet IP65 (dust and hose proof). These enclosures are perfect for housing sensitive electrical, pneumatic, hydraulic and electronic assemblies. They feature natural finish, a recessed neoprene gasket and captive, recessed stainless steel lid screws.

NEW

ALUMINUM PC BOARD INSTRUMENT CASES

Type 1402 instrument enclosures are perfect for horizontal PC card mounting by sliding boards into side aluminum extrusions. Top and bottom half are fabricated from heavy 12-gauge aluminum, with an off-white baked enamel finish. Front and rear panels are easy to machine natural aluminum (paper-coated on one side). All hardware and 4 self-adhesive rubber feet are included.

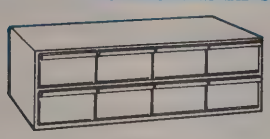
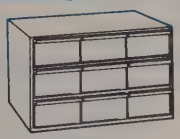
STORAGE CABINETS AND BINS

STACKABLE CABINETS



2376



2377

Modular storage cabinets are manufactured of prime cold-rolled steel and finished in an acid- and rust-resistant baked enamel. These durable storage units are shipped fully assembled and can be easily stacked and secured using pre-drilled mounting holes. Drawer cabinets feature full-width handle and are slotted on one-inch centers. Drawers have runners for smooth, easy travel and cannot be pulled out accidentally. 2 high-impact plastic dividers, with special snap-in features to hold them in place, are provided with each drawer. Made in the U.S.A.

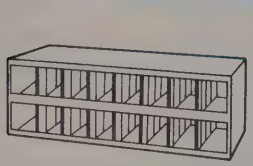
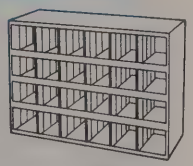
12″DEEP STACKABLE BINS



2372



2373

Designed as heavy-duty units for storing a wide variety of small parts; extremely sturdy and are welded on specially designed machines. They are produced of prime cold-rolled steel and will not warp, twist, or sag. Each shelf has a fully hemmed 1⅛″ turn on the front providing space to hold labels for content identification. Dividers are hemmed in a teardrop design to avoid sharp edges. Vertical ribs provide added strength. Gray baked enamel. Made in the U.S.A.

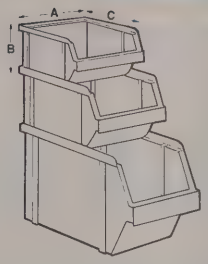
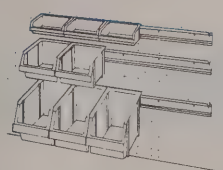
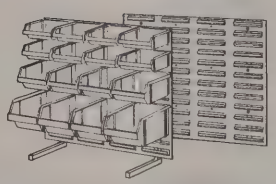
STORAGE BIN SYSTEMS



Storage Bins



Wall Rails



Desk Stand & Wall Panel

RotoRack

Create your own storage system using heavy-duty polypropylene bins. They may be stacked, mounted on steel wall rails and panels, mounted on a desk stand, or inserted into the circular RotoRack floor tower. Bins are available in blue or red and are durable, rustproof, and resist oil and common chemicals. **Type SBR1080** RotoRack provides a large amount of storage in a small amount of floor space and holds either 96 3″-deep bins, 72 3⅞″- deep bins, 64 5⅞″-deep bins, or a bin combination. RotoRack tower weight capacity is approximately 992 lbs. Made in the U.S.A.

AC TUBEAXIAL FANS

SPRITE® AC TUBEAXIAL FANS

- **3.14 Square x 1.645″ Deep (79.80 Sq. x 41.80)**
- **Low Noise Level**
- **Weight: 18 oz.**

Rugged die-cast zinc housing and plastic propeller. Feature impedance protection. Sintered bronze sleeve bearings except **types SU2B1, SU2B5,** and **SU3B5** which have stainless steel ball bearings. 1 phase, 50/60Hz. Connect by 12″ leads or 0.120″ solder terminals. Operating temperature range: -28°C to +70°C. UL recognized, CSA certified, VDE approved.

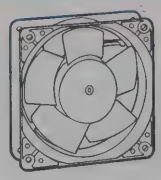
DC TUBEAXIAL FANS

4100 AND 4400 SERIES BRUSHLESS DC TUBEAXIAL FANS



4100

- **Locked Rotor Protection**

4100 series fans have metal housing and plastic impeller. Air intake over stuts. **Type 4484F** fan has plastic housing and impeller. Air exhaust over struts. All fans have an electronically commutated DC motor and connect by two 0.110 x 0.02″ (2.80 x 0.5) flat pin terminals. Feature ball bearing system, except **types 4105GX, 4182NGX**, and **4184NGX** which are sleeve bearing. UL recognized, CSA certified, CE compliant, VDE approved. *Order* **type LZ120** *24″ (609.6) plug and cord set separately on page 455.*

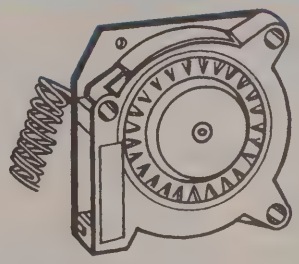
RL90 SERIES AC AND DC FLATPAK™ RADIAL BLOWERS



- **4.7H x 4.7W x 1.5″D (121 x 121 x 37)**
- **Shallow, Compact Design**
- **Flow Rate of 25 cfm***
- **Excellent for Spot Cooling**

Plastic housing on metal mounting plate and plastic impeller. **Type RL90-18/14N** features electronically commutated DC motor. **Types RL90-18/00** and **RL90-18/50** feature shaded-pole motor; 50/60Hz. Clockwise rotation viewed from rotor. Air enters through center of impeller and exhausts through port in housing. Mount in any position. Can be used for either pressurizing or evacuating. Connect by two 12.2″ (310) lead wires: 22 AWG for **type RL90-18/14N**; 18 AWG for **types RL90-18/00** and **RL90-18/50.** Power input: AC models, 20W; DC model, 5W. UL recognized, CSA certified, CE compliant, VDE approved.

AC AND DC CROSSFLOW BLOWERS

AC blowers feature galvanized steel housing and impeller, shaded-pole motor, and permanently lubricated, maintenance-free sleeve bearings. Connect by 0.250″ (6.3) spade terminals. UL recognized, CSA certified. Brushless DC blower features aluminum housing and impeller, ball bearing motor, reverse polarity, and locked rotor protection. Connect by two 11.8″ (300) leads. Mounting holes for easy installation. 60Hz. Operating temperature: 60°C max.

BACKWARD CURVED MOTORIZED IMPELLERS AND INLET RINGS

The narrow profile of backward curved motorized impellers provides excellent space utilization. Can be used in either evacuating or pressurizing applications and mounted horizontally or vertically. Does not require a scroll housing, although an inlet ring, *ordered separately below*, is recommended on air inflow. 115VAC, 50/60Hz. CE compliant.

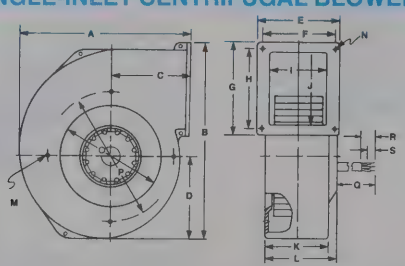
SINGLE-INLET CENTRIFUGAL BLOWERS



Single-inlet blowers are supplied with an external rotor motor located inside the forward curved impeller. Easy mounting is provided using the discharge flange or four tapped holes around the inlet. The housing is electrically grounded to the motor. Motor and impeller are an integral unit. Speed-controllable by voltage reduction. Operate at low voltages without overheating or reducing reliability. 115VAC, 50/60Hz. CE compliant.

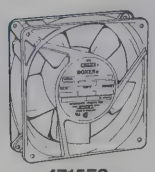
AC AND DC TUBEAXIAL FANS

4715FS SERIES BOXER™ AC TUBEAXIAL FANS



4715FS

Fan impeller made of UL94V-0 plastic. Venturi aluminum alloy with black-painted finish. Fans feature precision ball bearings for quiet, reliable operation. Operating temperature: –20°C to +70°C. Connect by 0.120″ (3.05) terminals. 50/60Hz. Dimensions: 4.7 square x 1.5″ deep (119.38 sq. x 38.10). Weight: 1 lb., 10 oz. UL recognized, CSA certified, VDE, and TUV approved.

MCFG-09

PLASTIC FAN FILTER ASSEMBLIES

Filter assembly for tubeaxial fans consists of fan guard, foam filter media, and media retainer. Ideal for the removal of dust and contaminating particles. Easy installation. Plastic snap-on media retainer for minimal air restriction. Foam filter media allows free passage of air with minimum air resistance and pressure drop. Reduces fan noise and is cleaned by vacuuming or washing. High-impact plastic fan guard decreases noise level and features ¼" max. ring spacing and countersunk mounting holes. Replacement foam filter media is available; *contact your local Newark sales office for details.*

Fan Filter Assembly

PLASTIC FAN GUARDS

Designed for use with standard 3.18" (80), 3.65" (92), and 4.76" (120) tubeaxial fans. Offer maximum airflow. Attaches to either side of fan without creating pure tones due to blade passing frequencies. Tooled with ring spacing that is in compliance with UL ¼" probe requirements. Constructed of high-impact plastic, rated UL94V-0.

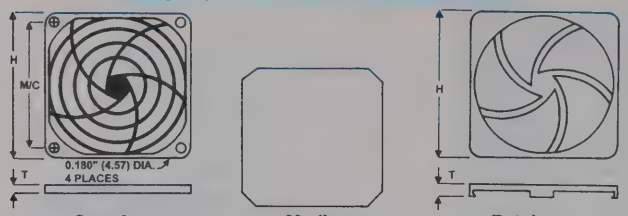
FAN ACCESSORIES

PLASTIC FAN FILTER ASSEMBLIES



Guard | Media | Retainer

Assemblies consist of guard, polyurethane foam filter media, and media retainer for tubeaxial fans. Guards are constructed of high-impact UL94V-0 material and decrease noise level due to their design. Polyurethane foam media has high surface area for filtration of dust particles and is designed to produce minimal pressure drop. Retainer constructed of UL94V-0 material, snaps on, and is designed for minimal air restriction. **Sold individually, except (*) sold in packages of 5.**

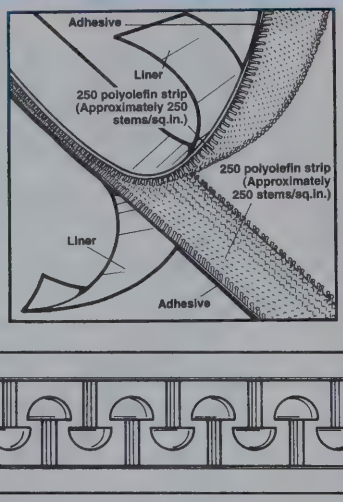
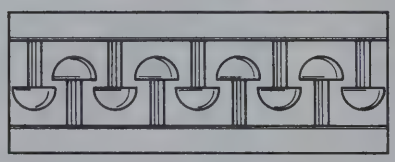
DUAL LOCK™ RECLOSABLE FASTENING SYSTEM





System features mushroom-shaped stems that interlock with one another with audible snap. Five times more holding power than hook and loop systems. Offer extreme design flexibility, faster product assembly and smoother, cleaner external appearance. **Type MP3541/3542** has general-purpose rubber adhesive that bonds to most surfaces. **Types MP3551/3552** and **MP3560** have premium acrylic pressure-sensitive very high bond (VHB) adhesive. Roll size: 1″ x 4.9 yards.

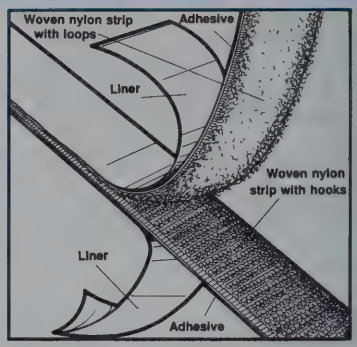
SCOTCHMATE™ HOOK AND LOOP FASTENING SYSTEM



Combination of hundreds of tiny, stiff hooks on one side of closure mesh with a surface of pliable loops on the other provides secure replacement for fasteners such as zippers, screws, bolts, snaps, hooks, and latches. Offers extreme design flexibility, faster product assembly, and smoother, cleaner external appearance. Plain-back types can be stapled, sewn or ultrasonically bonded in place. Pressure-sensitive types have general-purpose rubber adhesive that bonds to most surfaces. Roll size: 1″ x 4.9 yards.

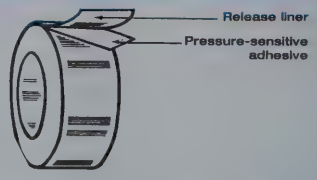
CONTACT YOUR LOCAL NEWARK SALES OFFICE FOR DETAILS.

VHB™* ACRYLIC FOAM TAPE

NEW UL



Used to replace mechanical fastening for permanent assembly in many assemblies. The foam carrier of VHB™ foam tapes helps provide higher strength, handling, convenience, cushioning, damping, and impact resistance. VHB™+ foam tapes bond a wider range of materials, are more conformable, and have lower application temperatures. Constructed of closed-cell acrylic, except **types 4932** and **4952** which are synthetic and **type 4943F**, which is conformable. **Types 4930, 4945, 4950, 4941**, and **4979F** are UL listed. Roll size: ¾″ x 36 yards, except **types 4905, 4930**, and **4932**, which are ¾″ x 72 yards. Additional sizes of ½″ and 1″ are also available; *contact your local Newark sales office for details.* **Sold in packages of 3.**

SCOTCH® SUPER 33+ VINYL PLASTIC ELECTRICAL TAPE

7-mil electrical tape stretches easily, sticks aggressively in temperatures ranging from 0°F to 220°F. Provides excellent resistance to flame, abrasion, moisture, alkalies, solvents, oil, ultraviolet rays, and many acids. Color: black. UL listed, CSA certified.

Stock No.	Type	Roll Size	1-9	10-24	25-49	50-99

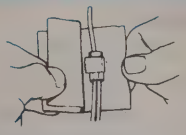
SCOTCH® 2210, 2200 VINYL MASTIC PADS AND 2228, 2229 RUBBER MASTIC ROLLS



Type 2210 roll (90 mil) and **2200** pre-cut pads (125 mil) are self-fusing; rubber-based insulating compounds laminated to all-weather grade vinyl (PVC) backing. Mold around difficult shapes and insulate, moisture-seal, and pad connections to 600V. **Types 2228** (65 mil) and **2229** (125 mil) conformable 1kV laminated tape for insulating, padding and sealing electrical splice connections. Ethylene propylene rubber bonded to tacky, temperature- stable mastic.

Stock No.	Type	Size	1-9	10-24	25-49	50-99

(9247) (de02915)

SCOTCH® 06147 AND 06149 ELECTRICAL MOISTURE SEALANT ROLL AND PAD

Roll and pre-cut pads apply quickly and easily to insulate, seal, and protect electrical/electronic connections. Self-fusing, rubber-based insulating mastic forms a moisture-tight seal around connections. Tough, elastic, vinyl backing provides additional protection against vibration (45-mil).

Stock No.	Type	Size	Std. Pkg.	1-9	10-24	25-49	50-99

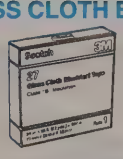
(9248) (de02916)

SCOTCH® 27 GLASS CLOTH ELECTRICAL TAPE



7-mil tape with thermosetting, pressure-sensitive adhesive performs at class B (130°C/266°F) temperatures. Provides heat-stable insulation around thermocouples and other hot-spot applications. UL recognized, CSA certified.

Stock No.	Type	Roll Size	1-9	10-24	25-49	50-99
36F905	27 (1/2"X66')	½″ x 66′	9.10	8.65	8.21	8.06

(9249) (de02917)

SCOTCH® 69 GLASS CLOTH ELECTRICAL TAPE

7.5-mil tape with thermosetting silicone adhesive performs at class H temperatures (180°C/356°F). Secure non-PSA insulation such as glass in high-temperature areas and splice wire rated 150°C, 180°C, SF and SFF.

Stock No.	Type	Roll Size	1-9	10-24	25-49	50-99

(9224) (de01910)

SCOTCH® SUPER 88 VINYL PLASTIC ELECTRICAL TAPE

Premium-quality, heavy-duty 8.5-mil tape is flame-retardant and weather-resistant. Excellent low-temperature characteristics. Extra thickness provides added electrical properties, quicker insulation buildup, and abrasion resistance. Meets ASTM D-3005-72, type II and MIL-I-24391. Color: black. Roll size: ¾″ (19.1) x 66′ (20.1m). UL listed, CSA certified. Other widths and lengths available; *contact your local Newark sales office for details.*

(9226) (de01936)

TEMFLEX™ 1700 VINYL PLASTIC ELECTRICAL TAPE

Economy-grade, 7-mil tape is UL listed and CSA certified at 80°C. Individually cellophane-wrapped. Roll size: ¾″ (19.1) x 60′ (18.29m).

Stock No.	Type	1-9	10-24	25-49	50-99
87F729	1700	1.59	1.52	1.43	1.41

(9223) (de01909)

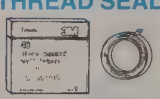
SCOTCH® 70 SILICONE RUBBER ELECTRICAL TAPE

Self-fusing, 12-mil, high-temperature tape composed of fully cured inorganic silicone rubber. Comes with easy-tear/easy-strip liner. Use as protective overwrap where class H (180°C/356°F) temperatures are encountered. Arc- and track-resistant. Color: blue-gray. Roll size: 1″ (25.4) x 30′ (9.14m).

Stock No.	Type	1-9	10-24	25-49	50-99
36F906	70	32.43	30.81	29.27	28.68

(9222) (de01908)

SCOTCH® THREAD SEALANT TAPE



Rolls on dry, molds into threads (bolts, fittings, pipe or screens) to form leak-proof seal. Works on most fluid and gas lines with no mess. Unaffected by oils, hydraulic fluid, freon. Never dries out; permanently lubricated joints never stick.

Stock No.	Type	Roll Size	1-9	10-24	25-49	50-99
87F727	48	½″ x 260′	3.59	3.41	3.23	3.17

(9250) (de02918)

SCOTCH® 2242 AND 130C SPLICING COMPOUND TAPE

Type 2242 is a self-bonding, 30-mil, EPR-based rubber tape for moisture sealing coaxial connections. Compound is linerless and combines consistent performance and high conformability. Shelf-stable and compatible with butyl rubber, ethylene propylene rubber, polyethylene, and cross-linked polyethylene insulations. Stretches up to 1000%. Use on cables with overload temperatures to 226°F (130°C). Provides tight, void-free, moisture-resistant insulation without loss of electrical characteristics. **Type 130C** is a highly conformable, linerless EPR rubber high-voltage insulating tape providing excellent thermal dissipation of splicing heat. Meets industry standards for flame retardance. Use for low- and high-voltage applications.

Stock No.	Type	Roll Size	1-9	10-24	25-49	50-99
87F730	2242	¾″ x 15′	4.06	3.85	3.67	3.60

(9225) (de01911)

TYPE 425 ALUMINUM FOIL TAPE

Dead-soft aluminum foil tape with highly reflective backing to provide excellent radiation for both heat and light. Can be used for general sealing, metal patching, moisture barrier, heat reflecting. Long aging, both indoors and outdoors. Roll size: 2″ x 60 yards.

Stock No.	Type	1-9	10-24	25-49	50-99
93F6945	425	32.05	30.45	28.92	28.35

(9354) (de53402)

TYPE 6969 CLOTH DUCT TAPE

Silver polyethylene-coated tape is for use in moisture proofing, duct sealing, protecting, and general-purpose applications. Roll size: 2″ x 60 yards.

Stock No.	Type	1-9	10-24	25-49	50-99
93F6922	6969	10.02	9.52	9.04	8.86

(9356) (de53404)

TYPE 471 PLASTIC FILM LANE MARKING TAPE

Vinyl plastic tape is highly conformable and has vivid colors that withstand heavy abrasion. Resistant to most common solvents (avoid ketones, chlorinated hydrocarbons, esters). Roll length: 36 yards. **Type M-77** lane marking applicator available; *contact your local Newark sales office.*

Stock No.	Type	Color	Width	1-9	10-24	25-49	50-99

(9355) (de53403)

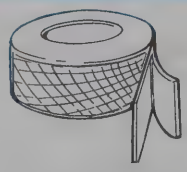
CITRUS BASE INDUSTRIAL CLEANER

Dissolves and flushes away dirt, grease, tar, most noncuring adhesive films, and similar substances. Contains no petroleum distillates and emulsifies when flushed with water. Contains no methylene chloride, 1,1,1-trichloroethane, or chlorofluorocarbons. VOC content does not comply with the California Air Resources Board Consumer Products Rule general-purpose cleaner limits. Consult other air quality regulations which may regulate product use.

00Z1152 Type CITRUS CLEANER. Aerosol Spray. 24-oz. **Each**..... **13.32**

(4570) (de53344)

ACRYLIC ADHESIVE FOAM TAPE



For general-purpose mounting and jointing. Features firm acrylic pressure sensitivity, high bond strength, good high temperature performance, solvent resistance and high shear holding power. **Types 4416** and **4408** are double-coated vinyl foam tape. The high degree of conformability makes these tapes well-suited to joining rough, mismatched surfaces; closed-cell foam design provides excellent water and air seals. **Types 4016** and **4008** are double-coated urethane foam tape. They are soft, conformable and have excellent low temperature properties. Roll size: 1″ x 36 yards.

(9350) (de53397)

SCOTCH® 1181, 1245, AND 1345 EMI/RFI FOIL SHIELDING TAPES

Copper foil electrical tapes shield against EMI/RFI radiation. Foil tapes are conductive through the adhesive and offer mechanical, electrical, and thermal values to meet shielding effectiveness/frequency requirements. **Type 1345** provides greatest shielding effectiveness and corrosion resistance.

VERTICAL MOUNT CARD GUIDES

NEW

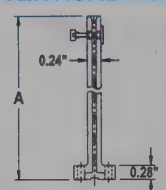

Fig. 1

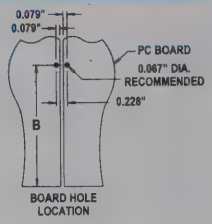

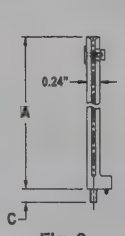

Fig. 2

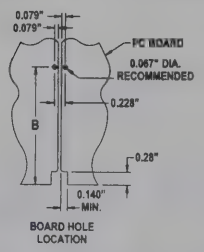

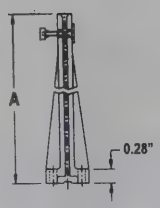

Fig. 3

Vertical mount card guides are for 0.062″ nominal PC board thickness. Two ribs in guide grooves reduce vibration and shifting. Double-channel design permits side-by-side mounting. Engage or disengage locking device by simply pressing with finger. Metal threaded inserts for secure screw mount installation. Constructed of glass-filled nylon 6.6. Color: gray. Hardware is included for chassis mounting. **Sold in packages of 100.**

TERMINALS, HOLDERS AND CLIPS

COLOR-KEYED PC TEST POINTS

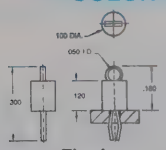

Fig. 1

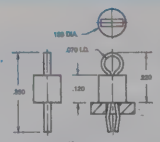

Fig. 2

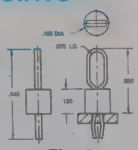

Fig. 3

Color-keyed PC test point terminations for high visibility and quick identification. Snap-fit mounting for positive retention for wave soldering. Wireform loop for safe, non-slip testing. Suitable for high-density packaging on 0.062″ and 0.093″ PC boards. Terminal material: Miniature (0.010 x 0.020″) is brass wire, tin plate; Compact (0.015 x 0.032″) is brass wire, tin plate; multipurpose (0.015 x 0.032″) is phos. brass wire, tin plate. Base material: Miniature is glass-filled nylon, meet UL94V-0; compact and multipurpose are valox, meet UL94V-0. **Sold in packages of 100.**

CONNECTORS AND BINDING POSTS

5-WAY® BINDING POSTS

Miniature Hex Nut Fluted Nut Double Assembly

Single- and double-assembly posts available in standard sizes rated 30A and miniature versions rated 15A, 1000V working. All fit panels 0.06-0.25″ (1.52-6.35) thick. Standard types fit 0.50″ (12.70) diameter panel hole; miniature posts fit 0.375″ (9.52) diameter. Captive thumbnuts with positive stop. Insulating parts are nylon. Current-carrying parts are gold-, nickel- or tin-plated brass. Some types meet MIL-P-20693A, Type IV specifications, see table below. Type number suffix indicates color: R = red, B = black, BL = blue, GN = green, WT = white, Y = yellow. Custom color ring and all-metal grounding styles also available; *call your local Newark sales office to order.*

SUPERCON® ELECTRICAL CONNECTORS

SUPERCON® connectors provide rapid and positive panelboard connections. They feature a functional plug design for handling ease and comfort. 25, 50 and 100-amp versions are rated 125-250 VAC/VDC current interrupting, 600V unenergized connect or disconnect use only; 250-amp types are rated 600V unenergized connect or disconnect use only. Wiring to the same plug can be soldered or solderless. Cable fastening screws permit a wide range of cable sizes. Type number suffix indicates color: **B** = black, **Y** = yellow, **R** = red, **BL** = blue, **GN** = green, **WT** = white. Wiring connections to threaded stud by wire wrap-around, lug or bus bar. 25, 50 and 100 ampere types are CSA certified.

Products at Your Door— When You Need Them, The Way You Need Them

Newark Electronics® now offers value-added services. So when your order arrives, you can put it to work without delay.

Products Customized to Your Specifications

- **Custom-Cut Cable –** We cut Belden Infinity® and Olflex® cable to the length you need.
- **Tape-on-Reel –** Looking for surface mount and thru-hole passive components in less-than-reel quantities? We have them.
- **Kitting –** Need parts grouped in kits? We build the kits you need.
- **Bagging and Tagging –** We can bag individual parts and label the bag to your specifications.
- **Assembly –** We perform basic assembly of compatible components.
- **Part Numbers and Special Information –** We can add your bonded inventory and special receiving information about the products in your order to your shipping and packing slip.
- **Bar-Coded Shipments –** Do you use bar coding to track items? We can add bar codes to your products.

We have it today, so you'll have it tomorrow.™

INTERBUILDING TRUNK CABLE

For wide area networks, multi-building interconnection, and broadcast/video applications such as CATV super trunk and satellite uplink/downlinks. Constructed of multi-conductor optical fibers enclosed in loose, gel-filled buffer tubes. Polyethylene outer jacket is extruded over the entire assembly core for protection. Attenuation: 3.5dB/1.0km. Bandwidth: 160/150Mhz/km. Crush resistance: 125 lb./inch (single jacket); 250 lb./inch (heavy duty double jacket.) Temperature range: –400°C to +800C. NOTE: Export license may be required to ship this product outside the USA. **Sold by the foot.**

INDOOR/OUTDOOR TIGHT BUFFER BREAKOUT CABLE

Tight buffer construction for flexibility and crush resistance. Each fiber is surrounded by a layer of aramid yarn and a protective inner jacket. UL listed as type OFNR per NEC Article 770-6(b). Feature flame-retardant PVC inner and outer jackets and temperature range of –20°C to +75°C. Values listed in table are 850/1300nm. 62.5/125/250 (Core/Clad/Coating). Dual window fiber. Attenuation: 3.5dB/1.0km. Bandwidth: 160/500Mhz/km. NOTE: Export license may be required to ship this product outside the USA. **Sold by the foot.**

LANLITE® PLENUM- AND RISER-RATED TRUNK CABLE

This LANLITE fiber optic cable contains buffered 62.5/125 micron fibers. The fibers are stranded with aramid yarn, which provides strength and impact resistance. The cable is UL listed for riser applications. Small diameter, light weight and flexibility provide easy installation and maintenance. Temp. range: –10°C to +50°C. Meets FDDI Optical Specifications and IBM 3044 Channel Extender Specifications. Attenuation: 3.4dB/1.0km. Bandwidth: 160/500Mhz/km. **Sold by the foot.**

FIBER-OPTIC CABLE

SIMPLEX AND DUPLEX CABLE

Fiber-optic cable comes in UL riser and plenum rated constructions. Operating temperature: –20°C to +70°C. 62.5µm fiber @ 850/1300nm. Attenuation: 3.5dB/1.0km. Bandwidth: 160MHz/500km. NOTE: An export license may be required to ship this product outside the USA. **Sold per foot in made-to-order spool sizes.**

RISER RATED TYPE OFNR

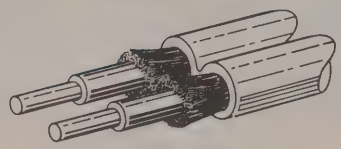
Simplex Cable



Duplex Cable

PREMISE DISTRIBUTION CABLE

Tight buffered fiber-optic cable comes in UL riser and plenum rated constructions for indoor applications. Operating temperature: –20°C to +80°C. 62.5/125µm fiber @ 850/1300nm. Attenuation: 3.5dB/1.0km. Bandwidth: 160MHz/500km. Each cable has 900mm buffered fibers, aramid yarn for strength, and a flame-retardant jacket. NOTE: An export license may be required to ship this product outside the USA. **Sold per foot in made-to-order spool sizes.**

Premise Distribution Cable

OUTDOOR INTERBUILDING CABLE

Loose tube, gel-filled fiber-optic cable is for outdoor, building-to-building installations. Single jacket, double duct cable provides excellent environmental protection. Operating temperature: –40°C to +80°C. 62.5µm fiber @ 850/1300nm. Attenuation: 3.5dB/1.0km. Bandwidth: 160MHz/500km. NOTE: An export license may be required to ship this product outside the USA. **Sold per foot in made-to-order spool sizes.**

Outdoor Interbuilding Cable

INDOOR/OUTDOOR CABLE

Loose tube, gel-filled indoor/outdoor fiber-optic cable is used for cable runs that come into buildings beyond the 50′ NEC limitations. Comes in UL riser and plenum rated constructions and provides excellent environmental protection. Operating temperature: –40°C to +80°C. Attenuation: 3.5dB/1.0km. Bandwidth: 160MHz/500km. NOTE: An export license may be required to ship this product outside the USA. **Sold per foot in made-to-order spool sizes.**

HFBR-0501 SERIES VERSATILE LINK PACKAGE

The most cost effective family of fiber-optics from Hewlett-Packard. The family consists of discrete transmitters and receivers based on 660nm technology. Optimized for 1mm plastic fiber and 200µm HCS™ fiber. Applications include industrial control, factory floor LANs, gaming and medical equipment.

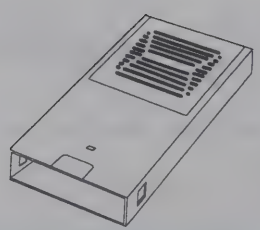
MULTIMODE HFBR-511x SERIES INDUSTRY-STANDARD FDDI MIC TRANSCEIVERS



LAN standards: FDDI, fast ethernet. High-performance modules for 100Mbps/125MBd optical data applications, in three package styles. Features include full-compliance with the FDDI (Fiber Distributed Data Interface) PMD (Physical Media Dependent) standard, an MIC receptacle, and a field-changeable key. Applications include concentrators, bridges, routers, and FDDI network interface cards.

TYPE HFBR-5903/5905 LED TRANSCEIVERS

Type HFBR-5903/5905 are Hewlett-Packard's next generation of LED-based transceivers, the small form factor MT-RJ, to service the Fast Ethernet and ATM OC-3 markets. The transceivers use the established MT ferrule design with RJ-45 style connector. The small form factor MT-RJ is half the size of a standard SC-duplex module. This allows system designers to double the port density on a typical system blade, which significantly reduces the cost-per-port to customers. Transceivers are in an industry-standard multi-source footprint with a common electrical-optical pinout functionality, operating at 3.3V.

Type	Description	Standard	Data Rate (Mb/s)	Wave-length (nm)	Distance @ 25°C (km)	1-4	5-9
HFBR-5903	2x5 MMF	Fast Ethernet	125	1300	2	84.08	80.71
HFBR-5905	2x5 MMF	ATM	155	1300	2	84.08	80.71

(29484) (ne29484)

HFBR/HFCT-53D5 SERIES GIGABIT ETHERNET TRANSCEIVERS

HFBR/HFCT-53D5 series transceivers are designed for multimode and singlemode Gigabit Ethernet applications. Compliant with finalized IEEE 802.3z Gigabit Ethernet standard. Available in mezzanine height 1x9 pinout package with duplex SC connector. Multimode uses Hewlett-Packard's VCSEL (Vertical Cavity Surface Emitting Laser) technology. Singlemode uses an FP (Fabry-Perot) laser. Compatible with wavesolder and aqueous wash processes.

Type	Description	Data Rate (Gb/s)	Wave-length (nm)	Distance @ 25°C (m)	Fiber Type	1-2	3-4

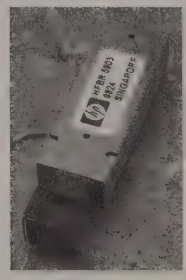
TYPE HDMP-1636A/-1646A SerDes TRANSCEIVER ICs



Type HDMP-1636A/-1646A transceivers are a single silicon bipolar integrated circuit, packaged in a plastic QFP. They are a low-power physical layer solution for 1.25Gbps Gigabit Ethernet or proprietary link interfaces. They also provide complete serialize/deserialize (SerDes) for copper transmission, incorporating both the Gigabit Ethernet transmit and receive functions in a single device. Compatible with the IEEE 802.3z specification.

Type	Description	Data Rate (Gb/s)	Parallel I/Os	Power Supply	Power Consumption	1-4	5-9

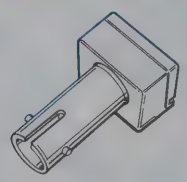
FIBER OPTIC RECEIVER MODULES



- **Differential Data Outputs (ECL Compatible)**
- **Signal Quality Detect and Packet Detect Outputs (Open Collector)**
- **Adjustable Signal Quality Detect Level**
- **ST® Interface**
- **500Ω Output Drive Capability**
- **Monolithic Design — Less Board Space, High Reliability**

A PIN photodiode plus pre-amp is mounted in the fiber optic connector for maximum shielding, and provides amplification and current-to-voltage conversion.

NEWARK HAS WHAT YOU NEED.
WITH SO MUCH IN STOCK, YOU HAVE THE COMPONENTS YOU NEED AT YOUR FINGERTIPS.

LIGHTCRIMP® EPOXYLESS ST STYLE CONNECTORS

Simple crimp-on ST style connectors terminate fiber cables without epoxy. Keyed, bayonet coupling for secure mating. Choice of stainless steel or ceramic ferrule. All feature 125µm fiber size. Stainless steel and ceramic style feature connector, aluminum body, zinc coupling nut and long black strain relief boot. Buffer diameter: 900/1000. Termination kits, *ordered separately below*, include tools and materials to prepare and terminate LIGHTCRIMP® XTC ST style connectors. **Types 502835-1** and **503568-1** PRO-CRIMPER™ II hand tools and ST style die set, *ordered separately below.*

ST STYLE CONNECTORS

Epoxy type ST style connectors in choice of stainless steel, ceramic or polymer ferrule. Single crimp termination for cables up to 3mm diameter. Keyed bayonet allows quick connect/disconnect. Ceramic and polymer with connector have polymer body and coupling nut with short black boot. Stainless steel with connector has aluminum body, die cast coupling nut and long black boot. Ceramic with connector has nickel brass body, die cast coupling nut and bend limiting boot. All feature 125µm fiber size, except **type 502579-2**, which is 126µm. **Type 503746-1** termination kit, *ordered separately below*, includes all tools and materials to prepare and terminate epoxy type ST style connectors. Also available **type 58433-4** PRO-CRIMPER™ II hand tool and ST style die set, *ordered separately below.*

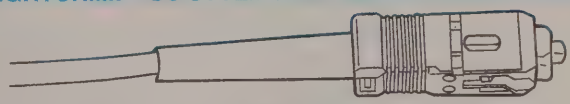
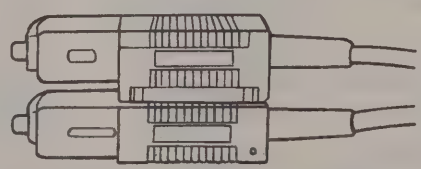
LIGHTCRIMP® SC STYLE EPOXYLESS CONNECTORS



Simplex



Duplex

Simple crimp-on SC style multimode connectors require no epoxy during assembly and termination. Accommodate buffer sizes of 250µm (coated fiber) and 900µm (tight buffer) and are used with 125µm glass fiber cable. Fully compatible with all SC style multimode connectors. Feature ceramic ferrule, beige thermoplastic plug body, connector housing, and strain relief boot. Choice of simplex or duplex design. Termination/tool kits, *ordered separately on this page*, include all tools and materials required to prepare and terminate LIGHTCRIMP® epoxyless SC style connectors. Also available **type 503699-1** PRO-CRIMPER™ II hand tool and LIGHTCRIMP® SC style die set, *ordered separately below.*

FSD CONNECTOR PLUGS AND RECEPTACLES

503347-5

Type 503347-5 FSD (fixed shroud duplex) connector plug for light-duty 125µm multimode fiber cable. Features polymer ferrule, PBT molding compound housing and nut, polypropylene strain relief, and thermoplastic rubber dust cap with A, B, and M keys. Meets FDD IPMD-ANSI X3.166 specifications. **Type 503345-2** FDDI-compatible FSD-MC (multi-exit connector) singlemode plug is a lower profile version of the **type 503347-5** FSD plug. It allows tighter spacing and zipcord type cable can exit at 180°.

Stock No.	Type	Connector Style	1-2	3-4	5-9	10-24

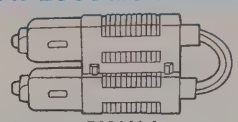
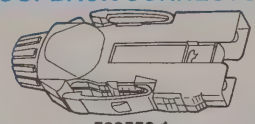
LOW-LOSS MULTIMODE LOOPBACK CONNECTORS



503141-1



502556-1

Used for equipment testing, **type 503141-1** SC style loopback connector features 0.5" ferrule centerline with maximum insertion loss of 0.6 dB. **Type 502556-1** FSD loopback connector has ceramic ferrule and glass fiber to provide a maximum loss of 1.5 dB. Used as a test unit in fiber-to-fiber applications, such as patch panel, wall outlet or wiring closet.

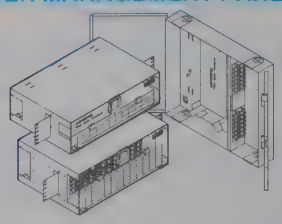
NEWARK ELECTRONICS® IS AN ISO 9002 COMPANY.

FIBER MANAGEMENT PANELS



The **948 series** fiber management panels provide an excellent location for patching, splicing, and distributing fiber optic cables. Panels are often used in equipment rooms, headends, cross-connects and building entrances. They are available as components or fully loaded. Fully loaded distribution panels consist of adapter 6-packs, pigtails, and splice trays. Both wall and rack mount versions are available below. Other panel configurations are also available; *contact your local Newark sales office for details.*

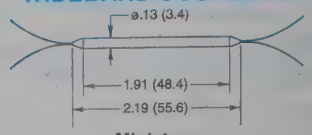
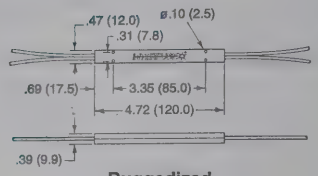
WIDEBAND COUPLERS



Miniature



Ruggedized

Wideband couplers precisely distribute light signals between single-mode fibers with low insertion loss and stable environmental performance in miniature and ruggedized packages. Couplers exhibit constant coupling ratios over a wide range of operating wavelengths. Coupling ratio: 50% (3dB). Port configuration: 1 x 2.

Stock No.	Type	Package Option	Insertion Loss (dB)	1-2	3-4

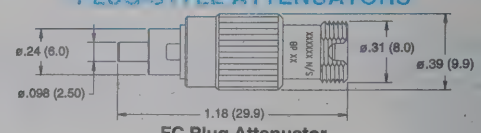
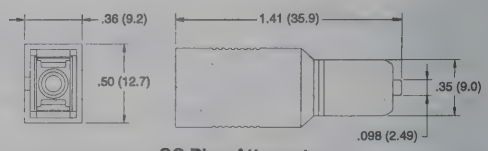
PLUG-STYLE ATTENUATORS



FC Plug Attenuator



SC Plug Attenuator

FC and SC plug attenuators are mechanically intermateable with NTT type PC and SC products, which conform to JIS C 5970 and JIS C 5973 respectively. Compact design fits easily into existing patch panels. Back reflection: –48dB typical. Also available in D4 configuration; *contact your local Newark sales office.*

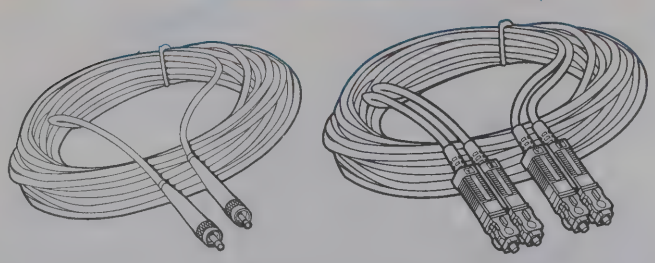
FIBER-OPTIC SIMPLEX AND DUPLEX PATCH CORD CABLE ASSEMBLIES



SMA connectors terminated on each end of a multimode, simplex fiber or duplex fiber cable with low-insertion loss connector. Mechanically and optically intermateable with other SMA-type products. PVC jacket, 3mm outer diameter, kevlar-strengthened, 0.9mm tight buffer. Single-mode and multimode duplex SC cable assemblies' design incorporates 2 conventional SC bodies into a dual coupling sleeve or shell. Ideal for point-to-point, computer-to-computer, or workstation-to-workstation applications. Durability: <20dB change after 500 mating cycles. Operating temperature: –40°C to +85°C.

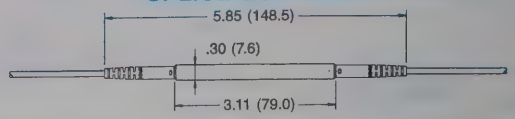
SPLICE GUARD KIT



927 series splice guards are an in-line protection device for fusion splices on cabled fiber. The splice protection sleeve requires no heating or messy adhesives to be installed. Can be installed anywhere fiber-optic cables are used. When assembled, splice guards will give maximum support from axial pull along with side pull protection, meeting or exceeding industry standards. Ideal for minimizing bulky and awkward storage devices. Splice guard kit includes splice guard protection halves, high-performance strain relief boots, crimp ferrules and splice protector (no heat). *Order closing tool separately below.*

CURING OVENS

927 series curing ovens offer controlled curing at factory-set low temperatures, reducing connector loss and eliminating fiber cracking. These ovens allow for hands-free operation to enable the installer to prepare additional connectors for curing. Field termination time is reduced. Each unit is encased in UL94V-0 rated noncombustible Valox that can be handled safely at any time during the curing process.

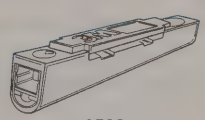
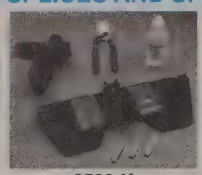
FIBRLOK™ II OPTICAL FIBER SPLICES AND SPLICE KITS



2529



2529-K

Type 2529 universal splice aligns centers of 2 fibers - either single-mode or multimode. Splices pigtail fibers or building cable fibers that have 125µm glass O.D., 900µm tight buffer coating. **Splices are sold in packages of 6. Type 2529-K** is designed for splicing any combination of 250 to 900µm coated fibers. Fully compatible with original Fibrlok™ optical fiber splices, splice trays and organizers; kits use the same "strip, clean, cleave and splice" procedure. May be used with either single-mode or multimode fibers with a glass cladding diameter of 125µm.

Stock No.	Type	Description	1-9

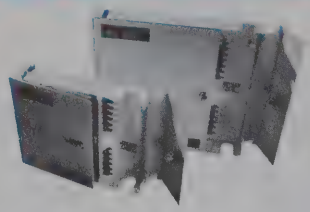
FIBER-OPTIC PRODUCTS

M.O.R.E.™ WALL MOUNT DISTRIBUTION ENCLOSURES



Enclosures for fiber-optic patching and splicing offer 6-port build-out style adapter panels with optional splice capability for fiber-optic networks. Units are equipped with grooming aids for cable management and mounting hardware. The enclosures are available in 12- and 24-port configurations and can be stacked to allow the distribution of one fiber cable among various cabinets. *Order SixPax™ adapter panel modules separately on this page and splice trays separately on this page.*

SIXPAX™ 86800 SERIES ADAPTER PANEL MODULES

Ideal for modular installation into any style of cable management system that supports 6- or 12- port panel design for cable organization. Each SixPax™ panel accommodates 6 to 12 ports (12-pack for SCs only) for patching fiber-optic cable. Panels come with labeling kits to accommodate port numbering schematic and incorporate a plunger-style mounting mechanism (no screws are necessary) for easy installation. Each panel measures 5.1″H by 1.14″W and is constructed of a precision-molded polymer. **Type 86804-1650** has a polymer body; **type 86804-1600** has a metal body. *Order enclosures for panel modules separately on this page.*

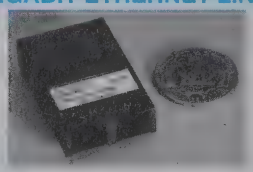
GIGABIT ETHERNET LINK



Link is a compact optical transceiver capable of serial gigabit transmission over inexpensive multimode fiber for distances up to 550m. Transmits data at speeds of 100Mbps to 1.25Gbps, enabling use in Gigabit Ethernet, Fibre Channel, ATM and proprietary data interconnect systems. Features an industry-standard 1x9 pin configuration and dual SC connectors. Complies with all Gigabit Ethernet (IEEE 802.3z) standards. Also features single +5V power supply and is ECL/PECL compatible.

Stock No.	Type	Description	1-2

LC HIGH-DENSITY CONNECTORS

High-density LC connector is used for fiber-optic applications. Provides enhanced transmission characteristics over other fiber-optic connectors. Doubles the density of current SC connectors and reduces the space required on panels, outlets, and closets by 50% throughout the network. The LC uses an RJ-45-style housing. The connector is keyed for optical alignment that delivers repeatable performance and reliability and incorporates a ceramic ferrule with an outer diameter of 1.25mm. LC duplex multimode adapter is also available; *order separately below.*

(28336) (ne28336)

XPRESS ST® TERMINATION KITS

Provide low-cost and reliable ST terminations for fiber-optic LANs. Combine the telecommunication industry proven zirconia ceramic ferrule and connector technologies with a one-part adhesive. Requiring no measuring, mixing, or applicator, the adhesive is applied directly to the fiber. It provides an almost instantaneous bond between the fiber and ceramic ferrule when contact is made with the accelerant in the ferrule. The accelerant is delivered into the connector by simply dipping the ferrule into the solution. Termination kit includes 12 connectors (boots for 3mm and 900µm cable), 1 tube of adhesive, accelerant, stripping template, and abbreviated termination procedures. *Order termination tool kit separately below.*

SC DUPLEX CONNECTORS AND ADAPTERS

SC duplex connector system maintains fiber-optic cabling polarity in telecommunication and datacom networks. Combines 2 widely accepted, NTT-SC standard connectors in a common duplex housing. The housing provides smooth insertion and removal of the connector pairs while maintaining polarity of the cable. Features easy-to-assemble 1-piece connector body and reliable Bellcore 326 connector design. Low insertion loss: <0.34dB typ. (multimode).

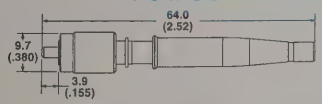
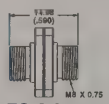
FC II CONNECTORS



FC II Connector



FC Adapter

Proprietary isolated ferrule design provides exceptional nonoptical disconnect. Precision screw machined materials maintain high level of repeatability and resistance to corrosion. Intermateable with all FC/PC-type connectors. Low insertion and high-return loss. Field- or factory-installable. Simplified termination procedure. Meet JIS mating specifications.

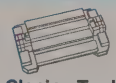
FUSION SPLICE PROTECTION SLEEVES AND ACCESSORIES



Closing Tool

FSSC-1-G

FSSC-12-G

High-quality proven protection sleeve used immediately after the fusion process protects your system's highest fragility point during handling, storage, and life-cycle environmental constraints. Standard and ribbon sleeves have been tested to Bellcore GR 1380. All other sleeves are proportionately downsized using exact materials, formulations, equipment and processes.

CABLE ASSEMBLIES

Feature low back reflections (for single mode assemblies), superior optical performance, floating ferrules on the single mode and multimode SC and FC connectors. Environmentally stable. Conform to Bellcore requirements GR-000326-CORE, Issue II. Offer a choice of single mode SC and FC field installable connectors that can be used for 900mm buffered fiber up to 3.0mm cable. Multimode connector choices include ST® and SC connectors. Applications include: CATV, high-speed digital systems, data transport, telephony and communications.

SINGLE-MODE SPLITTERS

Single-mode single wavelength and Wideband™ Splitters offer low excess loss, stable splitting ratios, and superb environmental characters. Uniformity for 50% single wavelength splitter is 0.6 dB. 50% dual wavelength splitter achieves 0.8dB uniformity. Splitters are bidirectional, combing light from fibers into one, or splitting light from one fiber into two. Operating temperature: 40°C to +85°C. SM Mode. Over 10 years proven field reliability. Typical change in insertion loss over the operating temperature range (dB) <±0.1. Conforms to Bellcore TR-NWT-1209.

FIBER-OPTIC PANELS

CPS series fiber panels offer user-fiendly solutions for smaller fiber count installations requiring splicing termination of connectors onto outside plant or intra-building cables at customer premise or central office locations. Both types are wall and rack mountable and feature a unique hinge arrangement that provides a wide door swing radius to maximize available work space.

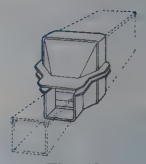

Fig. 12

Designed to route and protect fiber-optic cable while guarding against accidental cuts, kinks, and associated signal loss. Complete lay-in capability allows ease of access to cable and jumpers. PVC/acrylic alloy connectors, rated UL94V-0, provide a 2″ bend radius which provides effective signal transmission while utilizing minimum space. Connectors contain an inside flange for cable retention during cover removals. 6′ protective channels with quick-release Velcro® covers are constructed of rigid, nonflammable polyvinyl chloride, rated UL94V-0; UL recognized, CSA certified. Color: gray. **Duct and cover are sold in packages of 24′ in four 6′ lengths.** All other components are sold individually.

FIBER-OPTIC CONNECTOR CLEANING DISPENSER SYSTEM

Hand-held, fiber-optic connector cleaning system for the removal of dust, dirt, oil, and grease from fiber and ferrule end faces. Non-woven, lint-free film is advanced into the dispenser window, where three figure-eight strokes of the connector to the film cleans the connector surface. Replaces gasses, alcohol swabs, napkins, and wipes for cleaning. The film is kept clean and dry until dispensed into an open window, which holds the film in place during the cleaning process. Used material is dispensed out the back of the unit, where it can then be torn off at the perforation, and thrown away. Each dispenser contains 10 feet of 1.5″ strips of "Ultra-White" film. Each 1.5″ strip can clean up to six connectors, allowing up to 400 connectors to be cleaned per dispenser.

Stock No.	Type	Description	Each
92N4770	3365	FiberClean Dispenser System	22.26

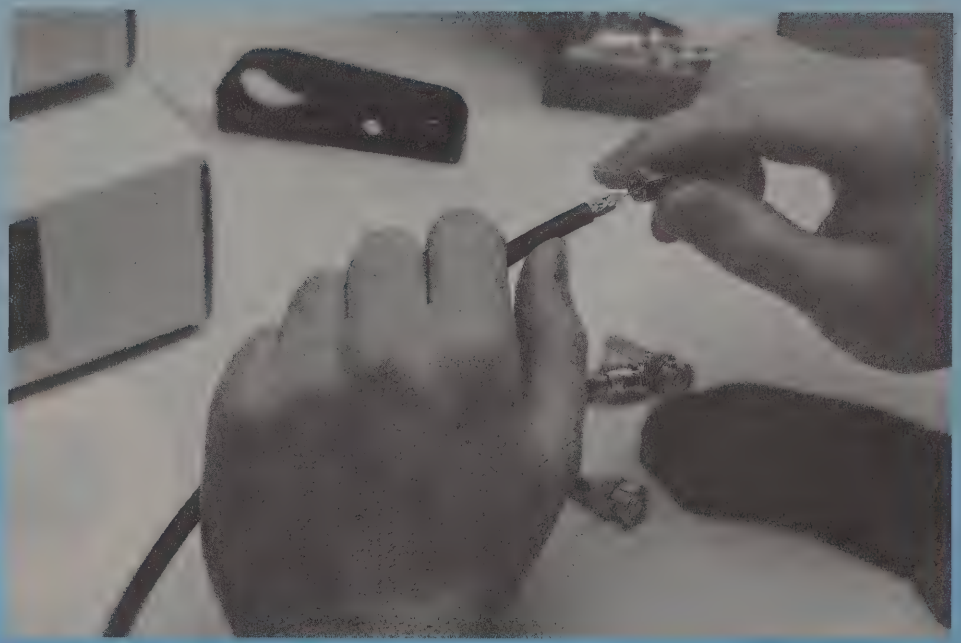
Products at Your Door— When You Need Them, The Way You Need Them



Newark Electronics® now offers value-added services. So when your order arrives, you can put it to work without delay.

Products Customized to Your Specifications

- **Custom-Cut Cable** – We cut Belden Infinity® and Olflex® cable to the length you need.
- **Tape-on-Reel** – Looking for surface mount and thru-hole passive components in less-than-reel quantities? We have them.
- **Kitting** – Need parts grouped in kits? We build the kits you need.
- **Bagging and Tagging** – We can bag individual parts and label the bag to your specifications.
- **Assembly** – We perform basic assembly of compatible components.
- **Part Numbers and Special Information** – We can add your bonded inventory and special receiving information about the products in your order to your shipping and packing slip.
- **Bar-Coded Shipments** – Do you use bar coding to track items? We can add bar codes to your products.

We have it today, so you'll have it tomorrow.™

NEWARK CD-ROM 3.0 with Newark CONNECT

NEWARK ELECTRONICS

WE HAVE IT TODAY, SO YOU'LL HAVE IT TOMORROW.™

Newark
CD-ROM 3.0

- Browse our inventory of over 150,000 components
- Access our Web site for up to date stock levels
- Search by stock number, part number, key-word, and more

Newark CONNECT®: stockroom and order management software

- Tracks stock automatically
- Choose minimum and maximum inventory levels
- Generates replenishing orders automatically
- Reduces costs and cycle time
- Gets your order shipped within 24 hours
- Makes record-keeping easy

From PC Board accessories to power switches, Newark stocks more components and represents more manufacturers than any other catalog distributor.

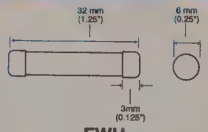
BUSS® FWH SERIES HIGH-SPEED SEMICONDUCTOR FUSES



FWH

FWH series ¼ x 1¼" ceramic semiconductor fuses. Ferrule style, 6x32mm. 500V, 0.25A-30A. High-speed fuses protect SCRs, diodes, and other semiconductor devices.

Stock No.	Type	Amps	1-49	50-99	100-249	250-499

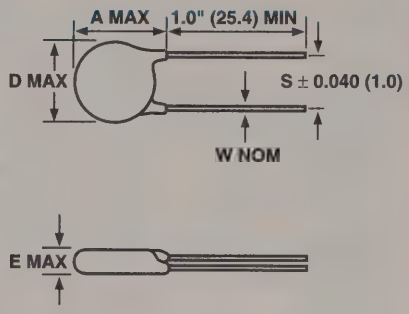
METAL OXIDE VARISTORS



Through-hole mount metal oxide varistors feature a highly exponential variation on a current over a narrow range of applied voltage. Operating temperature: -40°C to +85°C. Storage temperature: -50°C to 125°C. Current/energy derating: -2.5%/C°. DC. Leakage current: 200 µA max. UL listed, CSA certified and VDE approved.

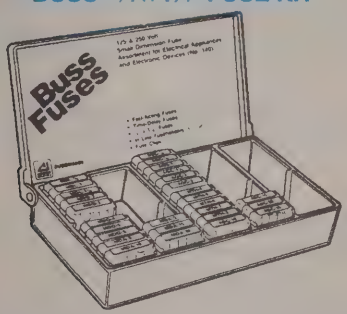
CHIP FUSE KIT

NEW

Chip fuse kit contains an assortment of Bussmann chip fuses. Includes the 1608FF package, and, 3216FF, 3216LV, and 3216CP packages. Ampere ratings: from 250mA to 4A. Voltage ratings range from 32 to 125 volts. Provides a convenient assortment which design engineers can use to test for the protection of electronic components.

48F3959 Type CHIPKIT1. **Each** **165.00**
(35775) (ne35775)

BUSS® ¼ x 1¼" FUSE KIT



140-fuse assortment includes ½A to 30A fuses, plus 2 fuse holders, fuseclips and 1 fuse puller. Rugged nylon case with positive closure. Ideal for factory or field-service use.

89F1893 Type 140. **Each** **154.07**
(2327) (de02143)

BUSS® 270-PIECE FUSE KIT

Diverse kit contains 59 different products including 270 fuses: ¼ x 1¼" and 5 x 20mm fuses in the ⅛ to 30A range; small dimension 125V and 250V fuses; fast-acting, time-delay and pigtail-lead fuses; 7 fuse holders and fuse clips. Clear-plastic case. Comes with complete application and cross-reference data.

87F2357 Type 270. **Each** **369.23**
(2331) (de02147)

BUSS® 5 x 20mm FUSE KIT

220-piece kit contains 5 x 20mm fuses in 630mA to 10A range, plus 2 fuse holders, 2 fuse blocks and 1 fuse puller. Tough, yellow case with positive closure. Ideal for factory or field-service use.

95F3864 Type 220. **Each** **265.73**
(2332) (de02148)

Electronic Terms and Measurements

Resistance
Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm – kΩ	1,000 or $1x10^3$ ohms
1 Megohm – MΩ	1,000,000 or $1x10^6$ ohms

Voltage
Electromotive force. Basic unit is the volt (V).

1 millivolt – mV	1/1,000 or $1x10^{-3}$ volt
1 microvolt – µV	1/1,000,000 or $1x10^{-6}$ volts

Current
Movement of electricity. Basic unit is the ampere (A).

1 milliampere – mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere – µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency
Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz – kHz	1,000 or $1x10^3$ hertz
1 Megahertz – MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz – GHz	1,000,000,000 or $1x10^9$ hertz

Time
Basic unit is the second (s).

1 millisecond – ms	1/1,000 or $1x10^{-3}$ second
1 microsecond – µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond – ns	1/1,000,000,000 or $1x10^{-9}$ second

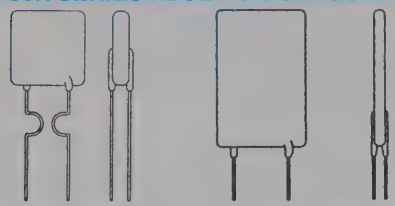
Littelfuse®

RESETTABLE FUSES

30R SERIES RESETTABLE FUSES



30R090-30R250 30R300-R900

30R series radial-leaded PTC resettable fuses. Voltage rating: 30V. Thermalset coating. Lead material: **type 30R090-250** tin-plated copper-clad steel; **type 30R300-900** tin-plated copper, 20 AWG (0.032″ dia.). Devices are marked with amperage rating, voltage rating and date code. Lead solderability meets MIL-STD-202, Method 208E.

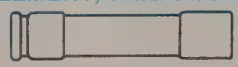
FLNR-ID AND FLSR-ID SERIES DUAL-ELEMENT, TIME-DELAY FUSES



- **Service Entrance Switches**
- **Switchboard Main and Feeder Switches**
- **Motor Control Center Mains and Motor Branch Circuits**
- **Individual Fused Combination Motor Controllers**
- **Distribution Panel Boards**
- **Industrial Control Panels**
- **Protection of Fully-Rated Panel Boards and Load Centers**
- **All General-Purpose Circuits**

FLNR-ID and **FLSR-ID series** indicator fuses provide visual blown fuse indication at a glance. The patented state-of-the-art solid-state design provides maximum reliability and superior performance characteristics in a true dual-element design. The use of indicator fuses reduces down-time, nuisance fuse opening, increases safety, and can save production time. **FLNR-ID series** voltage: 250VAC; 125VDC. **FLSR-ID series** voltage: 600VAC; 300VDC.

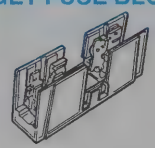
MIDGET FUSE BLOCKS



Compact, 600-volt fuse blocks for 13/32 x 1½" midget fuses. Locking blocks together permits any number of poles. Screw and box lug terminals rated 30A. QC terminals rated 20A. Dielectric strength: 1200V minimum. Clip/terminals: tin-plated copper alloy. Box lug: copper. UL 94V0 rated thermoplastic base. Types with **C** suffix: copper box lug terminals; **SQ** suffix: Screw/QC.

Fig. 4 Low-Profile Screwdriver Slot Knob

Shock-safe design eliminates the possibility of electrical shock, per IEC Standards 65 and 257. Universal fuse holder body accepts 3AG, 5 x 20mm, and 2AG fuse sizes depending on knob selected. Choice of three terminal styles: dual purpose 3⁄16″ solder/quick-connect, 3⁄16″ NEMA quick-connect, and ¼″ NEMA/DIN quick-connect. UL recognized, CSA certified, VDE approved and SEMKO approved. *Contact your local Newark sales office for drip-proof option available on screwdriver slot knob style, straightback terminal style and 2AG fuse holders.*

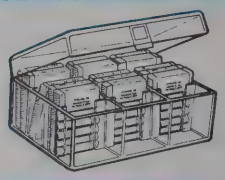
FUSE ASSORTMENT KITS



ELECTRONIC FUSE KIT

Ideal for schools, hospitals, plants, R&D labs and maintenance departments. Features 280 popular fuses in a wide assortment of 3AG (¼-8A), 2AG glass (½-3A), 5 x 20mm (½-6.3A), 3AB ceramic (10-30A), fast-acting and slo-blo fuses. Also includes 10 variations of fuse clips, fuse blocks, panel mount and in-line fuse holders. Comes with plastic storage case and cross reference information.

90F9123 Type 094376. **Each** **406.64**

ECONOMICAL FUSE KIT

Features 150 popular fuses in an assortment of 3AG (½-10A), 5 x 20mm (½-6.3A), and 3AB ceramic (10-20A), fast-acting and slo-blo fuses. Plus 5 variations of fuse holders, fuse clips and fuse blocks. Includes a rugged, clear plastic storage case.

90F9124 Type 094377. **Each** **152.38**

PC MOUNT FUSE KIT

Features the most popular PC mountable fuses, fuse holders, fuse blocks and fuse clips available. Ideal for engineering departments and R&D labs. Each kit contains an assortment of 200 picofuses (⅛-7A), microfuses (¼-5A), 3AG pigtail (¼-5A), 2AG pigtail (¼-7A) and 3 AB ceramic pigtail (10-20A), fast-acting and slo-blo fuses. Plus 10 variations of PC mountable fuse holders, fuse blocks and fuse clips. Includes a rugged, clear plastic storage case.

90F9125 Type 094378. **Each** **389.70**

AUTOMOTIVE FUSE KIT

Ideal for automotive maintenance departments. Each kit contains an assortment of 300 ATO blade fuses (3-30A), SFE and 3AG glass fuses (4-30A) and GBC ceramic fuses (5-25A) for use in all American, European and Japanese vehicles. Also includes 10 variations of fuse blocks and in-line fuse holders. Packaged in a sturdy, clear plastic storage case.

90F9126 Type 094379. **Each** **94.77**

APPLIANCE SERVICE FUSE KIT

Contains an assortment of 150 of the most popular fuses used in the appliance repair industry: 3AG (½-10A), 5 x 20mm (½-6.3A) and 3AB ceramic (10-20A), fast-acting and slo-blo fuses. Plus an assortment of 12 appliance switches, indicator lights, fuse holders and fuse blocks. Packaged in a sturdy, clear plastic storage case.

90F9127 Type 094380. **Each** **203.26**

INDUSTRIAL FUSE CADDY KIT

Contains an assortment of 75 universally popular 3AG fast-acting and slo-blo fuses (15 boxes of 5 fuses each). Packaged in a handy, durable plastic caddy case. Caddy case also available separately.

27F677 Type 094037 Fuse Kit. **Each** **62.12**

27F809 Type 896-75 Caddy Case Only. **Each** **2.79**

SURFACE MOUNT KIT

This kit provides unsurpassed access to the most advanced surface mount circuit protection devices on the market today. It allows you to have the right product...the right size...the right rating you need...when you need it. This kit includes both fuses and resettable PTCs.

48F1873 Type 00940381 **Each** **307.99**

RESETTABLE PTC DESIGN KIT

This kit provides wide assortment of resttable PTC products. The PTC is a unique polymer device that trips during an overload to limit current flow in the circuit and resets after the overload current is removed. This kit contains both surface mount and radical leaded product, of various voltage and current ratings.

48F1874 Type 00940463 **Each** **176.50**

Raychem

POLYSWITCH RESETTABLE FUSES

RGE SERIES THRU-HOLE DEVICES

RGE series R-line devices can be used in a wide variety of automotive, computer, and general electronics applications. Feature high-current carrying capability (up to 11 amps) in a small package with fast trip times. Maximum operating voltage (Vrms): 16V. Hold current 25°C. UL recognized, CSA certified, TUV approved.

RUE SERIES THRU-HOLE DEVICES

RUE series thru-hole R-line devices are designed to be used in a wide variety of general electronics applications. **RUE series** devices complement the **RXE series** by providing a smaller form factor with lower resistance and higher hold current capability (up to 9 amps). Maximum operating voltage (Vrms): 30V. UL recognized, CSA certified, TUV approved.

(16637) (ne10668)

RXE SERIES THRU-HOLE DEVICES

Unlike traditional fuses, which must be replaced after they blow, Polyswitch PTC (positive temperature coefficient) devices reset after the cause of the fault current and power to the circuit is removed. Resettable overcurrent circuit protection up to 60V @ 40A or 600V @ 3A. PolySwitch resettable fuses are low in resistance and are available in through-hole and surface-mount configurations. Solid-state construction. Applications: audio speakers, solenoids/valves, fire and security alarm systems, medical equipment, motors, test instruments, power supplies, industrial controls, automotive small-motor and electronic circuits. UL recognized, CSA certified, TUV approved. *Contact your local Newark sales office for additional products.*

FUSES, FUSE HOLDERS AND CIRCUIT BREAKERS

5 x 20mm LOW- AND HIGH-BREAKING FUSES

Manufactured according to IEC 127. Breaking capacity: 35A/250VAC (low breaking) and 1500A/250VAC (high breaking). UL recognized, VDE, SEMKO, and SEV approved. **FSU** and **SSU series** fuses meet UL 1459; GR1089; and ITU-T K.20 for telecom applications. Other rated currents are available (all available pigtailed); *contact your local Newark sales office..*

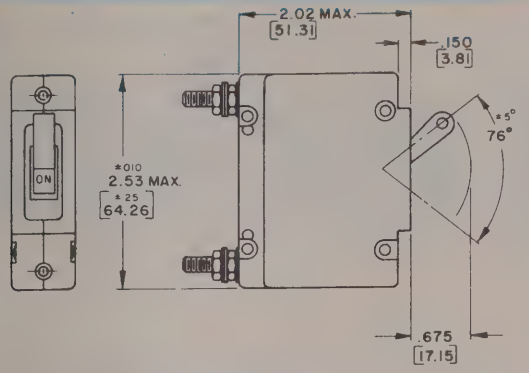
MAGNETIC CIRCUIT BREAKERS

UPL SERIES MAGNETIC CIRCUIT BREAKERS



UPL series magnetic circuit breakers provide reliable, low-cost switching, circuit protection and accurate circuit control. All types listed below are DC, 50/60Hz medium delay and are rated 65VDC/250VAC. All types listed below are an internal series configuration. UL recognized, CSA certified.

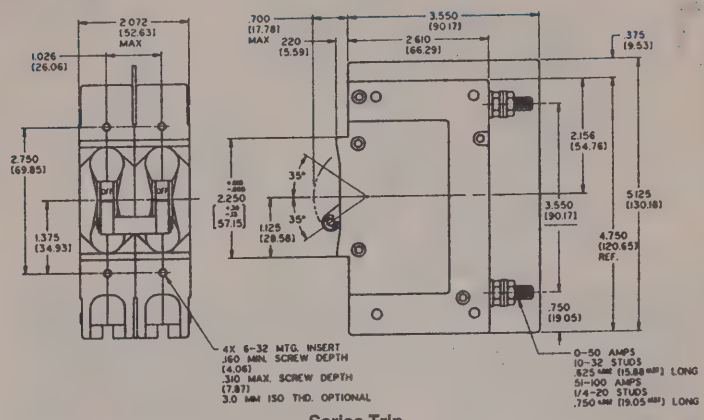
209 SERIES MAGNETIC CIRCUIT BREAKERS



Series Trip

209 series E-frame circuit breakers combine power switching with accurate, reliable circuit protection in one compact unit. Ideal for branch circuit applications such as EDP, air conditioners, panel boards, and lighting controls. Available in both 50/60Hz medium delay (62 type) and DC medium delay (52 type). Maximum current: 100 amps. All types listed below have a series trip configuration. UL listed, VDE approved, CSA certified.

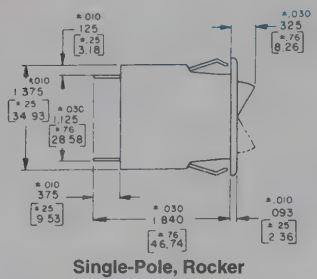
SNAPAK® MAGNETIC CIRCUIT BREAKERS



Single-Pole, Rocker

SNAPAK® offers power switching and accurate, reliable circuit protection in a single snap-acting magnetic circuit breaker. SNAPAK® combines the functions of three separate components: power switch, fuse, and fuseholder that allows for less assembly, lower inventory, and greater panel density through less clutter. SNAPAK® can be operated at either DC or 50/60Hz. Voltages on units up to 7.5 amps are 50VDC/250VAC. Voltages above 7.5 amps are 32VDC/125VAC. All types listed are series circuit breakers with rocker action. Body color: black; handle color: white. UL recognized, CSA certified, CE compliant, VDE approved.

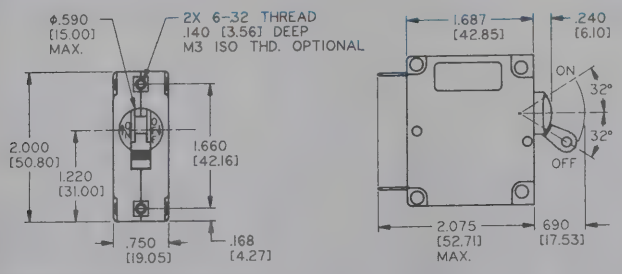
IEG SERIES MAGNETIC CIRCUIT BREAKERS



IEG series magnetic circuit breakers provide low-cost power switching, reliable circuit protection, and accurate circuit control. Types listed below are **Prefix IEG** in type number denotes one toggle handle per unit, **Prefix IEGH** in type number denotes one toggle handle per pole. Available in both DC long delay and 50/60Hz long delay. AC units are 250VAC. DC units are rated at 80VDC. UL recognized, CSA certified, CE compliant, VDE approved.

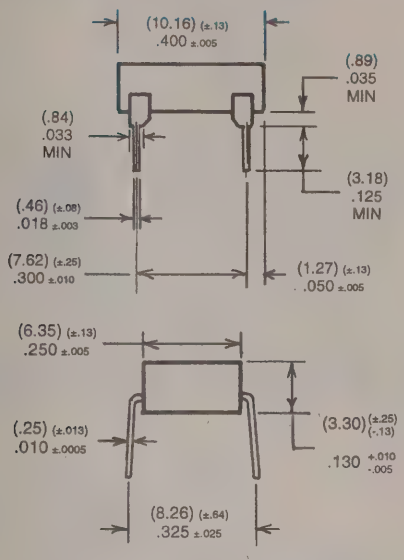
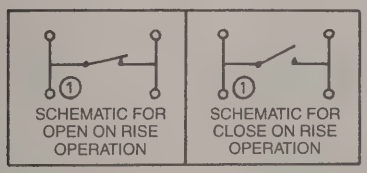
6600 SERIES PC BOARD THERMOSTATS



Standard 8-Pin DIP Configuration



6600 series are miniature bimetallic snap-acting thermostats ideally suited for use on PC boards. Provide fast, positive response and excellent repeatability at 48VDC at 1amp switching capability, over its operating temperature range of 40°C to 120°C (104°F to 248°F). Available in fan switches (Close on Rise) and limit switches (Open on Rise). High temperature epoxy sealed. UL recognized, CSA certified.

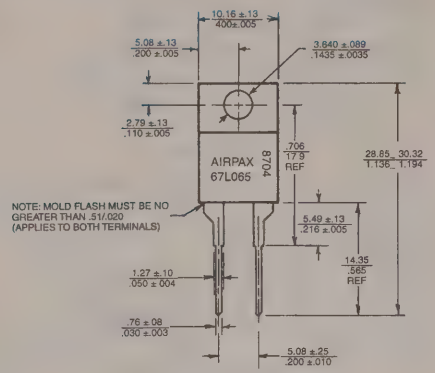
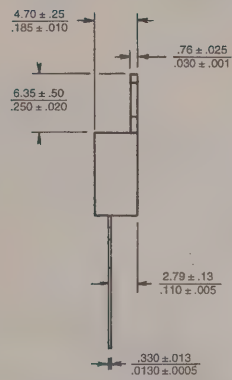
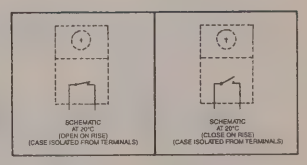
6700 SERIES PC BOARD THERMOSTATS





Standard Tozzo Package



6700 series provide accurate and durable sensing and switching in a single miniature bimetallic snap-acting thermostat. Developed for thermal management applications on power supplies or use on PC boards. SPST switch assembly. 1-amp switching capability at 48VDC over its operating temperature range of 40°C to 130°C (104°F to 266°F). Mechanical life: 1 million operations. Available in fan switches (Close on Rise) and limit switches (Open on Rise). UL recognized, CSA certified. (VDE approved product available on request).

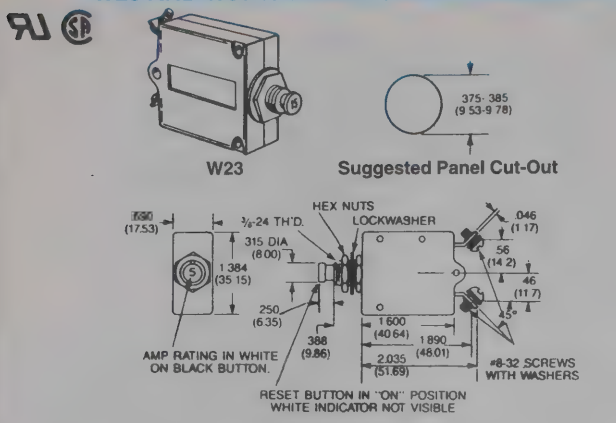
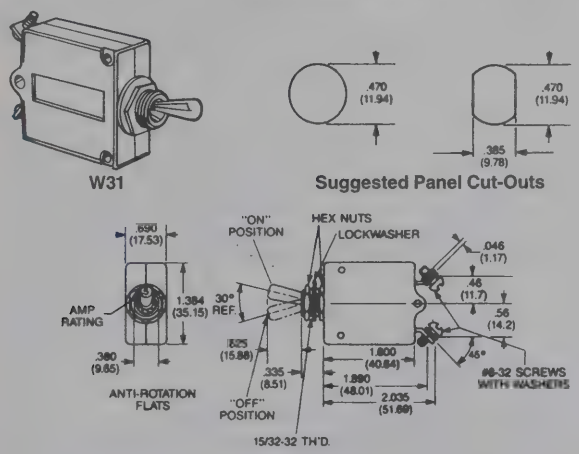
THERMAL CIRCUIT BREAKERS

W23 AND W31 THERMAL CIRCUIT BREAKERS





W23 and **W31 Series** circuit breakers are single pole, thermal devices. Both units may also be used as a switch. **W31** features toggle actuation and **W23** push/pull. Each breaker has trip-free feature which allows contacts to open on an overload even with toggle or button held in On position. **W23** and **W31** will carry 100% of rated load continuously but must trip at 135% of rated load at 25°C within one hour. Both units UL Recognized under file E69543 and CSA certified under file LR15734. Trip times listed are at 200% rating. **W31** Units have anti-rotation flats but also mount in round hole. See suggested panel cut-outs.

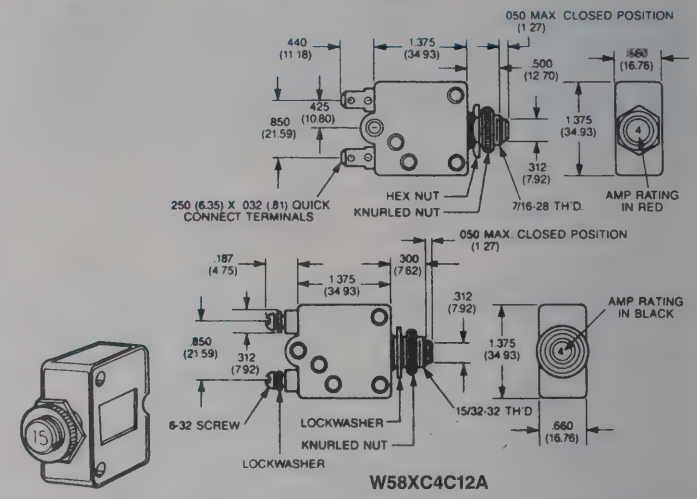
W58 SERIES RECESSED BUTTON THERMAL CIRCUIT BREAKERS



W58XC4C12A

Single pole, thermal type features recessed reset button. Cannot be manually pulled out to disconnect circuit. Reset button extends when overload occurs and breaker opens; red band appears for visible trip indication. Continuously carries 100% rated load. May trip between 101% and 144% of rated load, must trip at 145% at 25°C. Trip times listed in table are at 200% rating. Quick-Connect and #6-32 screw terminals are available. UL recognized, CSA certified.

Load Current As A Percent Of Breaker Rating
Time In Seconds

- **Approved to Many International Standards**
- **Replaces Slow Blow Glass Cartridge Fuse**
- **Labor-Saving Snap-in Mounting**
- **Button Extends for Visual Trip Indicator**
- **Pushbutton to Reset Breaker**

TYPE W28 SPECIFICATIONS

Calibration: Will continuously carry 100% of rating. 3-15 amp models-may trip between 101% and 134%, but must trip at 135% of rating within one hour at +25°C. 0.25-2 amp models- may trip between 101% and 174%, but must trip at 175% of rating within one hour at +25°C.
Dielectric Strength: Over 1,500 volts RMS.
Maximum Operating Voltages: 32VDC; 250VAC, 50/60 Hz.
Interrupt Capacity: 1,000 amps at 250VAC, 50/60 Hz and 32VDC in accordance with UL standard 1077.
Resettable Overload Capacity: Six times rated current for 0.25 through 2 amp models. Ten times rated current for 3 through 15 amp models.
Reset Time: 180 seconds max. for 0.25 through 2 amp models. 10 to 60 seconds for 3 through 15 amp models.
Termination: 0.250″ (6.35) quick connects. Soldering to terminals is not recommended.
Mounting: Snaps into panel from front. See recommended panel cutouts.
Approximate Weight: 0.35 oz. (10 g).

The **W28 series** is a single pole, thermal circuit breaker featuring a reset button which cannot be manually pulled to disconnect the load. On an overload, the reset button opens and a white indicator extends for visual trip indication. Ideal for replacement of slow-blow glass cartridge fuses. The **W28 series** snaps in panels up to 0.062″ (1.57) thick. **XQ** in type number indicates push-to-reset-button; **SQ** indicates switchable rocker. Switchable version has 30,000 cycle switch rating. Maximum operating voltage is 250VAC or 32VDC. Trip times shown in table are at 200% of load and +25°C. UL recognized (File E69543), CSA certified (File LR30671) and VDE, DEMKO and SEV approved.

Calibration: Breaker will continuously carry 100% of rated load. It may trip between 101% and 135% of rated load, but must trip at 135% within one hour at +25°C.
Dielectric Strength: Over 2,000 volts rms.
Maximum Operating Voltages: 50VDC; 250VAC to 400 Hz.
Interrupt Capacity: 1,000 amps at 50VDC; 250VAC, 60 Hz; 125/250VAC, 400 Hz; 1,500 amps at 125/250VAC, 60 Hz.
Resettable Overload Capacity: Ten times rated current.
Termination: Poles 1&2: .250″ (6.35) quick connect/solder terminals. Opt. Aux. Sw.: .110″ (2.79) quick connect terminals.
Mounting: Snaps into panel from front.
Cutout Size: Fits 0.875 x 1.750 (22.22 x 44.45) panel opening from .032-.250″ (0.813-6.35) thick.
Actuator: Rocker or lighted rocker.
Shock: 30g tested to IEC 68-2-27, test Ea.
Vibration: 8g tested to IEC 68-2-6, test Fc.
Endurance Cycling: 50,000 operations at rated load; 1,000 operations at 200% rated load.

Current sensing thermal circuit breakers feature models with a single pole breaker and a single pole "on-off" switch and indicator light in one convenient, snap-in mount package (**-S** in type number). Other models (**-T** in type number) feature both poles 1 and 2 series trip overload sensing. Available with black or white rocker (non-lighted) or with lighted rocker (120VAC neon light with resistor). 0.250 x 0.032″ (6.350 x 0.813) quick connect/solder terminals. Fit 0.875 x 1.750″ (22.22 x 44.45) panel opening from 0.032 - 0.0250″ (0.813 - 6.350) thick. Trip time @ 200% rating (all models): 3.0 - 33 seconds. International I/O rocker marking. UL recognized (File E695430), CSA certified (File LR15734). Meets requirements of IEC.

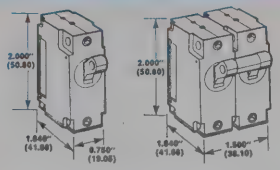
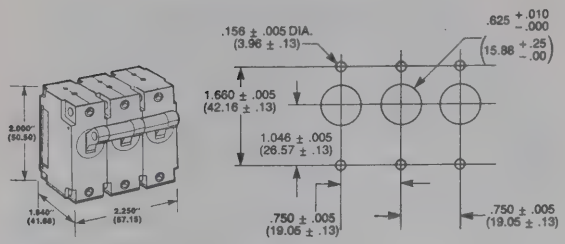
CIRCUIT BREAKERS

MAGNETIC HYDRAULIC CIRCUIT BREAKERS





W6 series circuit breakers are available in 1, 2, and 3 pole models with ratings to 50 amps. **W67** = 1-pole; **W68** = 2-pole; **W69** = 3-pole. Operating voltage: 277VAC or 65VDC. All units utilize a trip-free construction. Operating temperature: –40°C to +85°C. **W6 series** terminates in 0.032 x 0.250" (0.81x6.35) quick connect terminals. Units mount with #6-32 screws and feature a time delay curve tailored for motor start applications (Curve 10). UL capacity in amps: 3500–5000. UL recognized, CSA certified. VDE approved units are available; *contact your local Newark sales office.*

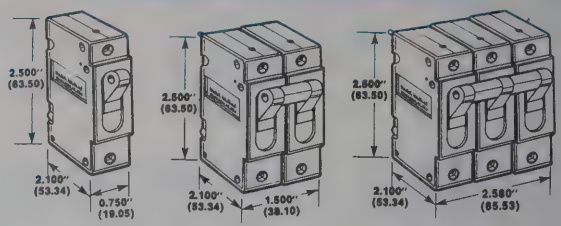
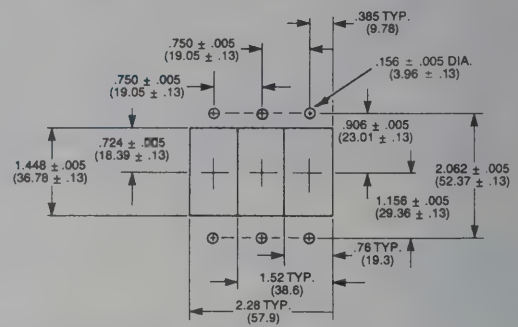
W91, W92 & W93 SERIES STANDARD MAGNETIC HYDRAULIC CIRCUIT BREAKERS





W9 series circuit breakers are available in 1, 2, and 3 pole models with ratings to 50 amps. **W91** = 1-pole; **W92** = 2-pole; **W93** = 3-pole. Operating voltage: 277VAC or 65VDC. All units utilize a trip free construction. Operating temperature: –40°C to +85°C. **W9 series** terminates in #10-32 studs. Mount with #6-32 screws and feature a time delay curve tailored for motor start applications (curve 10). UL capacity in amps: 3500–5000. UL recognized, CSA certified. VDE approved units are available; *contact your local Newark sales office.*

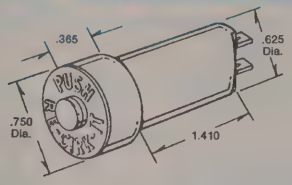
CIRCUIT BREAKERS/PROTECTORS

KD1 SERIES THERMAL CIRCUIT BREAKERS



Replace slow-blow glass fuses and fuseholders. Units mount in the same space as a 0.625″ (15.88) fuseholder and provide resettable capability after tripping. A trip indicator button provides visual indication of trip condition and can't be manually switched to OFF position. Uses include sump pumps, industrial power supplies, medical equipment, copiers, and vending machines. UL recognized, CSA certified, VDE approved at 250VAC or 32VDC and to 10A at 50VDC. *Clip retainer listed separately below.*

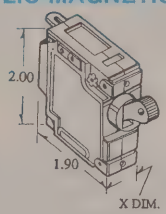
JA/S SERIES HYDRAULIC-MAGNETIC CIRCUIT BREAKERS



"X DIM."
1-Pole - 0.75″
2-Pole - 1.50″
3-Pole - 2.25″

JA/S series circuit breakers are available in one-, two- and three-pole models. Breaker terminals are 0.32″ x 0.250″ push-on type. Mounting with #6-32 screws. Units with **D3** in type number are rated AC/DC and are suitable for 250V, 50/60Hz and 65VDC. Breakers with **A8** in type number are rated at 250V, 50/60Hz and provide high inrush withstanding for momentary initial surges. Time Delay Curve 10 recommended for motor start applications. Units are UL recognized, CSA certified and meet VDE 0806 and IEC-380 standards. Operating temperature range: –40° to +85°C. Other ampere ratings available; *contact your local Newark sales office.*

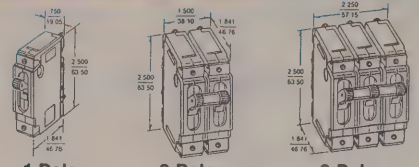
AM/S SERIES HYDRAULIC-MAGNETIC CIRCUIT BREAKERS



1-Pole 2-Pole 3-Pole

AM/S series lightweight circuit breakers available in one-, two- and three-pole models. Operating temperature range: –40°C to +85°C. Features knurled handle for positive grip. Units with **D3** in type number are rated AC/DC and are suitable for 250V, 50/60Hz and 65VDC. Breakers with **A8** in type number are rated at 250V, 50/60Hz and provide high inrush withstanding for momentary initial surges. Time Delay Curve 10 recommended for motor start applications. Electrical ratings: UL 489 listed from 0.1 to 100 amperes at 80VDC with 10,000 ampere interrupting capability; 0.1 to 20 amperes at 120VAC with 10,000 ampere interrupting capability; 0.1 to 50 amperes at 120/240VAC with 5,000 ampere interrupting capability. Units are available in 10-32 ¼-20 and 6mm metric connecting terminal studs, as well as 10-32 screws and banana mate terminals. Other ampere ratings available; *contact your local Newark sales office.*

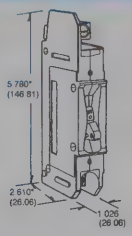
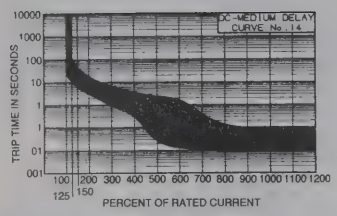
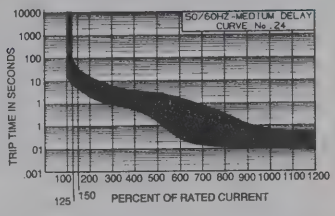
CIRCUIT BREAKERS

E SERIES MAGNETIC CIRCUIT BREAKERS







E series magnetic circuit breakers protect branch circuit wiring, panel boards, air conditioners, motors, motor controllers, and numerous other applications. Temperature stable mechanism is not affected by environmental temperature, eliminating the need for derating and preventing heat-induced nuisance tripping. Trip-free mechanism prevents manually holding contacts closed to override an overcurrent or fault condition. All are medium delay. Series trip circuit. Maximum application for DC types: 125VDC, 100A. Box-type pressure connectors accept 1-14 AWG copper or 1-12 AWG aluminum conductors. UL listed, CSA certified. AC types also available; *contact your local Newark sales office.*

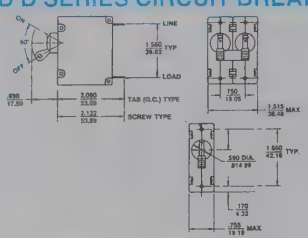
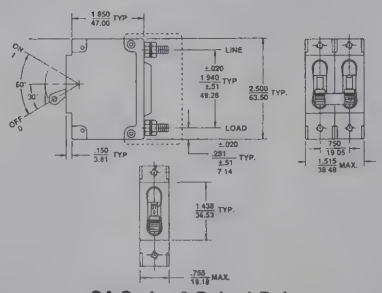
B, C, AND D SERIES CIRCUIT BREAKERS



BA Series 2-Pole; 1-Pole



CA Series 2-Pole; 1-Pole

All types are of a series trip construction with 6-32 front-panel mounting inserts and dual I-O/ON-OFF marking on black handle actuator. The **D series** also features standard 35x7.5mm or 35x15mm symmetrical DIN rail mounting and has 10-32 screw/pressure plate terminations. The **B series** has 0.250" (6.35) quick-connect terminations, the **C series** has 10-32 stud terminations, All units are supplied with all purpose, AC/DC medium trip delay rated 65VDC/277VAC and are UL recognized, CSA certified; **B series** and **C series** are VDE approved. 3-pole units are available on **B** and **C series**; *contact your local Newark sales office.*

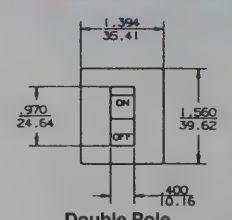
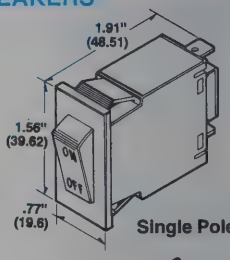
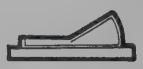
M SERIES CIRCUIT BREAKERS



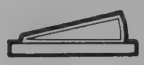
Double Pole



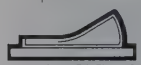
Single Pole



Angled Rocker



Flat Rocker



Curved VISI Rocker

M series magnetic circuit breakers provide precise circuit protection with two-step actuation that cleans contacts while providing high positive contact pressure. Large contact gap provides dependable arc extinguishing. Have series trip (current coil) circuit. All are 50/60Hz, medium delay with vertical markings. Non-illuminated types have black flat rocker; illuminated have angle style rocker. VISI rockers (non-illuminated) feature red legend and black rocker. Front-panel snap-in mounting units fit into standard panel cutouts. Push-on 0.25" (6.35) quick connect tab terminals. UL recognized, CSA certified. 2.5 amp and 5.0 amp are also available; *contact your local Newark sales office.*

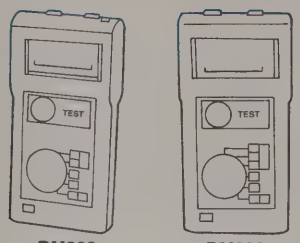
DIGITAL INSULATION AND CONTINUITY TESTERS — MEGGER

NEW



BM222 BM223

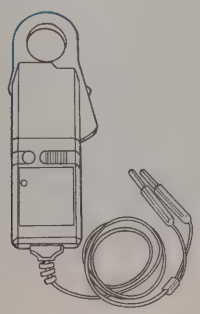
BM220 series combine an analog bar graph with a clear 3-digit display. **Type BM222** offers dual insulation test voltages; **type BM223** offers triple insulation test voltages. Buzzer for continuity testing. 200mA short-circuit continuity current. Automatic power down after 5 minutes. Tests insulation at rated voltage into a 1mA load. Insulation range: 0.01MΩ to 999MΩ. Continuity range: 0.01Ω to 99.9Ω. Voltage ranges: 25-450VAC, 450V-600VAC. IEC 1010-1, Category III.

Stock No.	Type	Insulation Test Voltage	1-4	5-9
46WX1373	BM222	500V, 1000V	414.24	403.90
46WX1374	BM223	250V, 500V, 1000V	458.83	447.37

(40871) (ne40871)

CURRENT CLAMP PROBES — LEM HEME

NEW



High-performance AC/DC current probes for use with multimeters and recording equipment. Compact clip-on design conforms to IEC 1010 safety standard and allows non-intrusive measurement of current from 5mA to 1000A peak. Accuracy: ±1%. Load impedance: 10kΩ. Maximum conductor size: 0.75″ (19mm). Frequency range: **type PR20**: DC to 20kHz; **type PR200**: DC to 10kHz. Operating temperature: 0° to +50°C. Supplied with 9V battery.

Stock No.	Type	Measuring Range		1-4	5-9
		AC (RMS)	DC		
08WX7008	PR20	20A	30A	274.75	267.90

(40870) (ne40870)

MICROTEMP® THERMAL FUSES — THERMODISC

NEW

Non-resettable axial fuses are designed to provide upper-limit temperature protection on all industrial appliances. Microtemp® thermal cut-off opens immediately when the internal temperature reaches the maximum rated temperature. Fuse is not resettable and should be replaced after opening. Rating: 10A @ 250VAC. Breakdown voltage when open: 1200VAC. Body length: 0.58″ (14.7). Body diameter: 0.16″ (4.0). Lead diameter: 0.04″ (1.0).

Stock No.	Type	Opening Temperature	1-24	25-99	100-499
09WX6679	G4A01072C	72°C	0.64	0.61	0.54

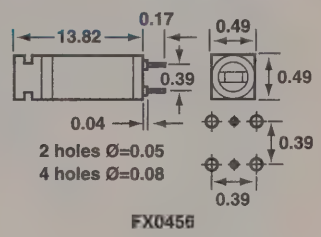
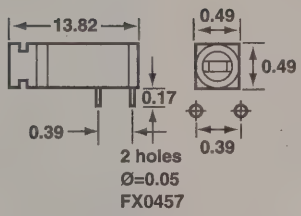
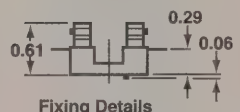
FUSE HOLDERS — BULGIN

Electrical+Electronic Components

NEW







Touchproof/bayonet cap fuse holders are available in low-profile, horizontal, and vertical styles and are UL listed, CSA certified, SEMKO and VDE approved. **Type FX0360** 20 x 5mm open-style base mount fuse holder includes glass-filled nylon base and central countersunk mounting hole.

Stock No.	Type	Description	1-99	100-249	250-499

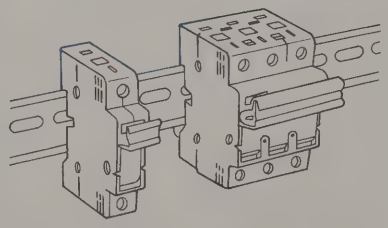
(40876) (ne40876)

DIN RAIL MOUNT FUSE HOLDERS — COOPER Bussmann

NEW



DIN mount fuse holders are available in single- and triple-contact configurations. Terminal capacity: 16mm^2. Rating: 32A @ 400V. **Type 32010** dimensions: 3.07H x 0.69W x 2.89″D (78.0 x 17.5 x 73.50), including lever. **Type 3205032** dimensions: 3.07H x 2.07W x 2.89″D (78.0 x 52.5 x 73.50), including lever.

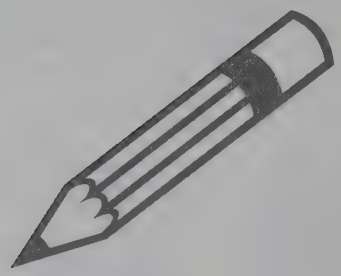
NOTES



Newark Takes Orders of All Sizes

No need to wait until you have a large order. Call us at 1-800-4-NEWARK (1-800-463-9275).

Electronic Terms and Measurements

Resistance
Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm — kΩ	1,000 or $1x10^3$ ohms
1 Megohm — MΩ	1,000,000 or $1x10^6$ ohms

Voltage
Electromotive force. Basic unit is the volt (V).

1 millivolt — mV	1/1,000 or $1x10^{-3}$ volt
1microvolt — µV	1/1,000,000 or $1x10^{-6}$ volt

Current
Movement of electricity. Basic unit is the ampere (A).

1 milliampere — mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere — µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency
Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz — kHz	1,000 or $1x10^3$ hertz
1 Megahertz — MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz — GHz	1,000,000,000 or $1x10^9$ hertz

Time
Basic unit is the second (s).

1 millisecond — ms	1/1,000 or $1x10^{-3}$ second
1 microsecond — µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond — ns	1/1,000,000,000 or $1x10^{-9}$ second

Temperature Conversion

°C	°F
100	212
80	175
60	140
40	105
35	95
30	85
25	75
20	70
15	60
10	50
5	40
0	32

Conversion Table

Metric to U.S.	U. S. to metric
1 centimeter = 0.39 inch	1 inch = 2.54 centimeters
1 millimeter = 0.039 inch	1 inch = 25.4 millimeters
1 meter = 3.28 feet	1 foot = 0.305 meter
1 gram = 0.035 ounce	1 ounce = 28.35 grams
1 kilogram = 2.2 pounds	1 pound = 454 grams
1 milliliter = 0.034 fl. ounce	1 pound = 0.45 kilogram
1 liter = 0.264 gallon	1 fl. ounce = 29.57 milliliters
	1 gallon = 3.79 liters

Operating Life for Capacitors

Where operating life is given at a certain temperature, for every drop of 10°C life expectancy will double.

If life expectancy is 1,000 hours at 105°C
this would double to 2,000 hours at 95°C
and double again to 4,000 hours at 85°C

LAMP TERMINOLOGY

Type:
- Lamp identification trade number

Bulb:
- Letter indicates type of bulb
- Number indicates max. diameter of bulb in 1/8ths of an inch
- Example: T-1 designates Tubular style bulb
  1 x 1/8" = 1/8" diameter

MOL: Maximum Overall Length

MOD: Maximum Outside Diameter (Includes bulb and base)

MSCP: Mean Spherical Candlepower
- Method of rating the total (brightness) output
- To convert to lumens, multiply by 12.57
- Tolerance is ±25%, unless noted

Amps: Current rating
- Conversion to watts: watts = amps x volts

NOTE: Calculations of characteristics shown in the tables below are approximate only between 95% and 110% of rated voltage lamp types with 5,000 hours life or less. Certain lamp types will vary widely for calculated values. This chart will not apply to lamps with lives in excess of 5,000 hours or to halogen cycle lamps.

UNDERRATED BULB VOLTAGES less than 100%

Volts	Amps	MSCP	Life
99%	99.4%	98.5%	112.8%

T-Tubular

BASE TYPES

Bases provide electrical contact to the lamp and, in most cases, also support the lamp in the fixture. For miniature and subminiature lamps, bayonet or wedge base types are generally preferred over screw types when vibration is present. In addition, wedge bases reduce socket size and complexity.

559 SERIES LED INDICATORS-0.250″ MTG. HOLE

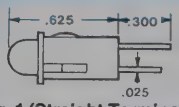

Fig. 1 (Straight Terminals)

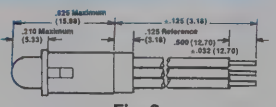

Fig. 2

559 series snap-in mount LED indicators are available in three-leaded bicolor (fig. 2) and 2, 5 and 12 volt models. Feature 14″ wire leads. 0.250″ (6.35mm) mounting hole. Straight terminals and 6″ (152.40) wire leads are also available on 559 series LED indicators; *contact your local Newark sales office for details.*

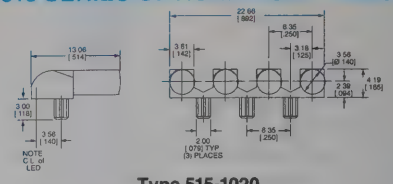
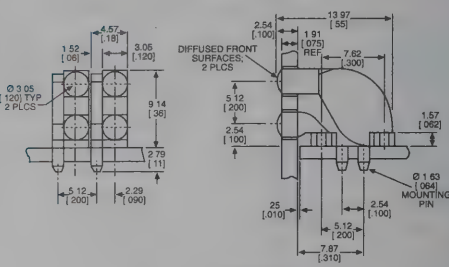
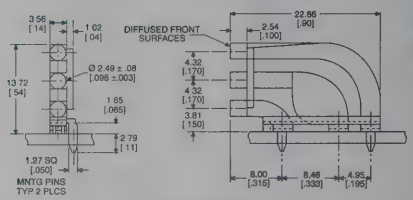
515 SERIES OPTICAL LIGHT PIPES



Type 515-1020



Type 515-1061



Type 515-1064

Light pipes are secured to the front panel by an ultrasonic welding process. Designed to transmit the light of a specific MicroLED LED. Shape is defined by a CAD ray tracing program to optimize its light transmission efficiency. Light pipes are required when (a) LEDs are located a distance from or are emitting light in a different direction from the front panel; (b) arrays (rows and/ or columns) of SMT indicators are required on the front panel; (c) unique shapes for the indicators are needed; (d) additonal protection against ESD (electrostatic discharge) is desired, as the LED is isolated by the polycarbonate light pipe material. UL94V-0 compliance. Operating temperature: –30°C to +100°C. All types have 3mm LEDs except **type 515-1064** which is 2.5mm.

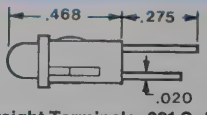
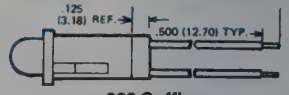
558 SERIES LED INDICATORS-0.156″ MTG. HOLE



Straight Terminals -001 Suffix



-003 Suffix

558 series snap-in mount LED indicators. Require no additional mounting hardware for 0.031″ to 0.062″ thick panels. Power requirements range from 2 to 20 mA. Housing is black polycarbonate. Feature 14″ wire leads **(-007 suffix)**. 0.156″ (3.96mm) mounting hole. For **558 series** with 6″ (152.40) wire leads, change type no. suffix from **-007** to **-003**. For **558 series** with straight terminals, change type no. suffix from **-007** to **-001**.

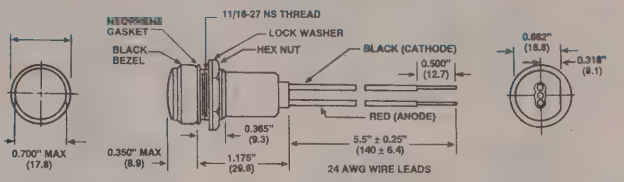
557 SERIES WATERTIGHT LED PANEL MOUNT INDICATORS



557 series indicators for 0.688″ (17.48) mounting hole feature 100,000-hour life, uniform illumination, watertight, tamperproof design and 6″ (152.40) wire leads. Suited for instrument panels, electrical/electronic control panels and where highly visible indication is critical. Housing material: polycarbonate with black aluminum bezel. Operating temperature: –25°C to +85°C.

AT NEWARK, YOUR ORDER IS OUR FIRST PRIORITY.

ULTRAMINIATURE INDICATORS

LED, INCANDESCENT AND NEON DATALAMP INDICATORS

Cartridges have aluminum housing with nickel silver pins, offset for polarization. IC compatible. LED's internal fresnel ring pattern allows maximum light distribution. Housing: black anodized. Incandescent and neon housings have clear anodized finish. High brightness neon units have a 5000-hour minimum life; standard brightness, 25,000 hours. Cartridges accept holders, connectors, and speed clips. Cartridges with stovepipe lenses (Fig. 2) and long cylindrical lenses are available; *contact your local Newark sales office.*

MIL SPEC PANEL-MOUNT INDICATORS

Military type panel-mount indicators are QPL listed per MIL-L-780 (MS25041 & MS25331). The MIL-L-3661 number permits the ordering of a complete assembly, or separate lens cap and base, with the MIL designation for the base only marked on the lamp holder. The MS number specifies a complete assembly and the full MS number (less lamp) is marked on the lamp holder. Available in red, green, amber, blue, clear and white. Uses 5V non-replaceable incandescent lamp.

252 SERIES 0.193″ MOUNTING HOLE

Stock No.	Type	MIL No.	Color	Fig.	1-24	25-49	50-99

NEON AND INCANDESCENT INDICATORS

103 SERIES OILTIGHT BASES & LENSES

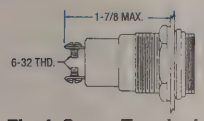

Fig. 1. Screw Terminal

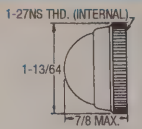

Fig. 2. Dome Lens

Fig. 3. Torpedo Lens

Oil-tight indicators are manufactured with a rubber gasket installed between the plastic lens and metal holder, as well as with a rubber O-ring which fits tightly on to a notch in the base. These make assembly virtually impervious to oil, water and dust. The lens holder is brass with either satin chrome or white nickel finish, and the base is white nickel-plated brass. **103 series** base models can be used with either dome or torpedo lens. Torpedo faceted lens **type 103-1331-403** also available. *Order lamps separately; contact your local Newark sales office.*

249 SERIES LED AND NEON PANEL MOUNT INDICATORS

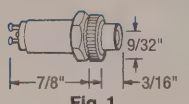

Fig. 1

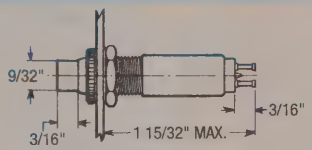

Fig. 3

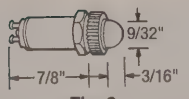

Fig. 2

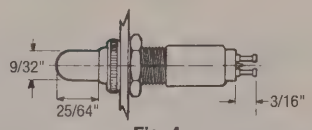

Fig. 4

249 series indicators offer high efficiency LEDs, standard, or high brightness neon lamps in black anodized aluminum housing. LED product offers long life for low voltage applications. Neon products supplied with integral resistors for line voltage requirements. **249 series** units are complete assemblies including base, lamp and lens in one. For **249 series** LED with short stovepipe lens (see Fig. 2), change the 8th and the 9th digits in the type no. from **33** to **37.** To order 3.6 volt devices, change the 6th and 7th digits to **67.**

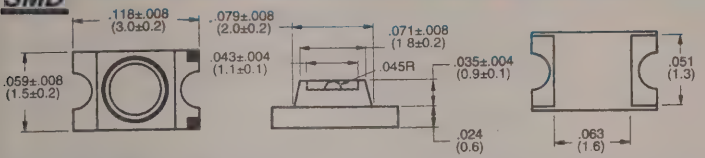
NEWARK ELECTRONICS® IS AN ISO 9002 COMPANY.

SURFACE MOUNT AND CIRCUIT BOARD INDICATORS

CMD11-21 SERIES SURFACE MOUNT LED

SMD



Integral lensing for narrow-angle light dispersion. Consistent high brightness. All types have clear lenses. Viewing angle: 20°. Forward voltage rating: 20mA. Tape and reel packaged for high-speed autoinsertion. Compact form enables high density placement. Industry standard 1206 package. Power dissipation: 105. Average forward current: 25 (**type CMD11-21VGC**) and 30 (**types CMD11-21VRC** and **CMD11-21VYC**).

Stock No.	Type	Color	I_V (mcd)	V_f	Each

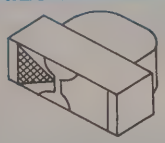
CMD12-21 SERIES SURFACE MOUNT LED

SMD



Provide consistent high brightness. All types have clear lenses. Tape and reel packaged for high-speed autoinsertion. Right-angle mountability. Viewing angle: 120°. Reverse voltage (IR+100µA): 4.0. Average forward current: 30mA.

Stock No.	Type	Color	I_V (mcd)	V_f	Each

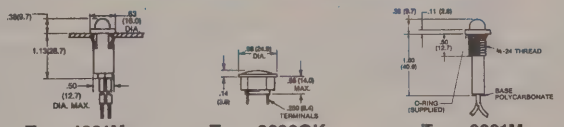
NON-RELAMPABLE INDICATORS



Type 1091M | Type 2620QK | Type 6091M

Non-relampable solid state lamps with polycarbonate lens. Solid state indicator lights (**types 1091M** and **6091M**) feature built-in current-limiting resistor and rectifier diode. No. 22 AWG wire leads. Stainless-steel bezel. **Type 1091M** snap-fits into 0.500/0.505″ diameter hole in panels 0.020/0.100″ thick. **Type 6091M** mounts in a 0.38″ min. diameter hole. Supplied with internal tooth-lock washer and hex nut.

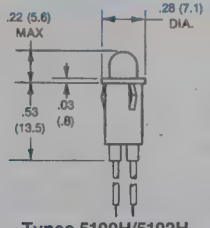
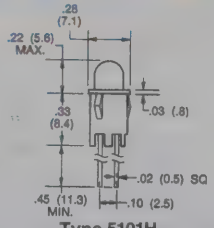
5100H SERIES PANEL MOUNT INDICATORS



Types 5100H/5102H



Type 5101H

Indicator **type 5100H** snap-fits in 0.249/0.254" (6.33/6.45) diameter mounting hole in panels 0.031/0.062" (0.78/1.57) thick. Features 6" (152.4) wire leads 24AWG insulated, bonded strands, stripped 0.250" (6.35). **Type 5100H1/5** is bi-color. Lights red or green by reversing polarity. **Type 5102H** features built-in resistor chip (5V or 12V) to operate directly off 5-volt or 12-volt supply without external resistor. **Type 5101H** features wire-wrap 0.45" (11.3) terminals. Black nylon housing.

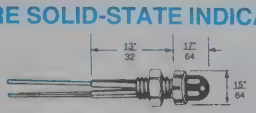
CIRCUIT BOARD INDICATOR KITS

Type EK-3 and **type EK-5** engineer's kits feature sockets, relampable incandescent lamp assemblies and incandescent and neon non-relampable assemblies of assorted styles, colors, and voltages. **Type EK-3** contains assorted lamp types mentioned above and type **EK-5** features LED products only. **EK-3** case dimensions: 8.4L x 5.0W x 1.5"H. **EK-5** case dimensions: 6.2L x 4.5W x 1.5"H.

95F5375 Type EK-5 Engineer's Kit. **Each** **48.60**

(2550) (de03181)

SUBMINIATURE SOLID-STATE INDICATOR LIGHTS



Submidget style with built-in bright LED; 70° viewing angle. Resistant to shock and vibration. Can be powered with low electrical energy supply or driven directly with solid-state circuitry. Operate on 1.8 to 2.8VCD. Maximum DC current: 50mA. Mount 0.193" (4.90) diameter "D" hole in panels to 0.188" (4.78) thick, on 0.344" (8.74) centers. 6" (152.40) wire leads, 105°C PVC insulation. Yellow also available; *contact your local Newark sales office.*

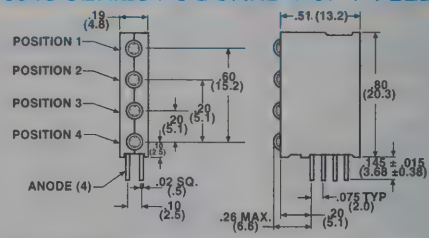
(2573) (de03922)

5694S SERIES PC BOARD 4-UP T-1 LEDs



5694S series LEDs are high density with right angle mounting. Four T-1 LEDs are stack mounted in a single block. Feature high brite and super bright light output. Standoffs prevent flux entrapment. Black plastic mounting block for high contrast ratio. Meets UL 94V-0 and Bellcore flammability specifications. Forward voltage: 3.0V max. Continuous forward current: 30mA max.

Stock No.	Type	Color	Intensity (mcd)	V_F	Current	Each

Neon glow lamps are used for indicators and circuit control applications. Two closely spaced electrodes cause neon gas to ionize and glow when voltage is applied. Since they have no filament, lamps withstand considerable shock vibration. Neon lamps are ideal for line-voltage AC as well as for 90V and up DC applications. They are rugged and long-lived; properly specified neon lamps will outlast the equipment in which they are incorporated. Neon lamps have tinned leads, and are ideal for use on printed circuit boards. External resistors not included except resistor included in base.

ROUGH SERVICE BULBS

Rough service bulbs are made with strong and well-supported filaments to resist vibrations, shocks, and bumps. "Gator Skin" bulbs are shatterproof due to a thin rubberized coating. All bulbs are standard, frosted, household screw-based bulbs for use in droplight, elevators, and other critical applications. **Sold in packages of 2.**

LAMP SOCKETS

MINIATURE BAYONET SOCKETS WITH SOLDERING LUGS

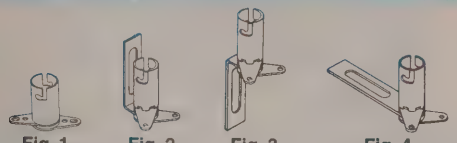

Fig. 1 Fig. 2 Fig. 3 Fig. 4

Fig. 5 Fig. 6 Fig. 7 Fig. 8 Fig. 9

Sockets accept miniature bayonet-based lamps. Designed for low-voltage incandescent lamps, 6 volts to 28 volts. Termination is to two solder lugs insulated from the mounting bracket. Brackets are 0.025/0.032″ (0.635/0.813) thick cadmium-plated steel. Rating: 75 watts @ 125V.

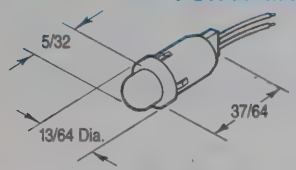
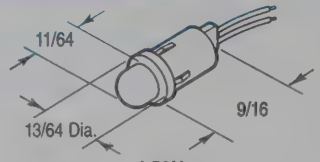
L59 AND L59U SERIES SNAP-MOUNT LED INDICATORS FOR ¼″ MOUNTING HOLE



L59



L59U

Subminiature **L59 Series** LED indicators with black nylon housing and bezel. Press fit ¼″ hole to 0.062″ max. panel thickness. Dome-shape lens. Typical luminous intensity for red LEDs is 16.0 MCD; 24.0 MCD for green LEDs; 16.0 MCD for yellow. Long life, solid state reliability. Types listed have 6″ insulated wire leads. 2-volt and 6-volt indicators and indicators with bare wire terminals also available; *contact your local Newark sales office.* **L59UD Series** indicators feature built-in integral bezel and diffused wide viewing angle LED. Termination: 6″-coded wire leads; red = anode(+), black = cathodel(-). Snap fit in ¼″ (6.35mm) mounting hole. Panel range: 0.115″-0.130″ (2.90mm-3.30mm).

L79 SERIES LED INDICATORS FOR 5⁄16″ MOUNTING HOLE

L79 series LED indicators are constructed with a threaded housing with a built-in reflector. Each unit has a high brightness diffused LED, 2 color-coded 6″ wire leads. 125VAC unit has a bipolar LED and 2 6″ white wire leads. Lights mount into a 5⁄16″ diameter mounting hole with a max. panel thickness of 0.250″. A hex nut and lockwasher are supplied. Current: 20mA typical. Clear LEDs, 2V, 6V and other colors are available, *contact your local Newark sales office.*

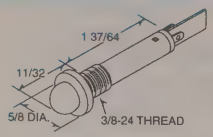
NEON, INCANDESCENT AND LED INDICATORS

75 AND L75 SERIES INDICATORS FOR 3/8" MOUNTING HOLE



75 series oil-tight indicators feature dome lens and nickel-plated bezel. Neon indicators have current-limiting resistors for 125V and 250V, and are 1/3 watt with 25,000 life hours. Termination: 6" wire leads, stripped 1/2" or 3/16" Q.C. terminals, designated by T suffix. Other available options include 6V, 14V and 28V indicators and blue, white and clear indicators. L75 Series solid-state indicators feature color-code wire leads. Red = anode (+), black = cathode(–); or one tinned 3/16" terminal to identify the anode(+) and one non-tinned terminal denoting cathode(–). Amber indicators, and 2V and 6V indicators also available. *Contact your local Newark sales offices for ordering information.*

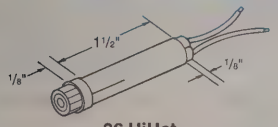
MINIATURE TINEON INDICATORS FOR 5/16" PANEL MOUNTING HOLE



36 HiHat

41 Flush

Miniature tineon indicators available with resistor (**36 series**) and without resistor (**41 series**). Speed nut supplied. **36EN series** features 125V, 1/3W, 25,000 hour life. **36HEN** features 250V, 1/3W, 25,000 hour life. Both have high brightness neon lamp with aluminum bezel. Front mounts 5/16" D hole. 6" wire leads, 20 gauge with insulated plastic. White nylon housing. **41 series** also front mount 5/16" D hole. **41ENG3 series** features 14V, 0.4A, 10,000 hour life. **41ENG18 series** features 28V, 0.4A, 7,000 hour life. UL listed, CSA certified. 6V units are available.

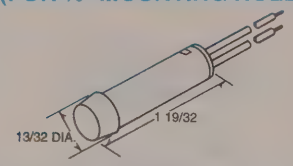
34 SERIES NEON; INCANDESCENT OR LED INDICATORS (FOR 3/8" MOUNTING HOLE)



34 Series 3/8" press fit panel mount indicator lights feature one-piece housing with cylindrical flat top lens. Panel range: 0.020" min. Mounting hole: 3/8". Neon indicators feature current-limiting resistors for 125V and 250V, and are 1/3 watt with 25,000 life hours. Termination: 6" wire leads, stripped 1/2". 28V incandescent indicators are 0.04A with 7,000 life hours (32,000 hours at 24V.) 6V units and 14V amber incandescent indicators available. L34 series LED solid-state indicators feature color code wire leads; red = anode(+), black = cathode(–). Other 2V and 6V LED indicators also available; *contact your local Newark sales office for ordering information.*

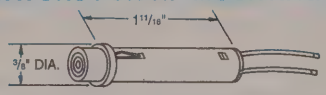
L39UR SERIES SOLID-STATE AND 39UR SERIES NEON LED INDICATORS FOR 5/16" MOUNTING HOLE



L39UR series indicators feature chrome bezels with 6" wire leads. Snap-fits 5/16" hole in panel thicknesses 0.030-0.052". Hi-hat lens. Long life, solid state reliability. **39UR series** 5/16" snap-fit panel mount indicators feature housing with snap-fit mounting ears, nickel-plated bezel, and hi-hat lens (flush style lens also available). Panel range: 0.020" minimum to 0.060" maximum. Termination: 6" wire leads, stripped 1/2". Neon indicators feature current-limiting resistors for 125V and 250V. 1/3W with 25,000-hour life. 6V, 14V, and 28V incandescent units available. Flush lens available.

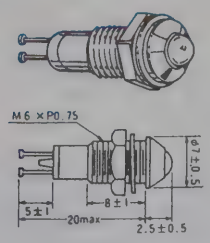
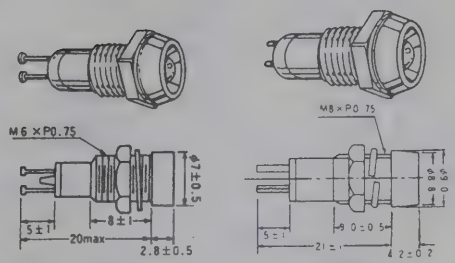
400 SERIES LED INDICATOR LIGHTS



406



407 440

Type 406 LED indicator features macrodome lens. Voltage range from 2-24V with built-in resistor. Panel hole: 0.244″(6.2) - 2 volt models. All lamps chrome-plated brass bodies except items with **BO** in type number are black anodized brass. **Type 407** has large dish-shaped reflector around LED to produce a larger illumination area. Panel hole: 0.244″(6.2) - 2 volt models. **Types 406** and **407** 5, 12 and 24 volt models feature 0.280″ (7.11) cutout size and solder tab terminations. **Type 440** is a larger version of **type 407** to provide even greater illumination. Panel hole: 0.335″ (8.5). All types feature black anodized body.

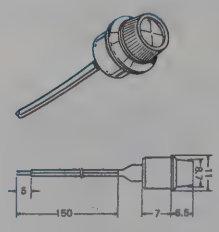
100 AND 101 SERIES MODULAR INDICATOR LIGHT ASSEMBLIES



101 - Top Hat 100 - Flush

100 and 101 series assemblies are modular lights that are mounted with a rubber bushing, snap into a 9mm diameter panel cutout, without nuts or washers. 6″ (152.40) wire leads. A variety of light sources– incandescent, neon, green glow and LED– fit into the bushing. A complete color selection of lens assemblies are slipped in from the top. Lens assemblies may be mounted independently from light source and mated in the final assembly. Lens colors/light sources are interchangeable.

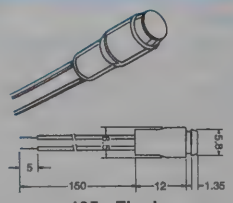
105 SERIES MODULAR INDICATOR LIGHT ASSEMBLIES



105 - Flush

Modular design concept similar to **100/101 series** only smaller. Lens is pressed into 5mm hole in front panel without nuts or washers. T-1 lamps can be used with any lens, thus meeting technical design requirements. Light sources include incandescent or neon, and a variety of lens colors are available. 6″ (152.40) wire leads. *Order lamps separately; contact your local Newark sales office.*

MINIATURE LAMPS AND LAMP ASSEMBLIES

INDICATOR LAMP ASSEMBLIES

Type 30151

Types 30152 and 30153

Tinnerman Clip: 0.63″ x 0.91″

Indicator lamp assemblies contain a single socket and a T-2 indicator lamp. **Type 30151** rectangular socket is UL recognized and intended for use with T-2 indicator lamp only. **Type 30153** round socket is also compatible with T-2 lamps and additionally can be used with either polycarbonate of pyrex end caps or square or round lens caps. Single socket assemblies are supplied with 0.63″ x 0.91″ tinnerman clips that hold the assemblies firmly to the panel. Single socket assemby dimensions — Socket: 1.14″ (28.96) M.O.L. Mounting Hole: 0.50″ (12.70 diameter, Lenses (round and square): 0.70″ x 0.48″ (17.78 x 12.19) high. **T-2 indicator lamps sold in packages of 10.**

SINGLE SOCKET FOR T-2 SLIDE BASE

Type 30152 assembly dimensions — Socket: 1.31″ (33.27) M.O.L. Mounting Hole: 0.50″ (12.70) diameter. Lenses (round and square): 0.70″ x 0.48″ (17.78 x 12.19) high. *Select T-2 lamp and either a polycarbonate or pyrex end cap or a lens cap to comprise complete lamp assembly; contact your local Newark sales office.* **Sold in packages of 10.**

Type SGL/SKT/30152 single socket assembly for T-2 slide base pilot lamp.

35F2815 Type SGL/SKT/30152. **Each** **1.57**

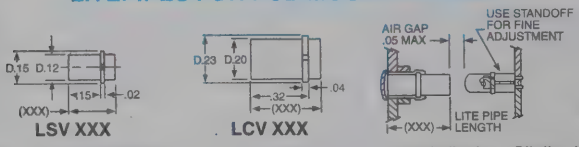
LITEPIPES FOR PCB MOUNTED LEDs



LSV XXX LCV XXX

Designed to transmit light from PCB mounted LED to panel display. Cliplite lenses provide the mounting for Litepipes and produce a 180° viewing angle. Use **SMC170** for **LSV** (3mm) litepipe and **CLB300** for **LCV** (5mm) litepipe. For added security use retaining rings **RNG165** (3mm) and **RNG 268** (5mm). **Sold in packages of 10 and 1000. Add suffix PKG to type number when ordering packages of 10.**

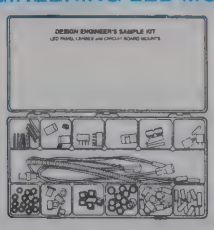
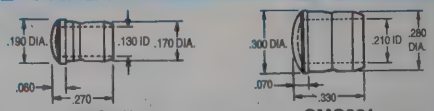
DESIGN ENGINEERING LED MOUNTING KIT



Hardware includes panel lenses, litepipes, mounts, solderless panel connectors, PCB mounts, sockets (vertical and right angle), locking headers, and standoffs. Kit also contains prewired solderless interconnect assemblies for 3mm and 5mm LEDs.

16F6495 Type KIT (LED Mounting Kit). **Each** 25.22
(2640) (ne08303)

CLIPLITE® PANEL LENSES FOR PCB MOUNTED LEDs



SMC170 CMC321

T1 and T1¾ size low profile panel lenses provide 180° viewing angle. **SMC170** for T1 LEDs. Hole size: 0.171″ on 0.250″ centers, panel thickness 0.031″-0.090″. **CMC321** for T1¾ LEDs. Hole size: 0.283″ on 0.375″ centers, panel thickness 0.031″-0.125″. Use retaining ring **RNG165** for **SMC170** and **RNG268** for **CMC321**.**RNG234** internal diameter 0.270″ (0.36″ external). Length: 0.08″. **RNG165** internal diameter 0.165″ (0.240″ external). Length: 0.50″. **Sold in packages of 10 and 1000.** (Add **suffix PKG** to type number when ordering packages of 10.) Also available in blue.

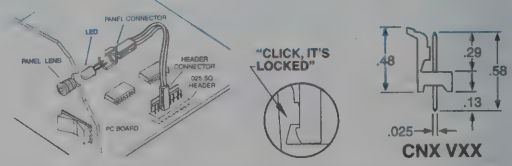
CONXRITE® INTERCONNECTS WITH LOCKING HEADERS



CNX VXX

Designed to replace labor-intensive hard-wiring of panel-mounted LEDs to PCB. **Type CNXBE** and **CNXBX** connector assemblies use SMC 170 (3mm) lens; **type CNXCE** and **CNXCX** connector assemblies use a CMC 321 (5mm) lens. *Order lenses separately; contact your local Newark sales office.* Thin panels (0.032″) use retaining ring **type RNG 132** for 3mm and **type RNG 234** for 5mm assemblies. **CNXBE** and **CNXCE** designates unit is supplied with panel and header connector. **BX** and **CX** designates unit is supplied with panel connector and bare wire leads. **CHXV** and **H** series locking headers provide positive locking between PCB and interconnect assmebly. **Products listed are sold in packages of 10. Packages of 1000 are also available; order same type without "PKG" suffix.**

LED ASSEMBLIES AND ACCESSORIES

VERTICAL SMD LED LIGHT PIPES

NEW

VLP series light pipes are ideally suited for applications where light from a SMD LED needs to be carried directly to a front panel or enclosure. Pipes are engineered of 94V-0 rated clear polycarbonate material for maximum light transmission. Light pipes will also protect circuits from accidental damage from ESD by isolating the PCB from potential contact. Face type: **suffix R in type number** = round, **suffix F** = flat. *Additional elevations available; contact your local Newark sales office.* **Sold in packages of 100**

NEWARK ELECTRONICS

WE HAVE IT TODAY, SO YOU'LL HAVE IT TOMORROW.™

Products at Your Door— When You Need Them, The Way You Need Them

Newark Electronics® now offers value-added services. So when your order arrives, you can put it to work without delay.

Products Customized to Your Specifications

- **Custom-Cut Cable –** We cut Belden Infinity® and Olflex® cable to the length you need.
- **Tape-on-Reel –** Looking for surface mount and thru-hole passive components in less-than-reel quantities? We have them.
- **Kitting –** Need parts grouped in kits? We build the kits you need.
- **Bagging and Tagging –** We can bag individual parts and label the bag to your specifications.
- **Assembly –** We perform basic assembly of compatibl components.
- **Part Numbers and Special Information –** We can add your bonded inventory and special receiving information about the products in your order to your shipping and packing slip.
- **Bar-Coded Shipments –** Do you use bar coding to track items? We can add bar codes to your products.

WE HAVE IT TODAY, SO YOU'LL HAVE IT TOMORROW.™

Newark
CD-ROM 3.0

- Browse our inventory of over 150,000 components
- Access our Web site for up to date stock levels
- Search by stock number, part number, key-word, and more

Newark CONNECT®: stockroom and order management software

- Tracks stock automatically
- Choose minimum and maximum inventory levels
- Generates replenishing orders automatically
- Reduces costs and cycle time
- Gets your order shipped within 24 hours
- Makes record-keeping easy

From PC Board accessories to power switches, Newark stocks more components and represents more manufacturers than any other catalog distributor.

Call **1-800-4NEWARK for** more information, or visit our Web site at **www.newark.com.**

The new Newark CD-ROM 3.0

- **Over 150,000 products from over 300 manufacturers**
- **Newark CONNECT® stockroom and order management software**
- **Unique Internet access and Web site interface**

Call 1-800-4NEWARK for more information about Newark's CD 3.0.

Discover the most powerful resource in electronics-the Newark **CD-ROM 3.0.** This single **CD-ROM** puts more than **150,000 products** from over **300 manufacturers** at your fingertips.

The powerful search engine lets you find products in a variety of ways, including product name, manufacturer name, manufacturer part number, Newark stock number, key-word, product category or customer associated number.

Newark **CD 3.0** even offers Internet Access. Or, use your existing provider to interface directly from the **CD-ROM** to Newark's Website at **www.newark.com** and place your orders online.

We have it today, so you'll have it tomorrow.™

Electronic Terms and Measurements

Resistance
Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm — kΩ	1,000 or $1x10^3$ ohms
1 Megohm — MΩ	1,000,000 or $1x10^6$ ohms

Voltage
Electromotive force. Basic unit is the volt (V).

1 millivolt — mV	1/1,000 or $1x10^{-3}$ volt
1microvolt — µV	1/1,000,000 or $1x10^{-6}$ volt

Current
Movement of electricity. Basic unit is the ampere (A).

1 milliampere — mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere — µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency
Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz — kHz	1,000 or $1x10^3$ hertz
1 Megahertz — MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz — GHz	1,000,000,000 or $1x10^9$ hertz

Time
Basic unit is the second (s).

1 millisecond — ms	1/1,000 or $1x10^{-3}$ second
1 microsecond — µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond — ns	1/1,000,000,000 or $1x10^{-9}$ second

Temperature Conversion

Conversion Table

Metric to U.S.	U. S. to metric
1 centimeter = 0.39 inch	1 inch = 2.54 centimeters
1 millimeter = 0.039 inch	1 inch = 25.4 millimeters
1 meter = 3.28 feet	1 foot = 0.305 meter
1 gram = 0.035 ounce	1 ounce = 28.35 grams
1 kilogram = 2.2 pounds	1 pound = 454 grams
1 milliliter = 0.034 fl. ounce	1 pound = 0.45 kilogram
1 liter = 0.264 gallon	1 fl. ounce = 29.57 milliliters
	1 gallon = 3.79 liters

Operating Life for Capacitors

Where operating life is given at a certain temperature, for every drop of 10°C life expectancy will double.

If life expectancy is 1,000 hours at 105°C
this would double to 2,000 hours at 95°C
and double again to 4,000 hours at 85°C

INFARED TRANSCEIVER EVALUATION KITS

Hewlett Packard's IrDA1.1 **HSDL-8010** evaluation kit provides the necessary information and components to assist in designing an optimum 4Mpr IrDa infared system into your product. The Design Guide and evaluation boards help you to understand the IrDa protocal stack and the benefits of IrDA, the features and function of the **HSDL-1100** transceiver module, and the correct way to design your board and optical port for optimum performance. In addition the kit allows you to establish a test link in order to experiment with angles and distance, as well as evaluate EMI effects in link performance. The kit also contains information on upcoming Hewlett Packard new products.

Type	Description	Contents	1-4	5-9
HSDL-8000	IrDA 115.2kbps Evauation Kit	2 Complete PCBs with HSDL-1001 IrDA Transceiver and HSDL-7001 Encoder/Decoder IC.HSDL-4220 and HSDL-4230 Infared Emitters are provided for Extended Distance Applications.	51.30	49.24
HSDL-8010	IrDA 4Mbps Evaluation Kit	Complete PC board with HSDL-1100 IrDA Transceiver. IrDA Data Link Design Guide.	38.47	36.93

10-ELEMENT BAR GRAPH ARRAY

NEW

LED arrays are designed to display information in easily recognizable bar graph form. Packages are end stackable and capable of displaying long strings of information. Use of these bar graph arrays eliminates the alignment, intensity and color matching problems associated with discrete LED's. Pins: 20. Dimensions: 0.200H x 0.400W x 1.00″L.

Type	Color	Light Emitting Area No./Size	Intensity Typical Per LED	1-9	10-24	25-99

HEWLETT® PACKARD

SENSOR AND BARCODE PRODUCTS

GENERAL-PURPOSE CMOS MOTION CONTROL ICs

HCTL-1100 is a general purpose motion control CMOS IC that provides closed loop control of DC, DC Brushless and Step Motors, using a digital incremental encoder for feedback. 5V operation. TTL compatible. 24-bit position counter. 4 control modes. Programmable digital filter and brushless motor commutator. 40-pin plastic DIP package. Row spacing: 0.600″. Operating temperature range: –20°C to +85°C. **HCTL-2000/2016** are CMOS ICs that interface digital incremental encoders to microprocessor systems. The ICs include a 4X quadrature decoder, binary up/down counter and tristate bus interface. 5V operation. TTL compatible. Operates at clock frequencies up to 14MHz. 16-pin plastic DIP package. Row spacing: 0.300″. Operating temperature range: –40°C to +85°C. **HCTL-2000** has a 12 bit binary counter; **HCTL-2016** has a 16-bit binary counter. **HCTL-2020** has all features of **HCTL-2016** as well as quadrature output signals and cascade output signals.

Type	Description	Pkg.	1-4	5-9	10-24
HCTL-1100	Motion Controller, 100kHz-2MHz Clock	PDIP	45.49	43.67	41.48

2- AND 3-CHANNEL ENCLOSED ENCODERS

Types HEDS-5500/5540 and **HEDS-5600/5640** are high-performance optical increment encoders. 2-/3-channel digital outputs and single 5V supply input are accessed through five 0.025″ square pins on 0.1″ centers. Shaft diameter: 0.25″. **Type HEDS-5505** has thru-hole housing. **Types HEDS-5600/5640** feature external mounting ears. Operating temperature: –40°C to +100°C. TTL compatible. Quick assembly. No mechanical or electrical adjustments are needed. Ideal for high-volume applications, including printers, plotters, tape drives, and positioning tables.

Type	Outputs	Counts Per Resolution	1-4	5-9	10-24
HEDS-5500#A05	2-Channel	500	41.75	40.08	38.07

OPTICAL REFLECTIVE SENSORS

Hewlett Packard's family of sensor products are fully integrated modules for applications which require optical-reflective sensing. Packaged in a TO-5 metal sealed package and available in three wavelengths and resolutions.

Type	Wavelength	Resolution	1-4	5-9	10-24
HEDS-1300	700nm	0.190mm	29.36	28.19	26.78
HBCS-1100	700nm	0.190mm	27.94	26.83	25.48

(2507) (de00905)

DIGITAL BAR CODE WANDS

Polycarbonate wands are rugged enough to operate in direct sunlight and have a low continuous current drain of less than 5mA @ 5V. Also available in a box with a data sheet; *contact your local Newark sales office.*

Type	Connector Type	Switch	ES Immunity	1-4	5-9	10-24
HBCS-A300	5-Pin 240° DIN	No	10kV	84.27	80.89	76.85
HBCS-A308	9-Pin DIN	No	10kV	81.42	78.16	74.25

(2509) (de00907)

2- AND 3-CHANNEL OPTICAL ENCODER MODULES

Types HEDS-9000/9100 are high-performance, optical-incremental encoder modules. When used in conjunction with a codewheel, the modules detect rotary position. Supply input: 5V. Five 0.025″ square pins located on 0.1″ centers. Operating temperature: –40°C to +100°C. **Types HEDS-9040/9140** use an highly collimated light source and a unique photodetector array to provide the same high-performance found in the 2-channel encoder series. Order codewheels separately; *contact your local Newark sales office.*

Type	Channels	Used with Codewheel*	Optical Radius (mm)	Resolution (cpr)	1-4	5-9	10-24

* Order codewheels separately; *contact your local Newark sales office.*

LARGE DIAMETER (56mm) HOUSED OPTICAL ENCODERS

Type HEDS-65xx/HEDL-65xx are high-performance 2- and 3-channel optical-incremental encoders. Each encoder contains a lensed LED source, an integrated circuit with detectors and output circuitry, and a codewheel which rotates between the emitter and detector integrated circuit. Operating temperature: –40°C to +100°C. Single +5V supply. Shaft size: 0.25″. **Type HEDS-6540** feature third channel index pulse. **Type HEDL-6540** feature a line driver option for noisy environments or long distances.

Type	Channels	Description	Resolution (cpr)	1-4	5-9	10-24

REFLECTIVE OPTICAL SURFACE MOUNT ENCODERS

Type HEDR-8000 encoders use reflective technology to sense rotary or linear position. This sensor consists of an LED light source, and a photodetector IC in a single SO-8 surface mount package. Feature 2-channel quadrature outputs. Operating temperature: –10°C to +85°C. Supply voltage: 5V.

Type	Resolution	Package	1-4	5-9	10-24
HEDR-8000#2K0	70-75 lines/inch	SO-8	15.31	14.39	13.53

SMARTWAND BAR CODE READER: DIGITAL WAND WITH BUILT-IN DECODER

The SmartWand is an intelligent peripheral, designed to easily add bar code scanning capability to any host system which can support a +5V serial asynchronous interface. The SmartWand may be programmed optically by scanning bar code labels. The SmartWand comes with a 9-pin D-sub connector. Supported Bar Code symbologies include: Code 3 of 9; Interleaved 2 of 5; UPC/EAN/JAN; Codabar; Code 128; Code 11 and MSI Code.

METAL CASE WITHOUT LED

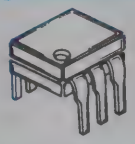
OPTOCOUPLERS IN 6-PIN DIP



6-pin dual in-line package (DIP) devices use infrared emitting diodes that are optically coupled to a wide selection of output (Transistor, Darlington, Triac, and Schmitt trigger) silicon detectors. These devices provide at least 7500V of isolation between the input and output and are 100% VISO tested. UL listed. VDE approved.

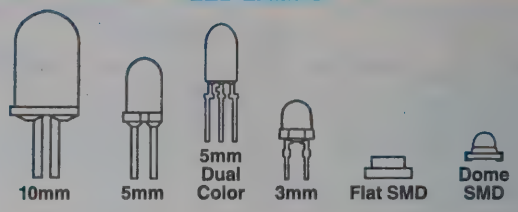
LED LAMPS



(3952) (ne09670)

VERY HIGH INTENSITY DISCRETE LED LAMPS

Clear lens provides uniform light intensity over viewing area. Usable from 0.5mA to 50mA, 200mA peak. Yellow and orange (InGaAlP material) LEDs have typical intensities up to 13,000mcd and 18,000mcd. Green LEDs are excellent for outdoor and underwater applications. All products are usable for outdoor signals, messages, signs, and low-current applications.

TFT MONITORS AND LCD DISPLAYS

TFT COLOR MONITORS

SMALL TFT COLOR MONITORS

TFT color monitors are complete active-matrix color LCD monitors. Include CCFL (cold cathode fluorescent lamp) backlighting and inverter, with single power supply requirements. Input signals are composite NTSC (TV) and analog RGB. Applications: portable computers, copiers, facsimile equipment, private telephone exchanges (PBX), point-of-sale (POS) terminals, and oscilloscopes. Driving voltage: **Type AND-TFT-5** and **AND-TFT-6**, 9.5V; **type AND-TFT-64MQ**, 12V.

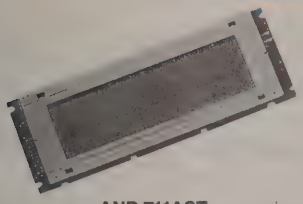
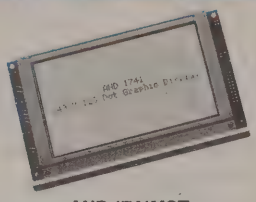
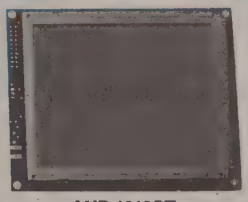
SUPER TWIST INTELLIGENT GRAPHICS LIQUID CRYSTAL DISPLAYS



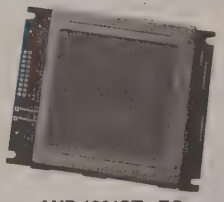
AND 711AST



AND 1741MST



AND 1013ST



AND 1391ST - EO

Complete line of monochrome intelligent graphics displays come with controller and video memory on-board. Feature a wide array of viewing options, including super twist reflective and transflective, film compensated, "white page" with CCFL (cold cathode fluorescent lamp), and electroluminescent. CCFL are either black on white (**-MST suffix**) or blue on white (**-BST suffix**) super twist nematic. Applications include: portable computers, copiers, facsimile equipment, private telephone exchanges (PBX), point-of-sale (POS) terminals, and oscilloscopes. Sizes range from 120 x 64 pixels to 240 x 128 pixels. Displays are supported by comprehensive application notes and AND's technical support hot-line.

V.I.P.™ MINI-TERMINALS

V.I.P.™ mini-terminals are interactive display systems which integrate a vacuum fluorescent display with a metal dome keypad. They operate from a 5.0VDC power supply and have an RS-232-C interface to the host system. The module is easily sealed to user's front panel. Switch legend strips slide out, and legends are user-defined. These interactive terminals are suitable for a variety of man-machine applications such as small machine tools, process controls, and test equipment.

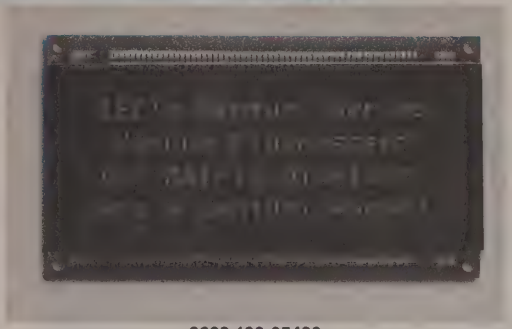
VACUUM FLUORESCENT DISPLAYS

FLIP™ CENTURY™ SERIES VACUUM FLUORESCENT DISPLAYS

3702-020-05220



3602-100-05420

Key Features:
- 100% Surface Mount Technology
- Interface to Intel or Motorola Host Processors
- Emulate Hitachi 44780 Data Input (Dot Matrix Only)
- Parallel 8-Bit or Serial EIA-232 Data to 19.2Kb
- Low 5VDC Power
- Standard Temperature Range: –20°C to +70°C
  Extended Range Available: –40°C to +85°C
- Hardware and Software Self-Test Modes

Software Control Features:
- Selectable Character Sets: ASCII, European, Katakana, Cyrillic, and Hebrew (Dot Matrix Only)
- Segmented Displays Have Standard ASCII 64-Character Set
- 10 User-Defined, Downloadable Characters (Dot Matrix Only)
- Vertical and Horizontal Scroll Modes
- 8 Software- and Hardware-Controlled Dimming Levels
- Variable Blink Fields and Rates
- Bell Alarm Output (Dot Matrix Only)

FLIP™ NO-FRILLS™ AND NINETY SERIES™ VACUUM FLUORESCENT DISPLAY MODULES

FLIP™ **type 3601-8x-xxxx** No-Frills™ modules feature 5x7 dot matrix characters, an on-board microprocessor, and operation from a single 5.0VDC power supply. UL recognized. **Type 3601-9x-xxx** Ninety Series™ modules are manufactured using SMT and have a 14-pin connector with 0.100″ (2.54) centers. They feature software dimming, accented European characters, and can display several user-defined downloadable characters. Very compact. UL recognized. *Data converters sold separately on this page.*

(3870) (de52179)

FLIP™ 5x7 DOT MATRIX VACUUM FLUORESCENT ASCII MODULES

FLIP™ vacuum fluorescent display modules are microprocessor controlled. Data interfacing is via an 8-bit bidirectional TTL-ASCII data bus or serial input using 1200 baud jumper-selectable TTL (or RS-232-C for selected models) serial data formatted as an 11-bit word. By use of simple commands or ASCII control codes, data can be selectively written to or read from any character location, alternative European character sets can be selected, or the status of the data latch can be determined. Only a 5VDC power supply is required, and the display's bright blue-green light is easily filtered to colors varying from yellow to green to blue (even red, in low ambient light applications). Display life is typically 80-100,000 hours to half-brightness. Operating temperature: 0°C to +55°C. UL recognized.

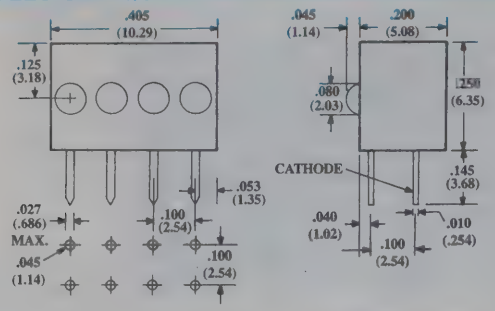
2mm LED CBI® QUAD CIRCUIT BOARD INDICATORS



Small 2mm design conserves board space. Highly reliable, vibration- and shock-resistant unit is available with a variety of LEDs; *contact your local Newark sales office.* Viewing angle: ±20°. Test current for standard efficiency units: 20mA. Test voltage for integral resistor units: 5V. Housing material meets UL94V-0.

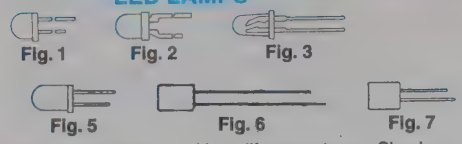
LEDS, KITS AND ACCESSORIES

LED LAMPS



IC-compatible lamps offer cool operation and long life expectancy. Shock-proof, solid lens, epoxy construction. Intense light sources available to 150 MCD luminosity. Leads are silver-plated, eliminating soldering problems. Viewing angles available to 180°. *Order panel-mount grommets separately on this page.*

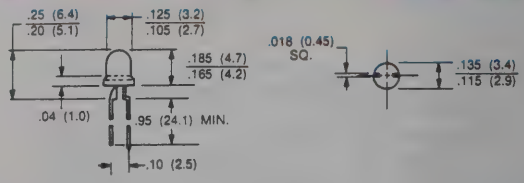
(35779) (ne35779)

4301F1/5 BI-COLOR SUPER BRITE LED LAMPS

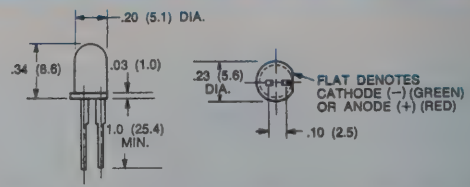


LED lamps feature Super Brite 3mm T-1 LEDs with uniform color output and wide viewing angle. Dual chip. Typical luminous intensity (mcd): 10. Rated current: 20mA. Forward voltage: typical: 2.1V; max: 3.0. Continuous forward current: 25mA max.

Stock No.	Type	Emitted Color	Lens Type/ Color	Viewing Angle	1-24	25-99
95F9398	4301F1/5	Red/Green	Diff./Clear	100°	0.77	0.69

(35875) (ne35875)

4301H1/5 HIGH BRITE BI-COLOR LED LAMPS



LED lamps feature 5mm T-1¾ dual color LEDs with red and green in the same two lead package. Chips are brightness matched - green and red light output is uniform. Typical luminous intensity (mcd): red: 6.0; green: 7.0. Rated current: 10mA. Forward voltage: 2.2V typ.; 2.8V max. Continuous forward current: 25mA max.

Stock No.	Type	Emitted Color	Lens Type/ Color	Viewing Angle	1-24	25-99
88F3726	4301H1-5	Red/Green	Diff./Clear	50°	0.96	0.69

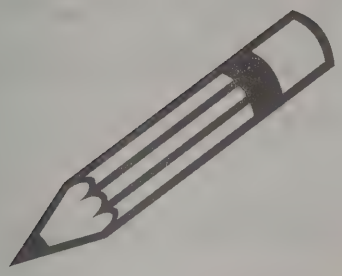
NOTES



Shop with Our CD-ROM

Our complete catalog is now available on CD-ROM. Call your Newark sales rep for details on this new, easy way to shop — 1-800-4-NEWARK (1-800-463-9275).

NEWARK
CD-ROM 3.0 with
Newark CONNECT

NEWARK ELECTRONICS

WE HAVE IT TODAY, SO YOU'LL HAVE IT TOMORROW.™

Newark
CD-ROM 3.0

- Browse our inventory of over 150,000 components
- Access our Web site for up to date stock levels
- Search by stock number, part number, key-word, and more

Newark CONNECT®: stockroom and order management software

- Tracks stock automatically
- Choose minimum and maximum inventory levels
- Generates replenishing orders automatically
- Reduces costs and cycle time
- Gets your order shipped within 24 hours
- Makes record-keeping easy

From PC Board accessories to power switches, Newark stocks more components and represents more manufacturers than any other catalog distributor.

Call
1-800-4NEWARK for more information, or visit our Web site at **www.newark.com.**

ISO 9002 Certified
RS 35104

The new Newark CD-ROM 3.0

- **Over 150,000 products from over 300 manufacturers**
- **Newark CONNECT® stockroom and order management software**
- **Unique Internet access and Web site interface**

Call 1-800-4NEWARK for more information about Newark's CD 3.0.

Discover the most powerful resource in electronics-the Newark **CD-ROM 3.0.** This single **CD-ROM** puts more than **150,000 products** from over **300 manufacturers** at your fingertips.

The powerful search engine lets you find products in a variety of ways, including product name, manufacturer name, manufacturer part number, Newark stock number, key-word, product category or customer associated number.

Newark **CD 3.0** even offers Internet Access. Or, use your existing provider to interface directly from the **CD-ROM** to Newark's Website at **www.newark.com** and place your orders online.

We have it today, so you'll have it tomorrow.™

COMPACT PCI POWER SUPPLY & BOARD

2600-300

Type 2600-300
- **Current Sharing V1 & V2**
- **N + 1 Redundant & Hot Swap**
- **3U x 160mm Form Factor**
- **Available in AC & DC Versions**

Type 4626-2
- **Mounts in Standard 3U DIN Based Subrack**
- **Utilizes the MPS Connector**
- **Three Standard Peripheral Power Connectors Provided**

Type 2600-300 power supply develops high output power level in a 3U form factor and is capable of 300 Watt output with high efficiency. Multiple outputs on +5V, +3.3V, and ±12V are individually regulated. **Type4626-2** adapter board for cPCI 300 Watt power supply.

Stock No.	Type	Description	Voltage	1-2
83F7699	2600-300	Power Supply	+5V +3.3V +12V -12V	**654.50**

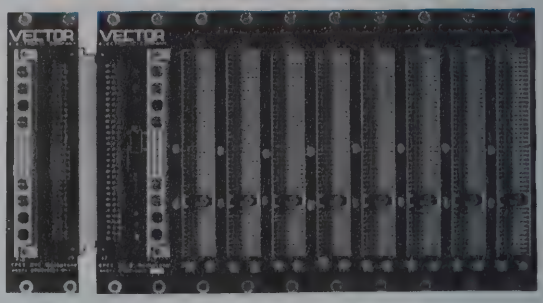
COMPACT PCI BACKPLANE AND ADAPTER



CPIBP8-6, CPCIBP8-3-1

Type CCA27-44-00
- **8 Slot 6U Height**
- **32/64 Bit Configuration**
- **CPU Slot on the Right**
- **Backplane Design is Compact PCI Specification 2.0 Compliant**

Type CPCIBP8-6 is multilayer, 6U, 8 slot with MPS connector for power supply. **CPDCIBP8-3-1** is an adapter for mounting a second power supply.

Stock No.	Type	Description	1-2
83F7697	CPCIBP8-6	Multilayer, 6U, 8 Slot with MPS Connector for Power Supply	**660.00**
83F7698	CPCIBP8-3-1	Adapter for Mounting a Second Supply	**535.34**

(37275) (ne37275)

COMPACT PCI LOAD BOARDS

CPCI-3U-25-L, CPCI-6U-25-L

- **Provides 25 Watt Resistive Load for Switching Power Supplies**
- **Provides Standard Jacks for Remote Meter Readout for Exact Calibration**

Type CPC13U and **CPC16U** Boards for 3U and 6U system provide 25 watt resistive load for switching power supplies.

Stock No.	Type	Description	1-4
83F7695	CPCI3U-25L	Resistive Load Board For 3U System	**270.00**
83F7696	CPCI6U-25L	Resistive Load Board For 6U System	**300.00**

CIRCBORD PRINTED CIRCUIT PROTOTYPING BOARDS

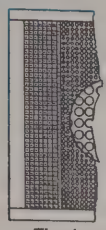

Fig. 1

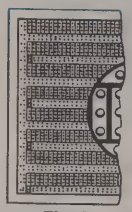

Fig. 2

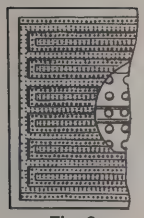

Fig. 3

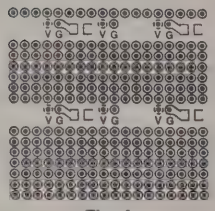

Fig. 4

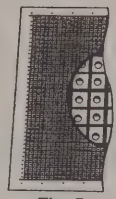

Fig. 5

- **Eliminate Need for Edge Connectors**
- **Bus and Circuit Patterns Are Solder-Coated**
- **Epoxy Glass or Epoxy Glass Composite Material**

These 0.062″ (1.57) thick printed circuit boards feature 0.042″ (1.07) diameter holes on 0.1″ (2.54) grid. Flame retardant. Accept wire wrap socket pins; *order* **type R32** *separately on page 303.* **Type 8001**; Mount up to 20, 16-pin DIP devices. **Type 8002**: Mount up to 36, 16-pin DIP IC components with 0.3″, 0.6″ and 0.9″ lead spacing. **Type 8003**: Mount up to 60, 16-pin DIP IC devices. **Type 8004**: Accommodate up to 50, 16-pin DIP IC devices. 0.085″ diameter clearance areas around hole. **Type 8006**: Board can be cut into smaller units. 154, 16-pin DIP IC capacity. **Type 8007**: Pad-per-hole pattern on component side, overall ground plane pattern on wiring side. 0.080″ diameter isolated solder pad around holes, component side. 60 16-pin capacity. **Type 8008**: mounts up to 21, 16-pin DIP IC devices. **Type 8010**: 16-pin DIP capacity: 124. **Type 8011**: Capacity for mounting 103, 16-pin DIP IC devices. **Type 8012**: Capacity for mounting 283, 16-pin DIP IC devices. **Types 8008-8012** all have 0.042″ diameter holes on 0.1″ grid and 0.080″ diameter, isolated solder pad around each hole. **Type 3677-6**: Etched circuit pattern on wiring side only. Mount up to 21, 16-pin DIP IC devices. **Type 45P80-1**: Accommodate 80, 16-pin devices. **Type 106P106-1**: Square solder pad around each hole, both sides. 275, 16-pin DIP devices. **Type 106P180-4**: Ground plane 2 sides, pad-per-hole. **Type 106P70-4**: Ground plane and pad-per-hole.

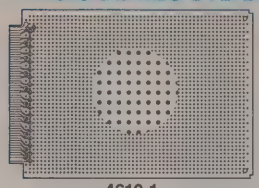
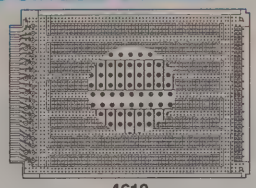
4610 SERIES STD BUS CIRCUIT BOARDS



4610-1



4610

4610 series all have 0.042″ (1.07) diameter precision-drilled holes on 0.1″ (2.54) grid. STD Bus standard: 5 volt bus terminates to pins 1 and 2; ground terminates to pins 3 and 4. **Type 4610-1** has capacity for mounting 59, 16-pin DIP IC devices. **Type 4610-2** has power and ground buses on wiring side only, component side has contacts only. Capacity for mounting 35, 16-pin DIP IC devices. **Type 4610-3** has 0.080″ (2.03) D, isolated solder pads around holes, both sides. Capacity for mounting 52, 16-pin DIP IC devices. *All accept* **type 3690-16** *extender cards ordered separately on page 606. Order card racks separately; contact your local Newark sales office.*

Stock No.	Type	Circuit Pattern	1-4

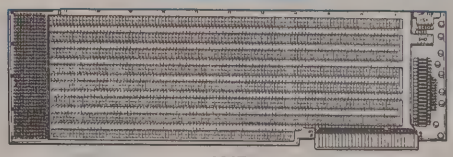
(6663) (de51844)

4617 SERIES CIRCUIT BOARDS FOR IBM AT, PC AND XT COMPUTERS



4617

4617 series boards plug into any IBM AT slot with dual connectors; have pads to mount dual row 0.1″ (2.54) spaced header. All boards listed below are 0.063″ (1.60) thick epoxy glass per MIL-P-13949 type GF. Feature marked edge identification, with gold-plated contacts on 0.1″ (2.54) centers. Power and ground buses terminate to connectors, and pads on board and bracket accept DB9-, 15-, 25- or 37-pin I/O connector. Holes are 0.042″ (1.07) diameter on 0.1″ (2.54) grid. Use solder or wire-wrap press-in terminals. Universal mounting bracket, card guide, layout planing sheets included. **Type 4617** *uses* **type 3690-26** *extender card, ordered separately on page 606.*

BOARDS WITH 3-HOLE SOLDER PADS/BUSES

Stock No.	Type	Fits IBM Model	Holds 16-Pin DIPs	1-4
46F2448	4617	AT, ISA	39	79.00

BOARDS WITH VOLTAGE PLANES

Type 4617-4 for higher frequency construction, features solid voltage and ground planes on opposite sides. Boards are filled with 0.55″ (1.40) diameter holes spaced 0.1″ x 0.1″ (2.54 x 2.54), with etched clearance areas surrounding them. Connections from device leads to voltage or ground made by direct soldering or placing eyelet in hole, and soldering flange to tinned circuit plane. Component leads soldered into eyelets are connected to circuit side on which eyelet flange is soldered.

Stock No.	Type	Fits IBM Model	Holds 16-Pin DIPs	1-4
87F1076	4617-4	AT, ISA	130	79.00

BOARDS WITH PAD-PER-HOLE PATTERN

These boards with plated-thru holes feature pads on a 0.1″ (2.54) grid which allow unlimited component placement. Full size. They accept any width DIP device, and have power and ground buses on each around the edges. **Type 4617-3** *uses* **type 3690-26** *extender card, ordered separately on page 606.*

Stock No.	Type	Fits IBM Model	Holds 16-Pin DIPs	1-4

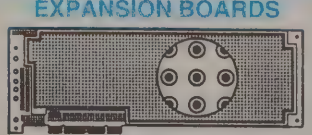
(3849) (de51836)

PCI-BUS AND VESA LOCAL BUS (VL-BUS) 32-BIT EXPANSION BOARDS



4624-3 PCI-Bus

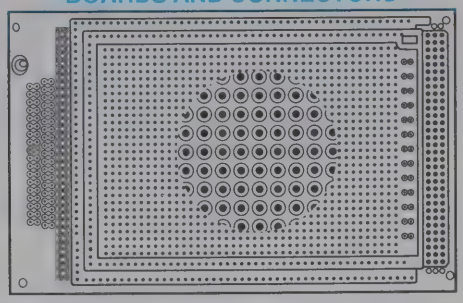
Pad-per-hole and peripheral buses for power and ground. FR4 epoxy glass boards have 0.042″ (1.7) diameter plated-thru holes on 0.1″ (2.54) grid. 32-bit ISA format. Universal etched tab geometry fits 3.3V and 5.0V tab notch patterns. Accept up to 79 DIPs plus PGAs. **Type 4624-3** PCI-bus board has 120 nickel/gold-plated contacts on 0.050″ (1.27) centers. Conforms to PCI local bus specification rev. 2.0. Mounting brackets included. Size: 12.28″ (311.9) wide x 4.20″ (106.7) high.

Stock No.	Type	Description	1-4
97F7966	4624-3	PCI-Bus Board	213.07

(3806) (de03507)

PROTOTYPING BOARDS AND EXTENDERS

EUROCARD (VME) 0.063″ (1.60) THICK PROTOTYPING BOARDS AND CONNECTORS



Signal pattern Eurocards have a bus connector, I/O, and signal pattern area. Bus connector area accepts 96-pin wire wrap connectors that allow direct connection to power and ground buses by wiring or using specially designed eyelets supplied with board. I/O area provides for mounting D-sub and flat ribbon cable connectors. Bus connector area has 0.055″ diameter (1.40) holes to accept eyelets, and I/O area has 0.043″ diameter (1.09) holes. Eurocards may be used as VME or Multibus II prototype boards. 0.1″ x 0.1″ (2.54 x 2.54) grid allows nonrestrictive placement of components. Units with type number **suffix -1** are pad-per-hole pattern, with holes in signal area drilled on a 0.1″ (2.54) grid, plated thru with pad on both board sides. Power and ground buses surround signal area; 0.043″ diameter (1.09) holes. **Suffix -3** are power and ground plane pattern, with 1 board side covered with a ground plane; other, a power plane. 0.055″ diameter (1.40) holes. *Order DIN connectors separately; contact your local Newark sales office.*

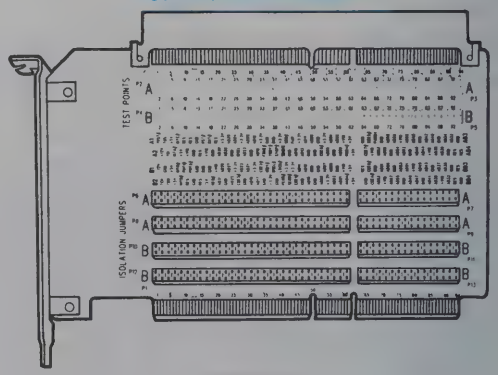
PCI TEST EXTENDER



3690-34-5

3960-34-3V test extender for 32-bit or 64-bit PCI requirements. Contains test points for each signal line. Includes instructions. **3960-34-5V** multilayer test extender for 32-bit or 64-bit PCI requirements. Contains test points for each signal line. Instructions included. Sized and pin-compatible for 5 volt. (3.3 volt available; *contact your local Newark sales office).*

Stock No.	Type	Description	1-4
97F7955	3690-34-3V	Test Extender	310.50

CIRCUIT BOARDS

GENERAL PURPOSE WIRE-WRAP 0.063″ (1.60) THICK CIRCUIT BOARDS

- **0.042″ (1.07) Diameter Holes on 0.1″ (2.54) Grid**
- **Flame Retardant Epoxy Glass Composition (except 3662-9, 3719-6 Epoxy Glass)**

Type 3662-9 pad-per-hole with buses pattern mounts 48 16-pin DIP devices horizontally, or 45 16-pin devices vertically. Drilled, plated-thru holes with 0.080″D (2.03) pads. Low resistance peripheral power and ground buses. **Type 3682-2** buses only pattern mounts 24 16-pin or 0.3″ (7.62), 0.6″ (15.24), 0.9″ (22.86) width DIP devices. Interposed power and ground buses on wiring side; bus outlines on component side. **Type 3719-6** pad-per hole and buses pattern mounts 40 16-pin DIP devices. Unlimited component placement. Low resistance peripheral power and ground buses. Drilled, plated-thru holes with 0.080″D (2.03) pads both sides. **Type 3797-2 -3** hole solder pads and buses pattern mounts 4 16-pin DIP devices. Interposed power and ground buses and hole marking legend on wiring side. 30 contacts on 0.156″ (3.96) centers.

8136 SERIES WIRE WRAP BOARDS

FASTPAK² Panel

Hi-Pak™ Panel

Wire wrap panels feature large power and ground planes of 2 oz. copper to provide optimum performance and minimize noise problems associated with typical breadboards. Finished to MIL specs. Available in two field patterns. Hi-Pak™ (type number with **suffix -01**) is a high-density universal pattern that allows devices with 0.3″, 0.4″, 0.6″, and 0.9″ lead spacing to be inserted anywhere on the board for optimal circuit performance. VCC and ground pins located at every other column for design flexibility. Power and ground busses beside each column of socket pins facilitate VCC and ground commitment of any pins. FASTPAK™ (type numbers with **suffix -02** or **-03**) is a universal pattern that incorporates SMD decoupling capacitors under each DIP location to ensure better operating performance for high power and high speed ICs. Continuous power and ground planes surround each pin. Boards with **-02 suffix** in type number have premounted 0.1µF SMD decoupling capacitors and no PGA area. Boards with **-03 suffix** in type number have premounted 0.1µF SMD decoupling capacitors and PGA area with SMD decoupling capacitors. Fully assembled. Flame-retardant, glass epoxy.

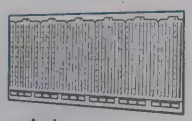
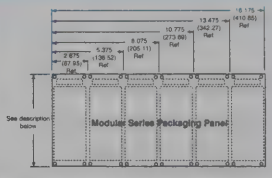
UNIVERSAL SERIES MODULAR WIRE WRAP BOARDS

8136-UG1-54





- **Fully assembled, ready-to-run**
- **Flame retardant glass epoxy**
- **High current power termination studs**

Standard universal logic pattern features 9 columns per group, each column having 50 socket pins each that accept .3″, .6″, & .9″ IC's. Full size board is 6.875″ wide x 16.175″ long and contains 6 groups sharing common GND and VCC planes of 2 oz. copper each.

VME CARD CAGES AND POWERED CHASSIS

8170 series aluminum card cages feature a variety of heights, depths, and widths. Powered chassis provide a turnkey systems packaging solution to the design engineer. Assembled, ready-to-run systems combine a high-performance backplane, tightly regulated power supply with fully wired harness, a cooling unit, and subrack (card cage). Available for rack mount or tabletop use. Kits also available; *contact your local Newark sales office.*

Stock No.	Type	Description	Each
16F6354	8170-VME616-K1A	20-Position VME Bus Rack Mount Card Cage, 6U H x 160mm D w/Handles.	258.41

(3931) (ne08537)

VME & COMPACT PCI BACKPLANES

8160 series backplanes feature standard power cube terminals. VME bus J1/J2 monolithic backplanes with 6-layer construction provide controlled impedance, low crosstalk. Two power and ground planes with power cubes for even power distribution. Five user-definable auxiliary power busses for special applications. On-board termination. Available in sizes from 3 to 21 slots. Compact PCI backplanes conform to latest cPCI spec.; 32-, 64-bit compatible; supports 66 mhz transfers & 5.0v and 3.3v signaling; may be ordered with 'M' type power connector or power cubes; available in 3U/6U heights with 3 to 8 slots; compatible with C-MAC cPCI bridge for expansion past 8 slots.

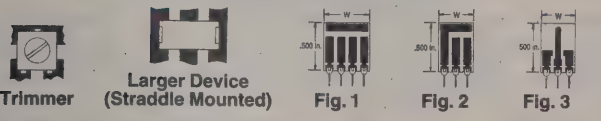
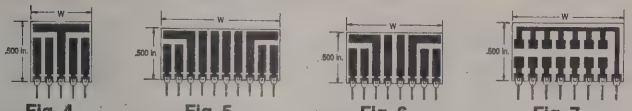
SURFACE MOUNT AND THRU-HOLE BREADBOARDS

6000 SERIES SURFACE MOUNT BOARDS AND THRU-HOLE BREADBOARDS





Miniature breadboard modules for SMD devices. Many models feature pins on 0.100″ centers for use with out breadboards and sockets. Several models feature large foil areas that accept a wide range of device footprints or can be modified to create new footprints. **6000 series** is for 2 and 3 terminal devices. **6000, 6100, 6400, 6500,** and **6800 series** all provide universal pads in various configurations. **6400 series** accepts SOT-89 devices. **6900 series** accepts 1206 or mini-melf packages with a common pin. Figures 1-7 show the basic pattern for each 6000 series model. The pattern is repeated in models with higher pin count (see table).

Stock No.	Type	Fig.	Pins	Width (W)	1-9	10-24	25-49

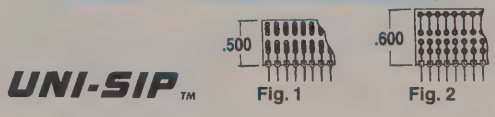
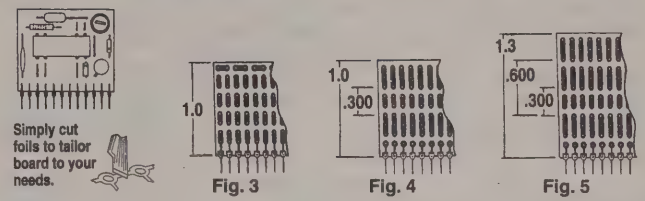
UNI-SIP™ THRU-HOLE MODULES





UNI-SIP™ breadboard modules feature pins on 0.100″ centers with useful hole patterns and pad designs. Ideal for building prototype and production modules. 0.037″ diameter holes. **3000** and **4000 series** accept 0.300″ wide ICs; **5000 series** accommodates both 0.300″ and 0.600″ wide ICs.

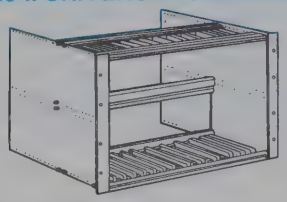
VME BACKPLANES AND SUBRACKS

KM6-II UNIVERSAL SUBRACKS



Strong and versatile subracks are easy to assemble. Feature tie bars that are of a large section for rigidity and are secured using 2 fixing screws into counterbored holes; the screws act as location dowels, giving a high degree of accuracy. Capable of housing Eurocards of different sizes in a variety of configurations. 19″ Eurocard compatible (IEC 297-3); backplane compatible. The 240 or 360mm endplates incorporate a series of punched holes so that the tie bars can be assembled at any required position. 360mm endplates have a pattern of additional holes for fixing the chassis system. Supplied without front handles. The conductive finish promotes electrical conductivity. All extrusions: aluminum alloy BS 1474 6063T6. End plates: 2 and 2.5mm aluminum BS 1470 5251-H24 (NS4 H6). Tapped strips: MS zinc pass. Finish: conductive, except rack mounting angles and handles, which are anodized. Conform to IEC 297-3.

Stock No.	Type	Dimensions H	W	D	1-4
16F7773	950-202594G	3U	84 HP	360mm	81.25

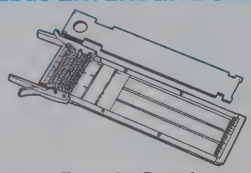
(3934) (ne08647)

VMEbus EXTENDER BOARDS



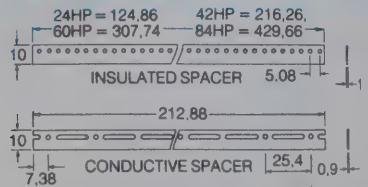
Extender Board

Extender boards feature multilayer design and full ground plane plus individual signal track screening. Signal pin-out identification is silk-screened onto outer layers. Jumper links allow signal line interrogation. Facility for logic analyzer or terminator module connection. Includes card eject/support mechanism. Conversion kit combines J1 and J2 extender boards to 6U high.

Stock No.	Type	Description	1-4
16F7762	243-26487G	J1 Extender Board	327.96
16F7763	243-26499H	J2 Extender Board	327.96
16F7764	188-27542E	6U Conversion Kit	20.40

(3933) (ne08646)

BACKPLANE INSULATING SPACER STRIPS



Insulating type spacer strips are available in 1- and 2- level versions, each having half shears to aid assembly. The 2-level version is used on center rear tie bars. The 84 HP strips can be easily cut down for smaller widths. Material: 0.04″ insulating/gray PVC, rated UL94V-0; conductive, 1mm MS zinc and passivate.

Stock No.	Type	Description	1-9
16F7765	950-10014H	1-Level Insulating Spacer	1.87
16F7766	950-10015E	2-Level Insulating Spacer	2.69

35 SERIES PCB-TAINER™ RETAINERS

NEW

35-1, 35-7 Series

35-6 Series

Without flared entry for 0.063″ board thickness. Perfect where metal guides required. Spring loaded to clamp PC boards. Moderate heat transfer and vibration applications. Electrically and thermally conductive. 0.008″ thick beryllium copper, ¼H per QQ-C-533 and finished with cadmium plate per QQ-P-416, type II, class 2. Thermal resistance, 12°/C/W/in. Install with rivets, screws or adhesives.

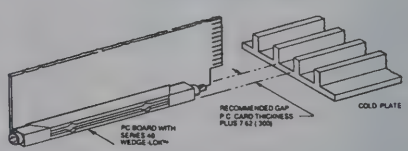
40 AND 42 SERIES WEDGE-LOK™ RETAINERS

NEW

40 Series
· Zero Entry Force



Zero insertion force locking retainers for heavy shock, vibration and heat dissipation in cold plate/heat sinking applications. Provide maximum clamping action for PC boards. Housing wedges constructed of aluminum alloy 6061-T6 QQ-A-200/8 and finished with chemical film per MIL-C-5541. Stainless steel 0.09″ hex, socket head cap screw with passivate finish per MIL-S-5002. Thermal resistance: 2°C/W/in. Can be mounted to PC board or cold plate with rivets, screws or adhesives.

Stock No.	Type	Length	Max. Expanded Width	Max. Retention Force (lb.)	1-9	10-24

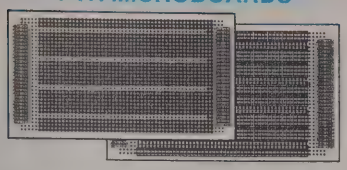
PROTOTYPING BOARDS AND ACCESSORIES

PTH MICROBOARDS



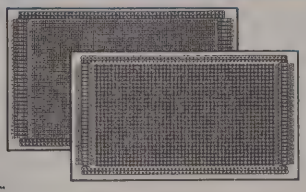
- **DIN 41494 Compatible**
- **Medium Packing Density**
- **DIN 41612 Connector Position, Up to 96/96 Ways, Front and Rear**
- **Solder-Resistant Protection to Component Side of Board**
- **2Vcc Power Rails and 0-Volt Ground Plane**

Specifically designed for microprocessor applications in which high reliability, freedom from crosstalk, and interface capability are requirements. Fully compatible with **KM6-II series**, *order separately on page 610*, and equally suited to soldered or wire-wrapped interconnections. While a PTH board is soldered, capillary action draws the solder around the component leads forming extremely solid, reliable joints, which is important in high-vibration applications. A copper colander 0-volt ground plane is provided on the component side of the board. It is recommended that the component side be used for interwiring with looms lying flat on the ground plane surface, reducing crosstalk from signal lines coupling directly to the ground plane. Board material: epoxy glass. PTH: BS 4584 EP-GC-Cu 3 FR4. Maximum working temperature: 155°C. Nominal board thickness: 1.6mm. Laminate copper thickness: 35µm. Plated copper: 25µm. Tin-lead: 10µm. Hole grid: 2.54 x 2.54mm. Hole dia.: 1.02mm. Bare boards are UL recognized, file no. E116551; approved to BS9762.

Stock No.	Type	Board Dimensions	Rows/Pads	1-4
16F7748	222-2991F	100 x 160mm	4/44	**58.48**
16F7749	222-2992B	100 x 220mm	4/67	**82.29**
16F7750	222-2993J	233.4 x 160mm	11/44	**128.33**

(3938) (ne08651)

PTH SQUARE PAD BOARDS



- **DIN 41494 Compatible**
- **Maximum Packing Density**
- **DIN 41612 Connector Position, Up to 96/96 Ways, Front and Rear**
- **Total Flexibility Using Hard Wire or Wire-Wrapping Techniques**
- **Solder-Resistant Protection to Component Side of Board**

By having plated thru-holes, these boards are able to provide the same high density and flexibility as the square pad Eurocards but for hard wiring applications. Compatible with **KM6-II series**, *order separately on page 610*. A high level of interfacing may be achieved with boards able to accept 96/96 way DIN 41612 connectors. 2 power rails are provided along the length of the board and a colander ground plane affords maximum screening to the component side of the board. Base material: epoxy glass. Hole grid: 2.54 x 2.54mm. Hole dia.: 1.02mm. Bare boards are UL recognized, file no. E116551; approved to BS9762.

Stock No.	Type	Board Dimensions	No. of Pads		1-4

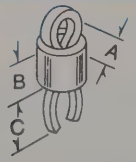
(3939) (ne08652)

TERMINAL ASSEMBLIES



Designed to act as a terminal on PC boards for attachment of scope probe, etc. Spring design allows the terminal to be inserted into a plated thru-hole board without damaging the hole plating. Terminal will remain in place when the board is reversed for soldering. The sintered glass bead has a recommended maximum working temperature of 475°C. Color: black. **Sold in packages of 100.**

Stock No.	Type	Hole Dia.	Dimensions			1-4
			A	B	C

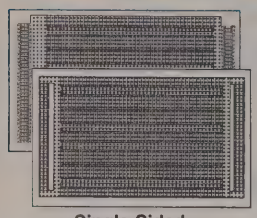
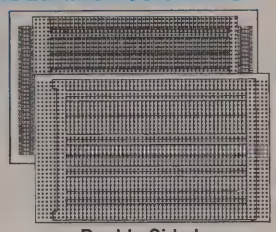
SINGLE- AND DOUBLE-SIDED MICROBOARDS



Single-Sided



Double-Sided

- **DIN 41494 Compatible**
- **Medium Packing Density**
- **DIN 41612 Connector Pattern, Up to 64/96 Ways, Front and Rear**
- **Both Boards Have 2 Power Planes**
- **Grid Print to Aid Component Layout**
- **Microbus Backplane Compatible**

The single-sided microboards are low-cost Eurocards with no 0-volt ground plane on the component side. The double-sided microboards have solder-resistant protection to component side of board and 0-volt ground plane screen. Compatible with **KM6-II series**, *order separately on page 610*. Board material: epoxy glass. Double/single-sided copper: BS 4584 part 16. Maximum working temperature: 155°C. Nominal board thickness (including copper): 1.6mm. Copper thickness: 35µm. Hole grid: 2.54 x 2.54mm. Hole dia.: 1.02mm.

Stock No.	Type	Description	Board Dimensions	Rows/Pads	1-4
16F7757	10-27563H	Single-Sided	100 x 160mm	4/46	**22.36**

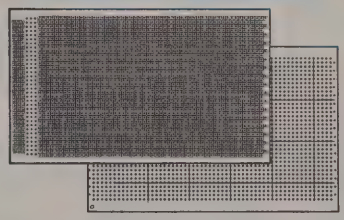
(3941) (ne08654)

SQUARE PAD BOARD



- **DIN 41494 Compatible**
- **Maximum Packing Density**
- **DIN 41612 Connector Pattern Up to 96/96 Ways**
- **Total Flexibility Using Hard Wire or Wirewrapping Techniques**
- **Grid References to Both Sides of Board**
- **Microbus Backplane Compatible**

Any size of wirewrapping DIP socket or terminal pin can be accepted in either X and Y planes. Vcc and 0-volt rails may be daisy chained from post to post around the board, eliminating the need to stake pins in power rails. Compatible with **KM6-II Series**, *order separately on page 610*. N.B. component grids compatible with connectors. Board material: epoxy glass. Double-sided copper: BS 4584 part 16. Maximum working temperature: 155°C. Nominal board thickness: 1.6mm. Copper thickness: 35µm. Hole grid: 2.54 x 2.54mm. Hole dia.: 1.02mm.

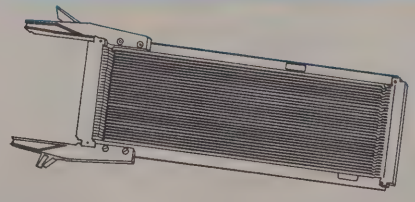
(3942) (ne08655)

DOUBLE-SIDED EXTENDER BOARDS



- **Eurocard Compatible**
- **Solder-Resistant Coating to Prevent Solder Bridging and Finger Staining**

Enable testing of single- and double-height Eurocards, both 160 and 220mm deep, using DIN 41612 type B and C connectors. Plug directly into a subrack connector with the unique support/ejector mechanism at the front supporting the board under test. Terminal assemblies (supplied with the boards) may be fitted to the board to allow easy attachment of scope probes typically for measuring voltage levels.

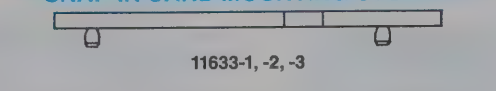
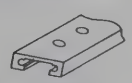
SNAP-IN CARD MOUNTING SYSTEM



11633-1, -2, -3

11633-4, -5, -6

11633 Series Tapered End



40790

40791

Mounting system consists of snap-in card guides and punched, fixed-space mounting bars. Snap-in card guides mount on prepunched 1/16″ or 3/32″ metal plates or on the special mounting bars ordered separately. **Type 11633** card guides have tapered ends. Guide tracks are 0.075″ wide x 0.125″ or 0.075″ deep to securely hold cards in place. High-grade nylon guides are self-lubricating, nonconductive, and provide excellent isolation from shock and vibration **Type 11633**. Guide thickness: 0.175″. Precision-punched 17″ mounting bars are constructed of extruded aluminum and feature two mounting holes on each end to eliminate twisting. Punched with 0.500″, 0.600″, 0.700″ and 0.750″ centers.

EUROCARD/VME E-Z-JECT™ EJECTOR SYSTEMS

E-Z-JECT™ Handle

3U

Use with Eurocard cages (IEC), such as VMEbus, to make card removal easy by providing leverage against guide mounting surface for positive extraction. The patented E-Z-Ject™ handle provides a quick and easy method of removing daughterboards or plug-in modules from Eurocard format card cages, using 96-pin DIN connectors. The E-Z-Ject™ design complies with IEC and VME specifications governing front panel and board mount components. Choice of three ejector kits. **Types 32027, 32028** have upper mounting hole, **types 32010, 32020** have lower mounting hole in center bracket panel. **Types 32094, 32226** and **32091** for tall components; **types 32152, 32011** and **32128** for wire wrap components.

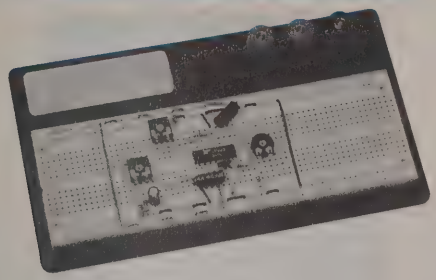
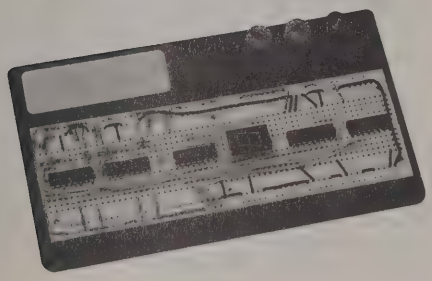
PROTOTYPING EQUIPMENT

PROTOTYPING PROJECT KITS

NEW



2347



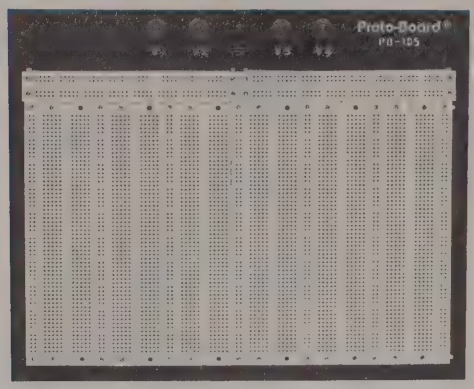
2349

Ideal tool for learning circuit design and improving one's knowledge of electronics. Hands-on understanding that's perfect for science classes, hobbyists, ham radio operators, and technology programs. For use with **type 2344** prototyping breadboard lab station; *order separately on page 614.* Choice of 7 different project kits. Each kit contains an easy-to-read tutorial and a complete set of necessary components, so there is no need to hunt for parts. *Order breadboards separately on this page.*

Stock No.	Type	Project Kit Topics	Each
92N4389	2345	Opto-Devices, Including LEDs, Alpha/Numeric Displays, and Optocouplers	**29.99**
92N4390	2346	Clocks, Including Multivibrators, Voltage Controlled Oscillators, and Tone Generators	**12.99**
92N4391	2347	Function Generators, Including IC Designations, Frequency of Operation, Output Amplitude, and DC Output Levels	**19.99**
92N4392	2348	Gates (Logic Building Blocks), Including Digital Circuits, OR, AND, NOR, and NAND Gates	**17.99**
92N4393	2349	Counters Including Flip-Flips, Synchronous, Asynchronous, Ripple, and Ring Counters	**17.99**
92N4394	2350	Medium-Scale Integration, Including Multiplexing, Memory, Comparator, ROM, RAM, and Timing Charts	**34.99**
92N4395	2351	Analog Circuits, Including Phase-Locked Loop, Loop Behavior, OP Amps, and Active Filters	**15.99**

(29695) (ne29695)

SOLDERLESS PROTOTYPE SYSTEMS



2025

Choose from 5 different breadboard types that can be used for various prototyping circuit applications. Feature QT sockets and bus strips mounted on rugged back panels. The preferred wire size for all types is 22 AWG. Initial contact resistance is less than 0.5 milliohm; after multiple uses, this reduces to less than 0.4 milliohm.

Stock No.	Type	Binding Posts	IC* Cap.	Ter-minals	Tie Pts.	Width	Each

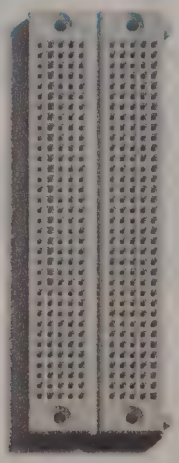
92N3788	2025	5	48	912	4560	11.4″	**94.99**

*IC capacity based on 14-pin ICs

(19226) (ne11105)

QUICK TEST SOCKET BREADBOARDS

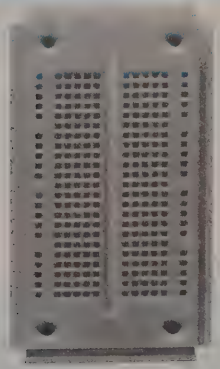


Patented tab/keyway feature for unlimited expansion of boards. Vinyl back prevents shorting. Accept all components with leads up to 0.033″. Conductive spring clips inside the board grab component leads and connecting wire securely. Parts plug in/pull out without soldering or damage. Molded-in mounting holes permit front mounting to backplate or other surfaces. 22 AWG wire preferred. **Type 2028** is 1.32″ wide and **type 2029** is 0.36″ wide.

92N3791 Type 2028. **Each** **4.99**
92N3792 Type 2029. **Each** **2.85**

(19230) (ne11109)

SOLDERLESS BREADBOARDS



Boards feature vinyl backs that prevent shorting. Offer unlimited expansion that allows a user to combine boards. Accept all components with wire leads up to 0.033″. Molded-in mounting holes permit front mounting to backplate or other surfaces. The preferred wire size is 22 AWG. **Type 2026** is 2.2″ wide and **type 2027** is 2.1″ wide.

92N3789 Type 2026. **Each** **10.87**
92N3790 Type 2027. **Each** **7.99**

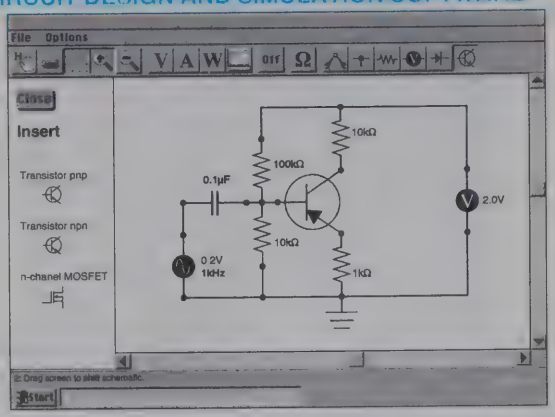
CIRCUIT DESIGN AND SIMULATION SOFTWARE

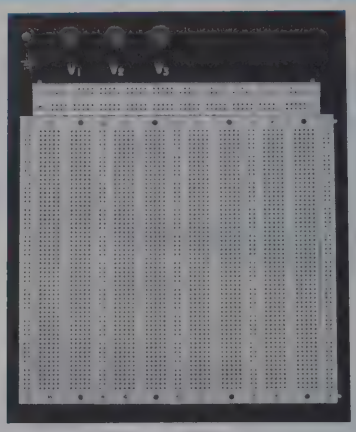
NEW



Easy-to-use circuit design software that works as a simulated prototyping lab. Create AC and DC circuits with "click and drag" component placement and on-line help. Select from a complete list of active and passive components that can be inserted on a grid, similar to a breadboard. Analyze circuits accurately by using 5 virtual instruments: voltmeter, ammeter, wattmeter, oscilloscope, and ohmmeter. Pre-designed circuit library included. System requirements: IBM® PC-386, 4MB RAM, SVGA graphics, Windows® 3.1 or Windows® 95.

92N5939 Type 3279. **Each** **99.50**
(28574) (ne28574)

POWERED BREADBOARD SYSTEMS



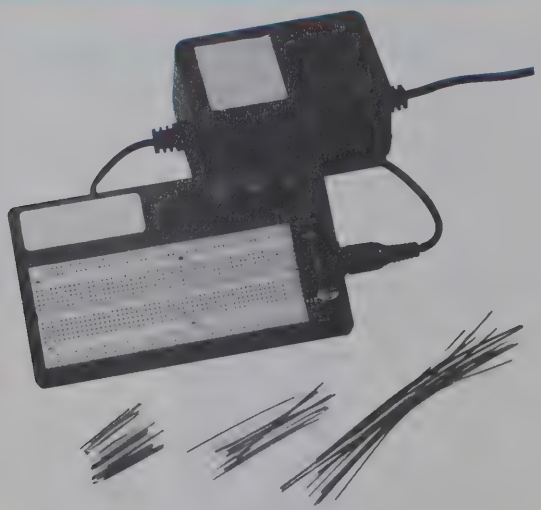
2031

Powered boards have 4 binding posts, 450 terminals, 2250 tie points, and handle 24-pin ICs. Ideal for various prototyping circuit applications. Preferred wire size: 22 AWG. Initial contact resistance is less than 0.5 milliohm; after multiple uses this reduces to less than 0.4 milliohm. **Type 2030** features 3 separate power supplies: 5VDC @ 1A set, +5.5-18VDC @ 0.5A adjustable, and -5.5-18VDC @ 0.5A adjustable. Voltages adjust easily with screwdriver. **Type 2031** features 3 separate power supplies: 5VDC @ 1A, +12VDC @ 0.25A, and –12VDC @ 0.25A. Includes an external, plug-in power pack.

92N3793 Type 2030. **Each** **239.99**
92N3794 Type 2031. **Each** **149.99**
(19228) (ne11107)

PROTOTYPING BREADBOARD LAB STATION

NEW



Ideal for prototyping circuit application. Station includes: **type 2021** solderless breadboard; DC power pack power supply rated +5VDC @ 1A, +12VDC @ 250m, –12VDC @ 250mA; a power connector to connect power supply to breadboard; and **type 2032** jumper wire kit containing 25 precut pieces of color-coded, 22 AWG, insulated solid hook-up wire.

92N4388 Type 2344. **Each** **89.99**
(29694) (ne29694)

JUMPER WIRE KIT

Kit comes in a plastic case containing precut/prestripped/preformed 22 AWG insulated solid hook-up wire. 25 pieces each of 14 color-coded lengths from 0.1″ - 5.0″.

92N3795 Type 2032. **Each** **14.99**
(19231) (ne11110)

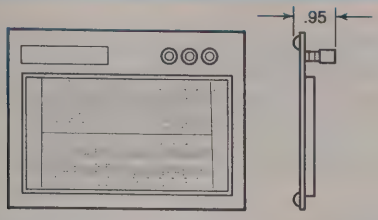
BREADBOARDS, TEST CLIPS AND ACCESSORIES

300 SERIES SOLDERLESS BREADBOARDS



For easy, solderless plug-in circuit building. Terminal positions contain electrically connected tie-points spaced on a continuous 0.100″ matrix to accept any component with 0.100″ lead spacing. Five-way binding posts provide interface for connections from power supplies, signal generators or other equipment. Steel base has baked enamel finish. Rubber feet reduce sliding during bench work. Jumper wires included.

Stock No.	Type	Width	Tie Points	Binding Posts	1-9
92F1460	922306	5.4″ (137.2)	610	2	14.50

PLCC, DIP AND SOIC TEST CLIPS

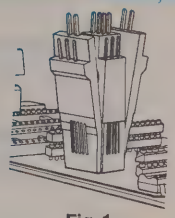

Fig. 1

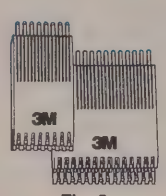

Fig. 2

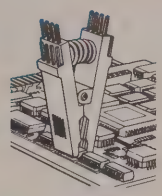

Fig. 3

PLCC SURFACE MOUNT TEST CLIPS—FIG. 1

Wedge design provides faster, easier attachment to plastic leaded chip carrier (PLCC). Helical compression spring and insulated contact combs assure integrity in contact when testing. Narrow body design allows component testing of devices with 0.050″ (1.27) center-to-center lead spacing. Side stackable at 0.200″ (5.08) row-to-row spacing between devices. 0.025″ (0.635) square contact pins on 0.100″ (2.54) centers. Available in alloy or gold-plated leads.

SOIC TEST CLIPS—FIG. 3

Small outline integrated circuit (SOIC) test clips are designed for smaller components and higher densities. Industry standard 0.025″ (0.635) square contact pins on 0.050″ (12.7) centers. Centers are staggered to allow easy attachment of female socket connectors or wire wrapping and help prevent shorting of adjacent probes. Stacking of SOIC's as close as 0.050″ (12.7) end-to-end. Available in alloy or gold plating.

CONTACTS AND SOCKETS/RECEPTACLES

REPLACEABLE SPRING-LOADED POGO® CONTACTS AND SOCKETS

Pylon replaceable spring-loaded POGO® contacts provide high performance in testing and interconnect applications utilizing spring probe technology. Biasing-Ball construction maximizes wiping contact of plunger to inner diameter of probe body. Gold-cladded lining on inner diameter and/or gold plated contact body provides superior surface conditioning for consistently low contact resistance over life (typically 1,000,000 cycles). Gold plated plunger and socket. Stroke full/working: + is 0.075″/0.050″; † is 0.100″/0.070″; * is 0.125″/0.080″; ‡ is 0.170″/0.110″; ** is 0.250″/0.170″. **Sold in packages of 10.**

CONTACTS AND SOCKETS

NON-REPLACEABLE SPRING-LOADED POGO® CONTACTS

Constructed of an outer tubular body and an inner spring-loaded plunger. Contacts have rugged, 1-piece machined bodies. Materials: gold-plated beryllium copper. For applications in test and interface assemblies where multiple connections must be made. **Sold in packages of 10.**

0.050″ CENTERLINE/0.030″ TRAVEL—MAX. CURRENT 2 AMPS*

Type AS solder pot termination (diameter 0.025 x 0.045″ DP). Gold-plated plunger and socket. **Type AAS** solder pot termination (diameter 0.022 x 0.050″ DP). Gold-plated plunger and gold-lined socket with no plating.

MECHANICAL TEST FIXTURES FOR LOW-VOLUME PC BOARD RUN

Fixtures are ideal for testing bare and loaded printed circuit boards with approximately 100 test points. They provide access to test points located on the solder side of a loaded PC board, or on one side of a bare board. Supplied in blank form for customer finishing. *Order non-replaceable spring-loaded POGO® contacts separately on this page. Order POGO® contacts and sockets separately on page 616.*

ETCHED CIRCUIT PRODUCTS

DRY FILM PHOTO RESIST

DF series 0.0013″ thick dry film is a rugged emulsion during all stages of processing. Dry film laminated to the copper surface of panels is protected by a Mylar cover sheet. A latent image is visible after exposure. Cover sheet is removed prior to developing. Developer and stripper are mild caustic/aqueous chemistries.

KPR TYPE 4 PHOTO RESIST

S series liquid resist is roller coated and infra-red cured on the copper surface, ensuring uniform coating thickness. Consistent exposure times and sharp images parallel to dry film results. Developer and stripper are solvent chemistries. Complete instructions included with all products.

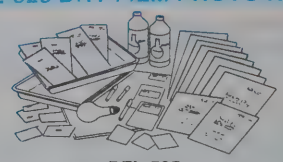
NEWARK STOCKS MORE PRODUCTS THAN ANY OTHER ELECTRONICS DISTRIBUTOR!

TYPE DFL-525 DRY FILM PHOTO RESIST KIT



DFL-525

Kit includes: approximately 7 square feet of copper clad photosensitized with DFR-4713 dry film photoresist; assortment of FR-4 glass epoxy and CEM-1 epoxy composite laminates, both single and double-sided; two 10 x 12″ plastic chemical trays; developing solution; 2 qt. etching solution; cleaning pads; photo printing frame and clamps; exposure lamp and complete instructions. Designed for lab or professional prototype use.

00Z1481 Type DFL-525. **1-4** **241.89**
(3828) (de50748)

PROFESSIONAL PHOTO RESIST ETCHED CIRCUIT KITS

Produce three 3 x 6″ circuit boards using **type DFP-101-B** professional photo-etch methods kit. CEM-1 Epoxy Composite boards are pre-sensitized and require only sunlight or #2 photoflood lamp to expose. May be handled in subdued incandescent light. Kit includes: one 3¼ x 7½″ plastic etching tray; one 3¼ x 7½″ aluminum developing tray; 3 x 6″ print frame glass; 8 oz. etching solution (ferric chloride); three 3 x 6″ one-sided dry film photosensitized epoxy composite copper clad; three 3 x 6″ sheets mechanical negative; cleaning pad; resist marking pen; instructions. **Type DFP-101-G** is the same as above, but with FR-4 glass epoxy copper clad.

00Z1482 Type DFP-101-B. **1-4** **29.30**
00Z1483 Type DFP-101-G. **1-4** **29.99**
(3829) (de50749)

PHOTO REVERSING KIT

Type FK-701. Make line negatives from artwork prepared on transparent film or reverse negatives to positives with just two simple steps. Photosensitized film is contact exposed, then developed by rinsing with hot water. No darkroom, tanks, trays or chemicals required. Includes two pieces 10 x 24″ 2-mil reversing film and sponge pads to assist in developing.

00Z1502 Type FK-701. **1-2** **28.06**

IMMERSION TIN PLATING KIT

Type ITP-801A. Three minute immersion at room temperature deposits essentially pure, bright, shiny tin plating, approximately 0.00001″ thick on oxide-free copper surface of etched PC boards. Plating with tin improves solderability and retards oxidation, providing extra storage life to unassembled PC boards. Includes all necessary materials to plate 25 square feet of etched PC board material.

00Z770 Type ITP-801A. **1-2** **48.55**

DIN RAIL MOUNT POWER SUPPLIES

UNIVERSAL ENCAPSULATED SWITCHERS-30 WATT

AC/DC switching power supplies are small rugged design with DIN rail and chassis mounting capabilities. AC and DC optional switchers designed for industrial systems, monitoring equipment, and instruments. AC input voltage: 85 to 265VAC. DC input voltage: 100 to 375VDC. Input frequency: 50 to 400Hz. Holdup time: >50ms. Dimensions: 4.71 x 2.55 x 1.2″. Operating temperature: -40° to +65°C. UL listed, CE compliant, VDE approved. 5-year Warranty.

SDN SERIES DIN RAIL MOUNT POWER SUPPLIES

Power supplies have snap-on DIN rail or chassis mount capabilities. Fully enclosed metal housing with easily acccessible screw terminals. Parallel operation is possible via its voltage-drop method. Extended temperature: –60°C without derating. Nominal input voltage frequency: 47-63Hz. Nominal output voltage; tolerance: ±2% overall, ripple: <20 mVpp including spikes. Global safety specifications: EN60950, EN60204 UL 1950, UL 508 listed, CSA certified, CE complaint. H x D: 4.88 x 4.04″. Chassis mount brackets **sold in packages of 2**. *Order* **type SDN-PMBRK** *chassis mount brackets separately below.* 2-year warranty.

UNIVERSAL ENCAPSULATED LINEAR POWER SUPPLIES

Encapsulated linear power supplies are available in dual and triple outputs or as single 24V or 30V output in series. Applications include sensitive electronics and analog circuitry. Rugged enclosed package with screw terminals and DIN rail clips for easy installation and maintenance. DIN rail or chassis mount. AC input voltage: 115/230VAC ±10%. Input frequency: 47-63Hz. Operating temperature: 4 watt, -25° to +70°C; 10 watt, -20° to +50°C. Dual output units can be combined for a total output voltage of 24V or 30V. Dimensions: 4.31 x 2.0 x 0.9″ (4Watt), 4.71 x 2.55 x 1.29″ (10Watt). UL listed, CE compliant, VDE approved. 5-year warranty.

GENERAL PURPOSE OPEN-FRAME SWITCHING POWER SUPPLIES

Type S82J economical and compact, open-frame switching power supplies feature built-in overload protection, and operation indicators. Input voltage: 85-132VAC, 47-450Hz. Convection cooled. FCC class A. UL recognized, CSA certified, CE compliant and VDE approved. Mounting brackets included.

Stock No.	Type	Power Rating	Output Voltage/Current	H x W x D	Each
16F8285	S82J-0124	10W	24V/0.5A	3.8 x 1.4 x 3.9″ (97 x 35 x 100)	197.30

300W

HIGH-POWER, ENCLOSED SWITCHING POWER SUPPLIES

600W

Type S82D power supplies are ideal for high-power applications. Input voltage: 85-132VAC or 170-264VAC (47-450Hz), switch selectable. Built-in fan keeps unit cool. Equipped with overvoltage and overload protection. Built-in remote sensing function corrects voltage drop in load wiring. Remote control function allows unit to be turned ON or OFF with an external signal. UL recognized, CSA certified.

Stock No.	Type	Power Rating	Output Voltage/Current	H x W x D	Each
52F4189	S82D-3024	300W	24V/14A	3.6 x 4.7 x 8.8″ (92 x 120 x 224)	834.22

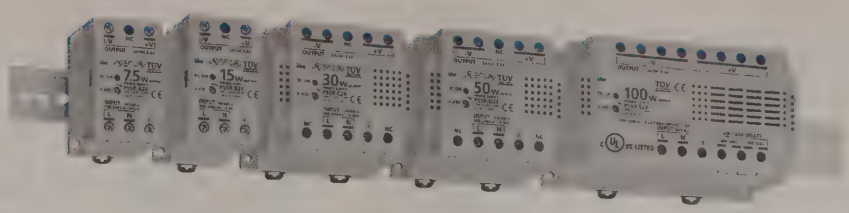
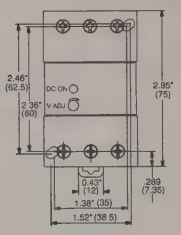
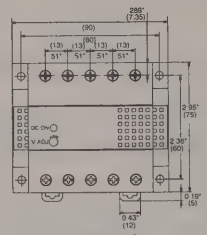
PS5R SWITCHING POWER SUPPLIES

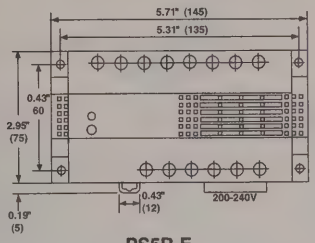




PS5R-A
PS5R-B



PS5R-C
PS5R-D



PS5R-E

Compact design offers universal AC input voltages from 85 to 264VAC and DC input voltages from 105 to 370VDC, except **type PS5R-E**, 100-120VAC or 200-240VAC (switchable). 5 different output capacities in either 12VDC or 24VDC. DIN rail or panel mount. UL listed. cUL listed. TUV approved. CE compliant.

Stock No.	Type	Watts	Input Current	Output VDC/A	Typical Efficiency (%)	H x W x D	Each

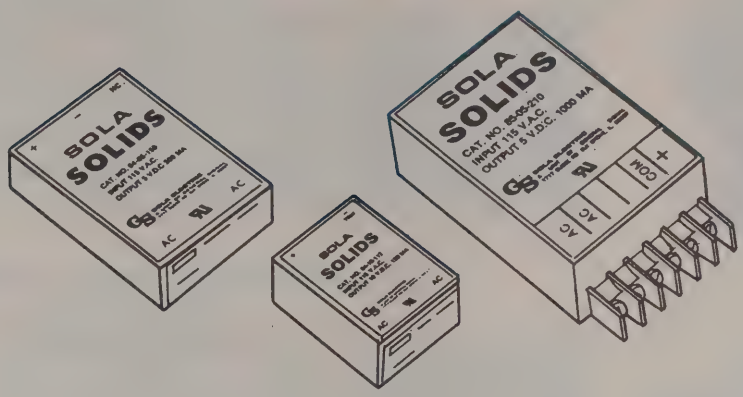
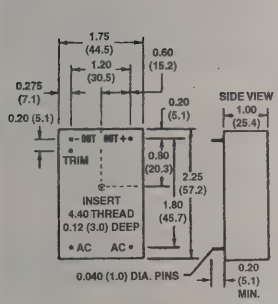
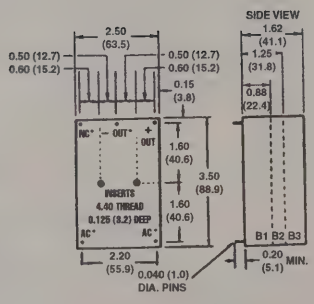
POWER SUPPLIES

84 & 85 SERIES LINEAR ENCAPSULATED POWER SUPPLIES

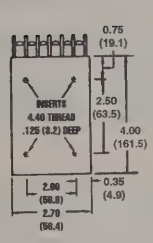


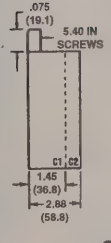


Case A

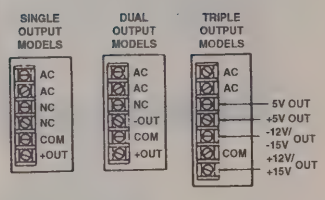


Cases B1, B2, B3





Cases C1, C2



- **Single, Dual and Triple Output Models**
- **PC Board Mounting or Chassis Mount**
- **Solid, Dependable, Rugged**
- **Automatic Overload Protection**
- **Operation at Rated Load from –25°to +50°C Ambient**
- **Plug-In Mating Sockets Available**
- **Fully Tested**
- **Full Two-Year Warranty**

Power supplies are available in single, dual and triple output models. **84 series** for printed circuit board mount. **85 series** for chassis mount. Units are fully tested and carry a two-year warranty. Input voltage: 115VAC ±10VAC. Input frequency: 50 to 400Hz. Output voltage accuracy: ±1.0% maximum. Ripple and noise: 0.5 to 2mV RMS. Line Regulation: ±0.05%. Short circuit protection: Automatic. Overvoltage crowbar: 5V outputs, 6.2V nominal. Isolation voltage: 2500VRMS. Isolation resistance: 50 megohms. Temperature Range: –25° to +71°C. UL recognized, CSA certified.

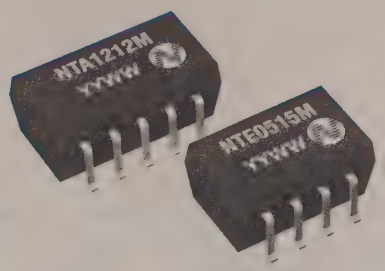
NEW MINIATURE ISOLATED PC-BOARD DC-DC CONVERTERS

1W DUAL-OR SINGLE-OUTPUT DC-TO-DC CONVERTERS

- **Reflow at 280°C for 10 Sec. (CECC00802 Profile)**
- **Operating Temperature: -40°C to 85°C with No Heat Sink and No Derating**
- **Ideal for HighVolume Applications • Same Price as Leaded Versions**



1kV isolation. Single size: 12.7 x 6.6 x 11.2mm. Dual size: 15.2 x 6.6 x 11.2mm. Surface mount (SOIC). **Also available in tape and reel packaging**, *contact your local Newark sales office for details.*

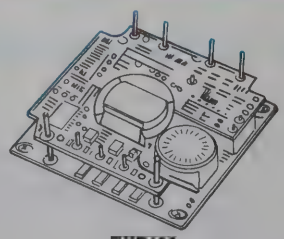
BXB75



BXB100

- DC Input: 36-75VDC
- Industry-Standard Footprint
- High-Efficiency Up To 89%
- 2:1 Input Range for Battery-Powered Applications
- Adjustable Output Voltage
- Fixed Frequency (400kHz)
- UL 1950, CSA C22.2-234/950, VDE EN60950

The **BXB75 and BXB100 series** are high-power density DC/DC converters packaged in the industry standard footprint (2.40 x 2.28 x 0.50″). Suitable for a wide range of applications in nearly any industry, the **BXB75 and BXB100 series** were particularly designed with communication and distributed power applications in mind. Aluminum baseplate technology with 4 threaded inserts makes heatsink attachment and optimum thermal management easy. 2-year warranty. UL listed, CSA certified, VDE approved, CE compliant.

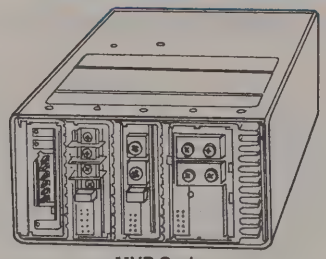
MVP SERIES POWER SWITCHERS

CE



MVP Series

1 year warranty

- **Power Factor Correction**
- **Remote Sense on All Outputs with Ratings Greater Than 2A**
- **Overload Protection on All Outputs**
- **Voltage Adjustment on All Outputs**
- **Input OK Signal and Status Indicator LED**
- **Global DC OK Signal and Status Indicator LED**
- ***One-Year Warranty***

The **MVP series** serves as a versatile medium power solution. The standard features of the **MVP series** are considered options by other suppliers. **MVP** is a full-featured medium power modular product, with a PFC front end as a standard input utilizing SMT and innovative magnetic designs. Five standard DC to DC modules combined with PFC cases can be configured with 1 to 10 outputs ranging from 2 to 60 volts. **MVP** is available in both single and multiple output versions with millions of different output combinations as standard. Offering a compact footprint, the 400-watt package measures 2.5x5x10″ and the 600-watt package measures 2.5x5x11″. Both models are packaged in rugged enclosures with all external power connections made via self-locking screw terminals. Thermal management is facilitated by an internal, field replaceable fan. IEC EN61000-3-2 harmonic distortion compliance. CISPR 22, EN55022 Curve B conducted/radiated EMI. IEC 1000 immunity standards. Input: 85-264VAC, 47-440Hz. CE mark.

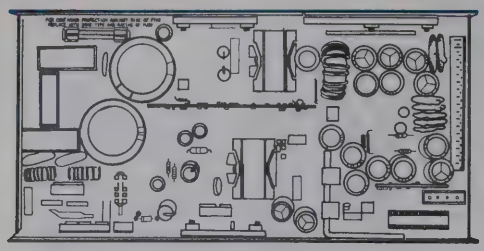
LAMBDA Electronics Inc.

POWER SUPPLIES

SV SERIES POWER SUPPLIES



- AC Input: 85-265VAC, 47-63Hz
- Low 1.77" Profile
- UL Recognized, CSACertified, CE Mark, VDE Approved

The **SV series** are 100W to 300W power supplies that offer both auto-selecting AC input and power factor-corrected AC input in the same mechanical package.

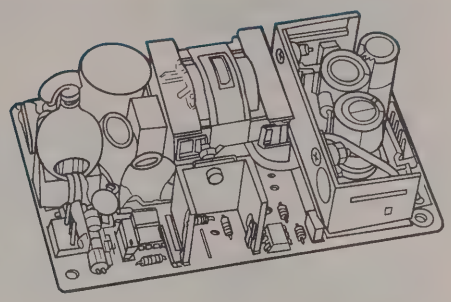
SINGLE- AND MULTI-OUTPUT SWITCHERS

GL SERIES SINGLE- AND MULTI-OUTPUT SWITCHERS



- Universal Input (85-264 VAC)
- On-Board Input Fuse
- Automatic Overload Protection
- OVP on Output #1
- IEC 950, CK LVD
- 100% Burn-In
- Power Fail Signal (110 and 200-Watt Models)
- Cover, Screw Terminals and Internal Fan (200-Watt Models)
- 1-Year Warranty

Compact design is ideal for personal computers, control circuits, drive circuits, CNC machinery, and instrumentation applications. UL recognized, CSA certified.

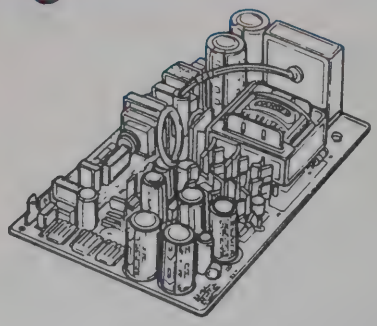
HIGH POWER, SWITCHERS AND CVDC POWER SUPPLIES

MULTI-OUTPUT SWITCHERS



- +5V Overvoltage Protection
- Automatic Overload Protection
- 20mS Holdup Time Minimum
- FCC Class A Emission Level
- 100% Burn-In
- Dual Input: 115/230VAC
- Short-Circuit Protected
- 1-Year Warranty

Provide power for applications such as CRT monitors, disk drives, terminals, peripheral equipment or microprocessor-based systems. All units voltage-selectable 90-130VAC/180-264VAC. AC input frequency range 47-63Hz. Typical efficiency 65%. Overcurrent and short-circuit protection. In-rush current: 40/50, 30A @ 115VAC, 60A @ 230VAC; 65/90, 10A @ 115VAC, 20A @ 230VAC; all @25°C ambient. Also feature 100% burn-in for 24 hours and built-in EMI filter. Line regulation: 0.2%. Load regulation: 1.0%. Operating temperature: 0°C to 50°C. UL recognized, CSA certified.

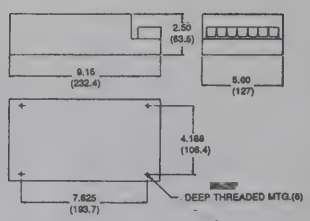
SINGLE-OUTPUT SWITCHERS



- Overvoltage Protection
- Automatic Overload Protection
- CE, LVD
- Enclosed or U Channel Construction
- Remote Sense
- Remote Shutdown
- One Year Warranty

Enclosed switching power supply units. Input voltage: 90-132 VAC/180 264VAC user-selectable. Input frequency: 47-63Hz, single phase. Input protection: external fuse required. In-rush current: 16 amps peak, 115 VAC. Output ripple: full rated load, 0.3% RMS total. Hold-up time: 100VAC/full load, 10mS minimum. Output overshoot: 2%. MTFB: 50,000 hrs. 100% burned in. UL recognized, CSA certified.

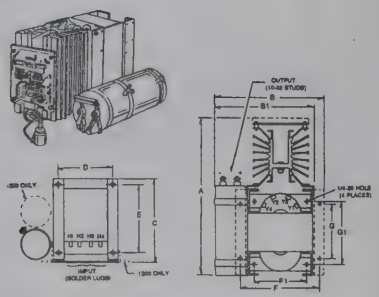
COPPERLINE HIGH POWER SINGLE-OUTPUT POWER SUPPLIES



- Universal 120/240 VAC, 50/60 Hz Input
- Single-Supply for Multiple Applications
- Parallel Operation for Increased Power Output
- Reliable SCR Design
- Reliable Connection Cooled Design

Brute force power supplies provide high-current DC that is continuously adjustable in either 2 to 25 or 5 to 50 volt ranges. Can be set to constant voltage or constant current operation. Can be used as battery charger in the constant mode. Adjustable damping for inductive loads enable units to drive relays, solenoids and motors. Maximum power efficiency: 75%. Regulation: ±0.1%. Input: 105-130/210-260 VAC, 47-63 Hz. Controls include: limit adjust (0-100%) output voltage adjust (10-100%). UL recognized.

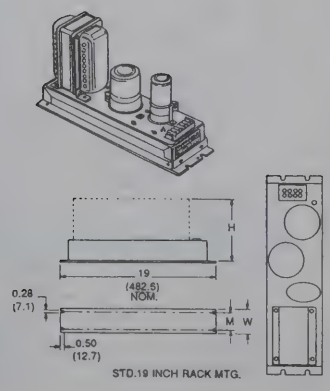
28 SERIES CVDC RACK MOUNT POWER SUPPLIES



- Isolated Output
- Short-Circuit Protected
- MTBF Greater Than 300,000 Hours
- 1-Year Warranty

Regulated DC power supplies with fixed outputs are available in rack mount designs. Short-circuit protection and MTBF greater than 300,000 hours. Input voltage: 100 to 130V, 60Hz. Output source frequency effect: Actual variation is approximately 1.4% voltage change for a 1% frequency increase or decrease. Line regulation: ±1%. Load regulation: ±5% (1/2FL to FL). Response time: 25 msec. Efficiency: full load, 80% to 90%. Current limit: 250% rated current. Operating temperature: 50°C. UL recognized.

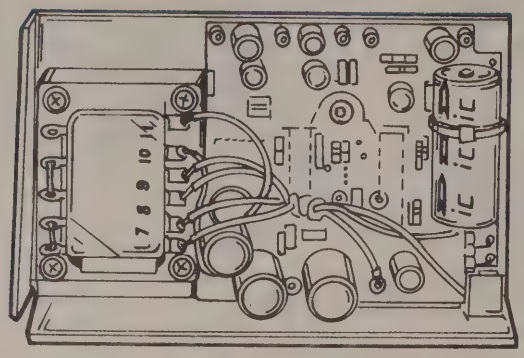
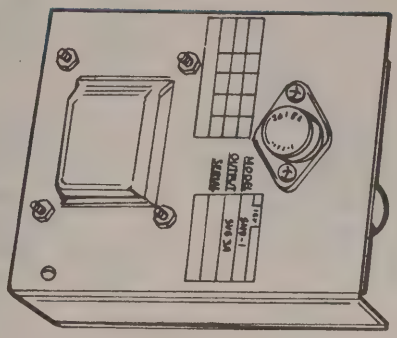
LINEAR POWER SUPPLIES

ACV/ATV SERIES OPEN-FRAME LINEAR POWER SUPPLIES





- **Worldwide Voltage Taps for 100, 120, 220, 230, and 240VAC Field-Selectable**
- **Built-in OVP on 5V Output, Optional OVP Modules Available for Other Outputs**
- **UL Recognized, CSA Certified, TUV Approved, CE Mark**

Truly-universal open frame linear power supplies operate at 47-63 Hz. Single phase; derate 10% for 50Hz. Input voltages: 100, 120, 220, 230 or 240VAC. Units meet system voltage requirements for Japan, Europe and the UK, including IEC 950, EN60950 Class I high voltage and leakage requirements. Overvoltage protection is standard on all +5V outputs. Operating temperature range: 0 to +70°C, with full convection rating to +50°C. Regulation line: ±0.05% for ±10% line change and 50% load change. UL recognized, CSA certified, TUV approved, CE compliant

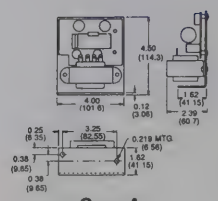
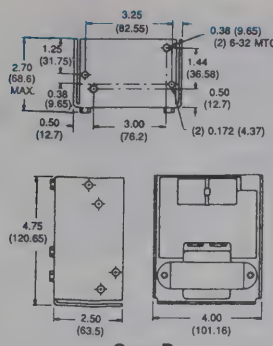
LINEAR POWER SUPPLIES

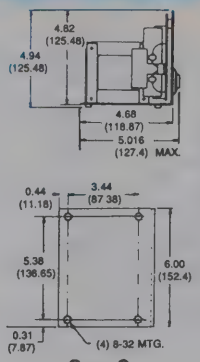
SINGLE-OUTPUT, REGULATED LINEAR POWER SUPPLIES



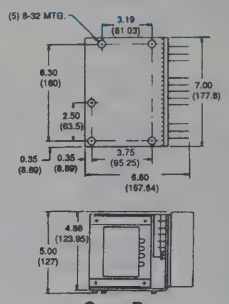
Case A



Case B



Case C



Case D

- Convection Cooled
- Remote Sense
- Constant Voltage
- Designed for Bench and Rack Use
- Completely Protected Short Circuit Proof; Automatic Foldback
- Current Limiting, Automatic Reset
- Isolated, Floating Output
- Low Noise and Ripple (PARD)
- Split Bobbin Design
- 100% Burn-In
- 1-Year Warranty

Precise integrated circuit regulators with superior drift characteristics. Used in microprocessor circuits, instrumentation, process controls and other applications. Convection cooled. Completely protected short-circuit proof, automatic foldback. Designed for both bench and rack use. Input: 104-127VAC, 208-254VAC. Input frequency: 50-60Hz. Output PARD: 0.1% pk/pk. Periodic deviations: 10mv rms. Output voltage adjustment: ±5% minimum. Operating temperature: 0°C to 55°C. Input/output isolation: 1000 megohms DC/2500VAC. UL recognized, CSA certified.

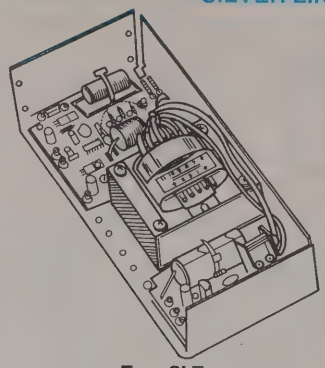
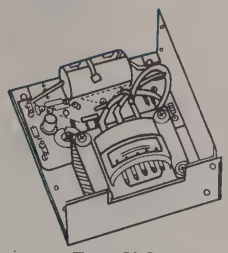
LINEAR POWER SUPPLIES

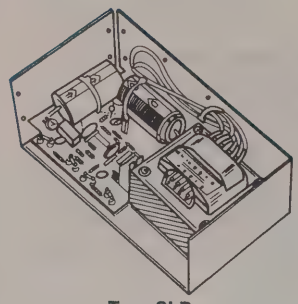
SILVER LINE LINEAR POWER SUPPLIES



Type SLT



Type SLS



Type SLD

- **Screw Terminal Connections**
- **Input Voltage: 100/120/220/230/240AC**
- **Input Frequency: 47-63Hz**
- **100% Burn-In**
- **Line and Load Regulation Combined 0.1%**
- **Ripple 3.0mV Maximum Peak-to-Peak**
- **Automatic Current Limiting**
- **DC Output Adjustable 10% Minimum**
- **Temperature Range: 0°C to +50°C**
- **1-Year Warranty**

Silver Line Linears now available up to 288 watts. Feature industry standard footprints with the added convenience of screw terminal for AC input and DC outputs. Used in process control circuits, instrumentation, drives, CNC machinery and microprocessor circuits. Built-in over voltage protection, which provides both transient and power supply malfunction protection, is standard on 5 volt models and optional for other models *(order separately below).* UL recognized, CSA certified, CE compliant and TUV approved. **Covers sold separately.** *Contact your local Newark sales office for details.* When covers are used, derate the power supply by 25% of its rated value.

EXTERNAL POWER SUPPLIES

EXTERNAL REGULATED 115VAC POWER SUPPLIES

Single- and multiple-output units have a standard 5-pin DIN connector or a standard 760-type barrel connector. Input voltage: 115VAC 60Hz. Combined regulation of ±5%. Dielectric withstand voltage: 1500VAC, RMS. **Types WM025-760, WM053-D5,** and **WM063-D5** measure 2.20L x 2.75W x 3.50″H. **Types WM075-D5, WM093-05, WM112-D5, WM113-D5, WM144-1950-D5, WM100-D5,** and **WM113TT-D5** measure 2.28L x 3.10W x 4.36″H. **Types WM220-1-D5** and **WM230-D5** measure 2.66L x 3.82W x 6.30″H. UL listed, CSA certified.

UNREGULATED SINGLE OUTPUT POWER SUPPLIES

Power supplies feature 1.5W to 8W. Input voltage: 120VAC, 60Hz. Output connecter; output jack on a 6′ 2-conductor cable. Operating temperature is 0°-40°C. Input to output isolation is 1250V. All models are UL listed and CSA certified. One year warranty.

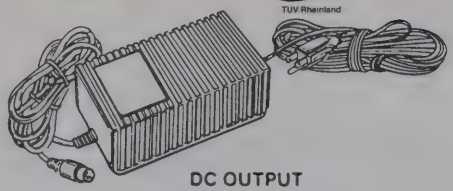
ELPAC POWER SYSTEMS
A DIVISION OF ELPAC ELECTRONICS INC

EXTERNAL POWER SUPPLIES

REGULATED POWER SUPPLIES WITH WORLDWIDE IEC INPUT



DC OUTPUT CONNECTIONS

5 PIN DIN TYPE

Fully regulated single and multi-output units have a 6′ (1.83M) input cord with 3-prong domestic plug and a 6′ (1.83M) output cable with a standard, 5-pin DIN shielded connector. 20-52 watts, input voltage: 90-250VAC, 50Hz. Combined regulation of ±5%. Dielectric withstand voltage: 1500 VAC, rms. Dimensions: 6.3 × 3.82 × 2.66″ (160.02 × 97.03 × 67.56). UL listed, CSA certified, TUV approved, EMI meets FCC/VDE Class B, CE marked. Alternative output connectors available; *contact your local Newark sales office.*

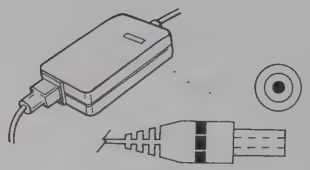
MIADA I/IV SERIES LOW-PROFILE POWER SUPPLIES



MIADA I/IV

Compact and extremely lightweight. 95-264VAC, 47-63Hz input range. Automatic overload recovery. 115-140% overvoltage protection. Line regulation: +1%, load regulation: ±5%. UL/CSA/TUV approved. CE marked. Weight: 13 ounces (0.368kg.). Size: 3 x 5 x 1.31″ (76.20 x 127.00 x 33.27). All models have a 6′ (1.83m) standard, 3-prong input cable and a 6′ shielded output cable with barrel connector.

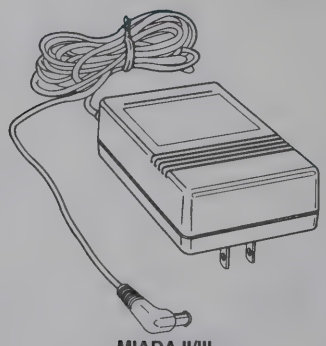
MIADA II/III SERIES WALL-MOUNT SWITCHING POWER SUPPLIES



MIADA II/III

Standard 3-prong plug and 2-prong fold-down plug models. 108-132VAC, 60Hz, input range. Automatic overload recovery. 115-135% primary controlled overvoltage protection. Line regulation: ±0.1%. Load regulation: ±5%. Weight: 5.7 oz. Dimensions: 2.3H x 3.6W x 1.3″D. Both models have 6′ output cable with barrel connector. UL1310 listed, CSA certified to 223. EMI meets FCC class B.

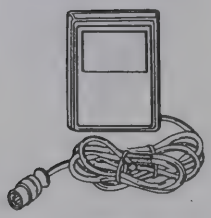
MED SERIES MEDICAL GRADE POWER SUPPLIES



DC OUTPUT CONNECTIONS

5 PIN DIN TYPE

MED

Designed to support medical instrumentation. Fully regulated single, dual or triple outputs. Circuit-breaker protection; no overshoot on turn-on/turn-off. All models come with a 6′ DC output cable. Tabletop versions also have a 6′ hospital-grade, AC input cord. CSA certified to standard C22.2 No. 220. Meet FCC class B and VDE Class B emissions. UL recognized to medical standard UL544. All units measure 2.3 x 3.1 x 4.4″ (58.42 x 78.74 x 111.76) and have AC input of 120V, ±10%, 60 Hz; except **type MED 220** which is 2.7 x 3.8 x 6.3″ (68.58 x 96.52 x 160.02) and has AC input of 115V, ±10%, 60 Hz. Alternate output plugs are available; *contact your local Newark sales office.*

UNIVERSAL PLUG-IN POWER SOURCES

DOMESTIC AND EUROPEAN WALL PLUG-IN POWER SOURCES

Compact power sources provide low power output to end products. Feature output termination compatible with Switchcraft **PC-722A** or **722A** with 6-ft. (1.83M) output cord. Secondary plug measures 0.083 x 0.216″ (2.11 x 5.49). Wired: outside-positive; inside-negative for AC-DC units. Domestic models are UL listed, CSA certified. European models are TUV certified.

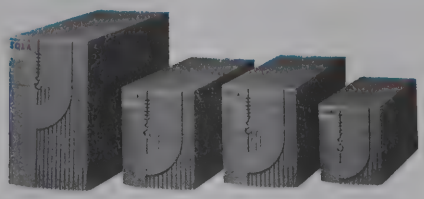
UNINTERRUPTIBLE POWER SUPPLIES

3000 SERIES UNINTERRUPTIBLE POWER SYSTEMS



- Line Interactive Topology
- Multiple Outlets for Clustered Equipment
- Easy-to-Read, Easy-to-Use Status Indicators and Controls with Audible Alarms for Critical Functions
- Network Interface Capability
- Two-Year Warranty with Optional Extensions to Five Years
- User-Replaceable Batteries

3000 series UPSs help provide blackout protection with advanced power conditioning in standard and rackmount models. Provide five minutes of battery back-up at full load – more than enough time to save and shut down. Line interactive technology filters utility power to eliminate spikes, noise and other transients. A voltage buck and boost circuit corrects input voltage as low as 25% below nominal and as high as 23% above nominal without switching to battery back-up. Rackmount versions allow easy installation and help conserve cabinet space. Offer 6 receptacles per unit. Ideal for stacked enclosures in which multiple servers, routers, bridges, hubs and other equipment need to be protected. UL listed. CSA certified.

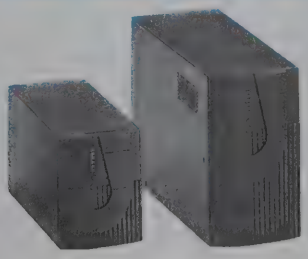
2000 SERIES UNINTERRUPTIBLE POWER SYSTEMS



- Modem/Fax Surge Protection
- Wide Input Voltage Range
- User-Replaceable Batteries
- Six or More Minutes of Battery Back-up at Full Load
- EMI/RFI filtering to FCC Class B
- Advanced Microprocessor Design
- Auto-battery Testing
- Small Lightweight Design Perfect for Desktop Use

The Sola 2000 Off-line UPS series packs the power protection features preferred for many computers, workstations, fax machines, peripherals and other sensitive electronics. Dimensions 6.5W x 4.5D x 13.9H UL listed, CSA certified.

ONLINE UNINTERRUPTIBLE POWER SYSTEMS (UPS)

ONLINE UNINTERRUPTIBLE POWER SYSTEMS (UPS)

- Input and Output Noise Suppression
- 2 Step Battery Recharge
- Battery Fuses
- 2 Speed Fan
- User-Replaceable Batteries
- Input Power Factor Correction
- PWM Inverter
- Automatic Restart
- Integral Dynamic Bypass
- 6′ Detachable Input Cord

Used for critical applications which demand the highest levels of performance and reliability for on-line protection. Unlike off-line and line-interactive UPSs, these systems eliminate a wider range of potential power problems: spikes, surges and extended overvoltage, noise and other trasients, sags, extended brownouts, difficult-to-track harmonics, and frequency variations common with standby to generator operation. True on-line design with a sine wave output. *Order rack mount hardware and external battery cabinets for rack-tower UPSs order separately below.* UL listed. CSA certified.

ONLINE UNINTERRUPTIBLE POWER SYSTEMS (UPS)

ONLINE UPS

NEW

Feature a wide range of upgradeable and expandable UPS models. To increase UPS capacity, field-installed modules can be used. New battery modules can extend back-up time to 24 hours.

- **Universal Input and Output Voltage***
- **Input/Output Noise Suppression and Isolation Main Input Fuses**
- **Battery Fuses**
- **Menu Prompts**
- **Battery Recharge 10x Discharge Time to 95% Capacity**
- **Microprocessor-Based Control and Monitoring**
- **50/60Hz Input/Output***
- **Input Power Factor and Current Distortion Correction**
- **2 Independently-Controlled PWM Inverters**
- **Main Output Circuit Breaker**

*Input/Output voltage and frequency must be the same if bypass is used.

To meet output distribution requirement, select a PAD that includes a maintenance bypass switch, and is available with an L14-30 plug (on a 6′ input power cord) and receptacles or with terminal block input/output. If application requires additional run time capacity, a simple field-installed module is used. One-year parts and 90 days onsite labor warranty. Sola 5000 UPS is available with frame-retardant sealed, low-maintenance batteries. **NOTE:** Flame-retardant batteries are required under UL1778 for units installed in a computer room. *Contact your local Newark sales office for details.* UL listed. CSA certified.

OMNISMART™ PNP AND OMNIPRO™ LINE-INTERACTIVE UPS SYSTEMS

Line-interactive design adjusts a wide range of incoming voltages back to 120VAC nominal to keep working through brownouts without using battery power. OMNISMART™ PNP UPS systems are bundled with PowerAlert® software (on CD-ROM) for automatic, unattended shutdown, plus a Novell SNMP agent for advanced power monitoring. Built-in protection against surges and spikes. Up-front LEDs show voltage correction, UPS load, and battery status. UL listed, CSA certified. $50,000 Ultimate Lifetime Insurance.

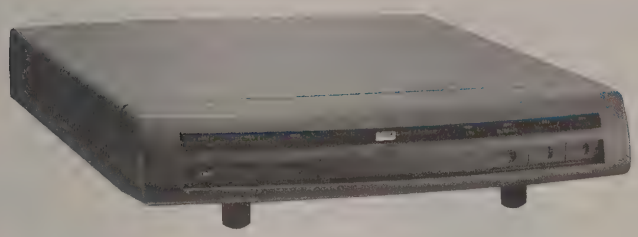
UPS SYSTEMS AND POWER CONDITIONERS

POWERHOUSE® UPS SYSTEM



Features:
- **Power Backup Maintains Operations During Power Outages for up to 20 Min.**
- **Safeguards Systems from Power Surges and Spikes**
- **Power Center Controls Entire System**
- **Dedicated Modem Protection**
- **Sleek Notebook Design Fits under Monitors**

Specifications:
- **Input Current: 12 Amps**
- **Output Voltage: 120V**
- **Computer and Monitor Output Backup Power: 420VA**
- **CPU Monitor/Printer/Aux. 1 and Aux. 2 Output Current: 12 Amps**
- **Max. Detection and Transfer Time: <4msec.**
- **Battery Type: Sealed Lead Acid**
- **Typical Life Expectancy: 3-6 Years**
- **Battery Rating: 6V, 4Ah**
- **Recharge Time: Less than 2 Hours**
- **Number of Batteries Required for Operating: 2**

Type PH420MT UPS has dual 250VA uninterruptible power outputs which support most PC systems. Reacts to power failures in less than 4 milliseconds. 20-minute backup power keeps computers running during power outages or voltage fluctuations. 2 back-up surge-protected outlets and 3 surge only protected outlets.Electrostatic discharge plate for quick and safe transfer of charge to ground. LEDs indicate surge protection and grounding status. Electronic Bookmark™ software with Save and Restore (SRS™) feature sold separatey. *Contact your local Newark sales office.* UL listed, meets FCC requirements.

POWERHOUSE® UPS SYSTEMS WITH COMPATIBLE SOFTWARE

NP350

Features:
- **Internet-Ready**
- **Dedicated Modem Protection**
- **Exclusive SRS™ Software**
- **For LAN and WAN Workstations and Personal Computers**
- **Compatible with Major Network Operating Systems and Computer Software**

Specifications:
- **UPS Protected Output Max. Power**
  Type NP350: 350VA
  TypePH6550NET: 650VA
- **Nominal Input Voltage: 120V**
- **Cord Length: 6′**
- **Low Voltage Detection Level: 95V (±2%)**
- **Max. AC Power Failure Detection Time: <1msec.**
- **Dimensions: 16L x 4.75W x 7″H**
- **Weight: Type NP350 - 16.5 lbs; Type PH650 NET - 18 lbs**

Type NP350 UPS features 350VA power supply with 15 minutes battery backup time. Exclusive SRS™ software automatically saves data, shuts down and powers up, and restores all work in-process. Modem protection (RJ-11 jacks), surge protection, EMI/RFI protection. Internet-ready. 4 spaced transformer outlets (2 backup and 2 surge-only). 6′ power cord. DB-9 interface cable and 6′ phone cord. Weight: 16.5 lbs. **Type PH650 NET** features 650VA power supply with 40 minutes of battery backup time. **Type PH650 NET** also features 6 spaced transformer outlets (4 backup and 2 surge-only). UL listed. Meets FCC requirements.

Stock No.	Type	No. of Outlets	Each

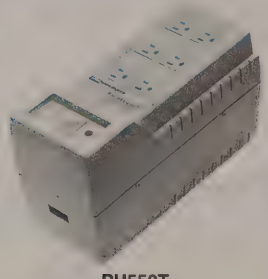
POWERHOUSE® UPS SYSTEMS

PH250



PH550T

- **Automatic self-testing of internal circuitry and load**
- **Backup time: 5 minutes at full load, 14 minutes at half load**
- **True step-sine wave output**
- **Visual and audible indicators**

On-board computers constantly monitor the amount of power going to computer, and warn if it draws too much power during a brownout or a blackout. Field-replaceable and recyclable batteries make it easy to protect computer system at all times. Full recharge time of 2 hours. PC compatible. Weight: **types PH250** and **PH320T** are 7 lbs; **types PH500** and **PH550T** are 12 lbs. **Types PH320T** and **PH550T** provide telephone line protection (RJ11). Lines protected: pins 2 and 3 (tip to ground, ring to ground). Lines connected: 4 (lines 1, 2, 3, 4). Phone cord length: 6′. UL listed, CSA certified. Up to $25,000 connected equipment guarantee. ***Two-year warranty.***

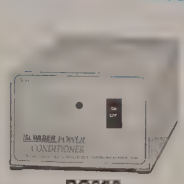
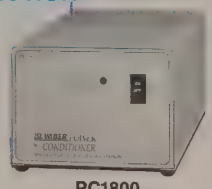
POWER CONDITIONER SERIES WITH THREE STAGE SURGE PROTECTION



PC600



PC1800

- **Premium Noise & 3 Stage Surge Suppression**
- **Complete Brownout Protection**
- **120VAC, 50/60Hz, +5%, –8% Regulated Output**

- **Visual Surge Indication**
- **Meet ANSI C84.1-1989 Specifications**
- **Manufacturer's 2-Year Unlimited Connected Equipment Warranty**

Power line conditioners protect computers and other sensitive components against under-voltage, over-voltage and noise interference. Units automatically step-up low voltages to allow connected equipment to operate during brownouts. **Types PC300** through **PC2400** offer visual surge indicator, 1330J energy dissipation and patented 3-stage design. All units are UL listed except for the 1800VA and 2400VA models.Input voltage: 95-138V. Max. surge current: 98,525A. 6' (1.83M) cord.

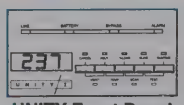
Best Power

UNINTERRUPTIBLE POWER SUPPLIES

UNITY/I™ SINGLE-PHASE 3kVA/kW TO 8kVA/kW UNINTERRUPTIBLE POWER SUPPLY SYSTEMS



UNITY Front Panel

Features:
- **Redundant Circuitry for High Fault Tolerance, Maximum Uptime**
- **Intelligent Charging Protects Batteries, Extends Their Life**
- **Worldwide Voltage and Frequency Compatibility**
- **Quiet and Compact–Ideal for Offices**
- **Exclusive PhonTek™ Feature for Remote Diagnostics by Factory**
- **Plug-and-Play Models Available**

Specifications:
- **Nominal Input Voltages: 200/208/220/230/240**
- **Nominal Output Voltages: 100/110/115/120/127/200/208/220/230/240**
- **Safety: UL 1778, UL 1449, CSA (cUL), GS (TUV), CE**
- **Efficiency: 95% Type UT3K; 96% Types UT4K, UT5K, and UT8K (On Line)**
- **Battery Charger: Typical Recharge <4-6 Hrs.**

Microprocessor offers improved response/reliability. 96% efficiency minimizes system temperatures, stress on components, and cost to operate. Safeguards include a dual power track configuration: if one power path develops a fault, the second takes over to keep UPS loads protected. For power-factor corrected (PFC) applications, UNITY/I series can be a solution. As a full kW-rated system, UNITY/I series can protect PFC, kW-rated equipment without oversizing. Ideal for kW-rated computers such as Compaq System Pro, Sun 3/470, IBM® AS/400, DEC 4000 AXP, and Hewlett Packard's F-, G-, H-, and I-class servers. Hardwired output connection is standard; *contact your local Newark sales office for receptacle options.*

PATRIOT® PRO 400VA TO 1000VA UNINTERRUPTIBLE POWER SYSTEMS

Features:
- **Provides Maximum System Up-Time and Safe System Shutdown**
- **Internet Power Protection**
- **Windows® 95 Plug-and-Play for Easy Installation**
- **Safeguards Network, UNIX and CAD/CAM/CAE Workstations, Desktop and Small Business Servers and Personal Computers from Lighting, Surges, Overvoltages, Blackouts, Brownouts and Sags**
- **Includes Telephone/10Base-T Network Surge Suppression**
- **Powersteady™ Buck and Boost Voltage Regulation Corrects Output Voltage to Meet CBEMA Requirements Without Draining Batteries**
- **5 Leds and Audible Alarms Keep You Informed of Power Status**
- **CheckUPS II Power Management Software Suite Version 3.X**

Patriot® Pro UPSs feature advanced technology battery management that assures optimum runtime when power fails, and quick recharge when power returns. Include automatic current and overvoltage protection and full-time EMI/RFI suppression. Sealed, maintenance-free lead acid battery with 3 to 6 year typical lifetime. Specifications: 100-142VAC input, 112-128VAC output, battery is 120VAC±10%, stepped sine wave, battery frequency is 50 or 60 Hz±1 Hz auto-sensing, automatic current and overvoltage protection, recharge time 8 hrs. Double lifetime surge warranty covers UPS and protected equipment up to U.S. $25,000 (USA/Canada Only). 2-year limited warranty.

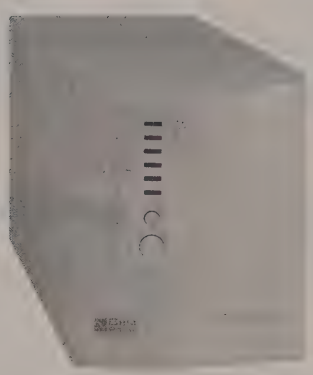
FORTRESS® 750VA TO 2250VA UNINTERRUPTIBLE POWER SYSTEMS



Features:
- **New BestDock™ Communications Slot Allows a Variety of Connectivity Options; Enables PC Interface via the Internet**
- **New Built-In Transient Voltage Surge Suppression Safeguards Against "Backdoor" Surges**
- **Enhanced Battery Recharge Time Helps Your Equipment Maintain Continuous Power**
- **New User-Programmable Buck and Boost Feature Allows Settings Customized to Your Power Environment**
- **Easy-to-Read LEDs and Audible Alarms Keep You Informed of Power Status**
- **Hot-Swappable Batteries Offer Reduced Maintenance and Service Costs**
- **World-Ready (U.S., Mexico, South America, Australia, Europe) Voltages and Frequencies Available**

Specifications:
- **Nominal Input Voltage: 120VAC Single-Phase (110- and 128-Volt Options)**
- **Nominal Output Voltage: 120VAC Single-Phase (110- and 128-Volt Options)**

Fortress surge suppression, battery management, and communications features make these units ideal for corporate, UNIX, and departmental servers, hubs, and network workstations. PowerSteady™ voltage regulation provides maximum system availability and allows you to ride out under- and overvoltages without draining the battery. Smooth sine-wave output is ideal for sensitive and mission-critical equipment that requires pure, continuous power. CheckUPS II Power Management Software Suite Version 3.x provides complete power protection solution compatible with most major operating systems. 3kVA units also available, *contact your local Newark office for details.* Double-Lifetime surge warranty covers UPS and protected equipment up to U.S. $25,000 (USA and Canada only). 2-year limited warranty. Comply with UL 1449 standards.

Best Power

UNINTERRUPTIBLE POWER SUPPLIES

FERRUPS® FE SERIES 500VA TO 18kVA UNINTERRUPTIBLE POWER SYSTEMS

Features:
- Allows Orderly Shutdown of Systems During Power Failure
- Operating Times Can Be Extended with Optional Batteries (Not Included)
- Filters Dirty Power
- CheckUPS® Software Included
- Patented Ferroresonant Technology
- Fully Compatible with Power-Factor Corrected Loads
- Enhanced Communication Capabilities
- Comprehensive Self-Diagnostics

Specifications:
- AC Input/Output Voltages: 120/208/240V (60Hz)
- Efficiency % (On Line): 85% to 92%
- Battery Charger: Typical Recharge <18 Hrs.
- Regulation: ±3% for Input Voltages from +15% to –20% of Nominal; Under Any Line, Load, or Battery Condition, Exceeds Recommended CBEMA and ANSI Voltage Regulation Standards for Computing Equipment
- Sine-Wave Power: Sine-Wave, Computer-Grade Power with 5% or Less Total Harmonic Distortion (THD) at Rated kW load; Meets or Exceeds CSA C22.2 No. 107.1 for Harmonic Distortion
- Overload Capability: 150% Surge and 125% for 10 Minutes on Line; 150% Surge and 110% for 10 Minutes on Inverter
- Frequency: 60Hz Nominal. On Line—Output Frequency Tracks Input within Adjustable Limits (±0.01Hz to ±3Hz); On Inverter—±0.005Hz

The FERRUPS ferroresonant UPS systems provide power protection in such demanding applications as central data processing, telecommunications/PBX, network hubs, manufacturing process control, and 911 equipment. Protect against sags, brownouts, surges, spikes, and lightning strikes. Extended brownout range conserves battery voltage by correcting sags as low as 38% below normal voltage without drawing on the battery. FERRUPS intelligent features include automatic battery and inverter checks, and "run time remaining" monitoring during power outages. Active voltage regulation feature enables power from almost any AC source to be converted into computer-grade power. **Types FE500VA - FE1.4KVA** are plug-and-play models. Hardwired models also available; *contact your local Newark sales office.*

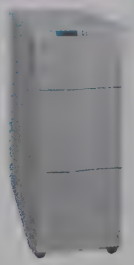
FERRUPS® 800 SERIES 2kVA TO 7.5kVA UNINTERRUPTIBLE POWER SYSTEMS

NEW



Features:
- Patented Ferroresonant Technology
- New Lower Output Impedance for Improved Compatibility with High-Surge Loads
- New Front Panel Design Makes It Easy-To-Use and Saves Valuable Diagnostic Time in Power Emergencies
- New BestDock™ Communications Slot for Additional Communications Capabilities
- New External Battery Connector for Simpler Run Time Expansion
- New Hot-Swappable Batteries; Change Batteries Without Interrupting the Load Operation

Specifications:
- Nominal Input Voltage: 110/115/120/127/208/220/230/240V for 2kVA-4.5kVA Models; 208/220/230/240V for 6kVA and 7.5kVA Models
- Input Voltage Range: 85 to 138VAC or 165 to 275VAC for 2kVA-4.5kVA Models; 165 to 275VAC for Types 6kVA and 7.5kVA Models

All models include harmonics filtering, precision-regulated voltage without battery discharge, active voltage regulation, redundant power paths, and galvanic isolation. Power protection that eliminates the effects of spikes, sags, surges, noise and lightning for computers and telecommunications equipment. Models 2- and 3kVA have easy-roll casters. Double-Lifetime surge warranty covers UPS and protected equipment up to U.S. $25,000 (U.S.A. and Canada only). 2-year limited warranty.

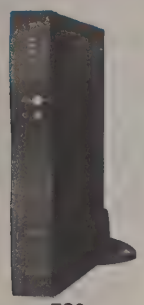
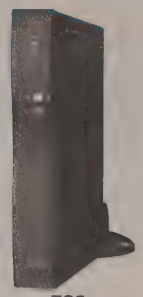
UPS SYSTEMS

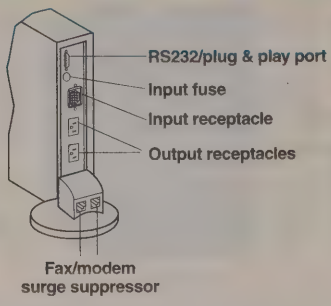
ES+ SERIES UPS SYSTEMS FOR LAN PCs AND SERVERS



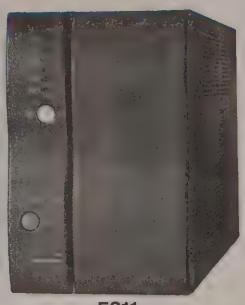
ES3+



ES5+



ES8+



ES11+

- **Ideal for Small Business Environments**
- **Plug-and-Play for Windows® 95**
- **Includes Solution-Pac 97™ Power Management Software**

Compact and lightweight UPS systems maximize the availability of LAN PCs and servers used for small business applications. Energy-saving sleep mode conserves battery back-up time by initiating a sleep mode when no load is detected for 5 minutes. Smart battery management features longer battery back-up, faster recharge, increased battery life, auto testing, and deep discharge protection. **Types ES 3+** and **ES 5+** are slim-line models that feature advanced high-frequency technology offering 4 convenient installation modes. **Types ES 8+** and **ES 11+** are compact models that feature voltage boost and fader that provide voltage correction during high and low line conditions. UL listed. 2-year warranty.

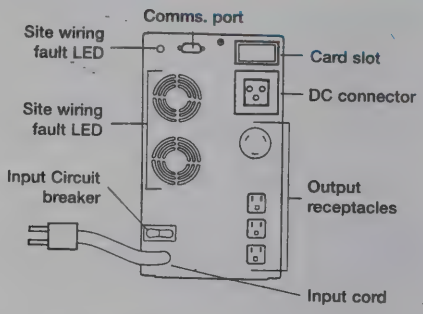
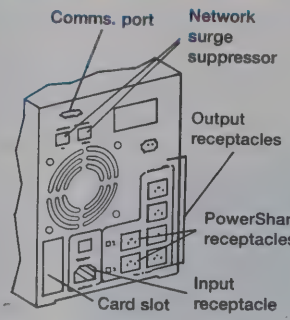
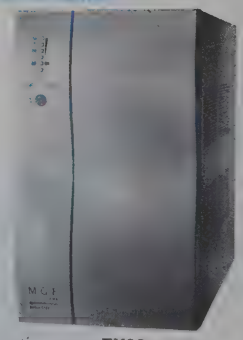
EX SERIES TRUE ONLINE DOUBLE-CONVERSION UPS SYSTEMS

UL NEW







EX20

- **Automatic Failsafe and Overload Bypass**
- **Sine-Wave Output**
- **Automatic UPS and Battery Test**
- **Includes Solution-Pac/WAN Software**

True online double-conversion technology provides highest quality AC output. Input AC is converted to DC and reconverted to AC for high isolation from AC utility noise. All transfers to or from battery back-up mode are completely undetectable and uninterrupted. Solution Pac™/WAN included for UPS remote control, automation of everyday tasks, and for selecting emergency actions. Offers shutdown capabilities via the network for simultaneous shutdown of NT, Novell, OS/2, and UNIX servers. Wide operating range (70-138VAC) assures availability of the most critical systems without drawing on the battery. Active input power factor correction circuitry improves utility power utilization for increased UPS output power. Can be directly connected to the network with its own IP address for remote management through an optional SNMP card. All types have RS-232 communications port and free EX driver to "tune" UPS parameters. Includes Solution Pac™ CD-ROM for stand-alone, local/wide area monitoring, control, and shutdown. UL listed. 2-year warranty. Extended batteries offering longer run times for **types EX10/15/20/30** are available separately *on this page.*

PRECISION REGULATED AND TRIMLINE DC POWER SUPPLIES

- **Convert 120VAC to 13.8VDC**
- **Solid-State Circuitry, High Quality Filtering, and Electronic Foldback for Automatic Overcurrent Protection**
- **Ideal for CBs, Ham Radios, and All Land Mobile Operations**
- **Light On/Off Switch on Faceplate**
- **Crowbar Overvoltage Prevents Damage to Connected Equipment 15-Amp and Greater**
- **Three-Conductor Grounded Cord on 10-Amp and Larger Models**
- **0.15V Maximum Ripple on 7-Amp and Larger Models**
- **UL Listed Plug and Cord Set**

Precision-regulated DC power supplies feature small footprint design to maximize operating space. Heavy-duty power transformer provides isolation from noise on incoming AC power. Large heat sinks and vented cabinet provide cool operation for continuous use and long life. Regulated output voltage maintains up to 95% of no-load value.

ISOLATION TRANSFORMERS

Isolation transformers provide true line isolation to protect sensitive electronics. Ideal for telecom and point-of-sale (cash register) applications where an isolated ground is essential. Clean, portable ground eliminates the need for dedicated lines. Efficient operation generates less heat than ferroresonant devices. Units feature exceptional low-frequency line noise rejection and external resettable circuit breaker. Each comes with 6′ cord. Output: 120VAC. 2-year warranty.

(3916) (ne08414)

IS200

LINE VOLTAGE REGULATORS

Regulates incoming voltages from 87 to 140VAC back to 120VAC. Help protect sensitive electronic equipment (i.e., computers and peripherals, TVs, VCRs, etc.) from overheating and burnout from overvoltage. Front panel LEDs display input voltage conditions. Provide complete brownout protection and surge/noise protection in one low-cost unit. Automatically adjusts a wide range of incoming voltages (from 87 to 140 volts) back to 120VAC. Nominal output within ANSI C84.1 specifications. Use relay-stepped transformers to provide peak input voltage regulation to connected equipment. **Types LC1200, LC1800,** and **LC2400** feature built-in Isobar® surge suppression (meet IEEE 587 standard–Categories A and B). Up to $25,000 Ultimate Lifetime Insurance coverage for connected equipment; 2-year product warranty. **Types LC1800** and above meet LED recognition of incoming voltage condition. Rack mount units available; *contact your local Newark sales office.*

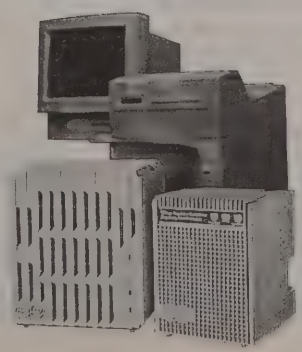
ULTIMATE LIFETIME INSURANCE



POWER CONDITIONERS

POWER CONDITIONERS

Benefits:• Protects Facility Wiring from Odd-Order Harmonics
- **Regulates Voltage, Provides Surge Suppression and Isolation**
- **Acts as a Step-Up or Step-Down Transformer**
- **Rugged Design Handles Hostile Industrial Environments to +50°C Rated**
- **Ideal for PLCs, Offers Ultimate Protection Against Voltage Sags and Brownouts**
- **Excellent Protection for: Machine Tools, Computer Loads, Robotics, Industrial Panels, and Electronic Equipment**
- **Half-Load Input Voltage Window of +15 to –50%**
- **Galvanic Isolation and Bonded Neutral Provides Superior Isolation from Noise**
- **±3% Regulation for Line Fluctuations of +10/–20%**
- **6000-Volt Surges are Suppressed to Safe Levels Per ANSI/IEEE C62.45-1991 Class A and B Specifications**
- **Deep Brownouts of up to 35% from Nominal are Maintained to within 10% of the Output Nominal**
- **Common Mode Noise Attenuation: >120dB; Normal Mode Noise Attenuation: >60dB**
- **10-Years Warranty**

MCR series protects equipment from all power problems except total power loss. Suppresses transients, protects against overloads, sags, noise, brownouts and acts as a dedicated line. Neutralizes harmonics and SCR notches that can damage sensitive loads. Even with a heavily distorted or square-wave input, MCR series puts out a sine wave. To size the unit for your needs, simply multiply the Volts x Amps to obtain the VA load requirement. Then select the next larger size unit. If protection from severe brownouts is needed, the unit can be oversized for even greater input voltage window. If your load has an inductive inrush such as relays, coils, solenoids or motors, size the unit for the load inrush current. Or, with high inductive inrush loads, load power factor correction capacitors can reduce the need to oversize the unit for inductive inrush currents. For 60Hz/600V models, 500 to 1500VA range; *contact your local Newark sales office for details.*

MINI-COMPUTER REGULATORS

MCR Portable

- **Protects Your System from Surges, Spikes, Sags, Overvoltages, Brownouts, and Electrical Noise**
- **Automatic Overload Protection Eliminates Need for Circuit Breakers and Fuses**
- **Multiple Input and Output Voltage (Including International) Models Available**
- **UL Listed, CSA Certified**

Improves monentary overload and waveform characteristics in currents caused by electronic loads; the load is isolated from power source by the regulator. Voltage regulation: ±3% for an input variation of +10%/-20% is limited to twice the rated current. Equipment receives noise-free power. Once overload is removed, normal operation resumes. Common mode rejection: 120dB (DC to 1MHz). Transverse noise rejection: 60dB (10kHz to 1MHz). 98% efficiency at full load. Average continuous life is 25 years. Limited 10-years warranty.

TRANSFORMERS AND POWER CONDITIONERS

CVS SERIES CONSTANT VOLTAGE TRANSFORMERS

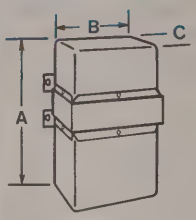

Fig. 1

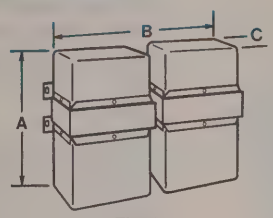

Fig. 2

Specifications:
- **Output Voltage Regulation of +/– 1% for Line Variation of +10% to –20%.**
- **Output Voltage Remains within NEMA Specifications for Input of +15% to –35%.**
- **Provides Galvanic Isolation with Common and Normal Mode Noise Attenuation of 40dB.**
- **6kV, 200-Amp ANSI/IEEE C62.45-1991 Powerline Surge is Attenuated to a Let-Through of 1%.**
- **Regardless of Input Waveform, Output is a Sine Wave with Less than 3% THD.**

The **CVS series** are well-recognized voltage regulation devices for industrial applications where extremely precise voltage regulation is required. All types are 60Hz hardwired input/output with a terminal block accessible through concentric knockouts. **CVS series** voltage regulators provide highly regulated sinewave output voltages to within ±1% in the presence of input voltage variations from +10% to –20%. Output distortion remains less than 3% THD. Even with heavily distorted and/or notched input voltages, the **CVS series** outputs a sine wave. Computers, LAN systems, and various other equipment with switch-mode power supplies generate potentially damaging odd-order harmonic currents. The increase of harmonics has become a rapidly growing problem in facility wiring. SOLA **CVS series** technology eliminates these harmonics, thereby protecting facility wiring and sensitive electrical loads. **CVS series** constant voltage regulators are ideal for protecting industrial automation equipment, PLCs, panelboard power supplies, photographic enlargers, analytical lab equipment, CCTV transmission equipment, sound/recording device and marine navigation equipment. To size a Sola CVS, simply multiply the load Volts x Amps to obtain the load VA requirement. Then select the next larger size Sola CVS. Note: If protection from severe brownouts is needed, the **CVS series** can be oversized for even greater input voltage window. If the load has an inductive inrush, such as relays, coils, solenoids, or motors, size the **CVS series** for the load inrush current. Or, with high inductive inrush loads, load power factor correction capacitors can reduce the need to oversize the **CVS series** for inductive inrush currents. UL listed, CSA certified.

POWER CONDITIONERS MEDICAL GRADE

Protect medical imaging systems, monitor diagnostic devices and other data-sensitive patient care equipment from surges, spikes, sags, brownouts, powerline noise and other problems caused by electrical disturbances. Lowered-output-impedance design improves momentary overload and waveform characteristics for a broad range of applications. A ferroresonant transformer protects against line voltage fluctuations, brownouts and even short power outages of up to 3 milli-seconds while supplying constant output. High voltage surges up to 6,000 volts are suppressed. If an overload occurs, transformer protects both the connected load and conditioner, and automatically shuts down output if the current exceeds 200% of the maximum rated value. Limited 10-year warranty covers defects in workmanship and materials.

SPECIFICATIONS

- **Input: Voltage 120V; Frequency: 60 Hz**
- **Output: Voltage: 120V; Frequency: 60 Hz**
- **Voltage Regulation: ±3% for Input Variation of +10%/–20%**
- **Overload: Output Current Limited to Twice Rated Current.**
- **Harmonic Distortion: Less Than 3% Total RMS Content at Full Load**
- **Harmonic Rejection: Output is 60 Hz Sine Wave, Even with Distorted Input Waveform**
- **AC Leakage Current: Less Than µA for Patient Care Products as Specified by UL 544.**
- **Noise Reduction: Common Mode: 120 dB (DC to 1 MHz); Transverse Noise: 60 dB (10 kHZ to 1 MHz).**
- **Conformance: Listed to UL 1012 and UL 544 for Patient Care Products. CSA: Certified to CSA C22.2, No. 66**

SENTEX® TYPE CLT WALL MOUNT HARDWIRED POWER CONDITIONERS

- **Unique Ferroresonant Voltage Technology Reduces Hazardous Odd - Order Harmonics on AC Line**
- **Eliminate Power Line Problems and Protect Equipment from Everything Short of a Power Outage**

Ideal for telephone and security systems, medical equipment, mini-/mainframe computers, typesetters and process control. One unit handles multiple voltage from 90-132VAC, 60Hz. Response time: instantaneous (no measurable delay) Output Voltage: 120/208/240. UL Listed. 50Hz units also available; *contact your local Newark sales office.*

SENTREX® TYPE PCLC PLUG-IN 60HZ POWER CONDITIONERS

- **Protects Against Power Interruptions up to 3 Milliseconds**
- **Protection Against All Power Line Problems Short of a Blackout**

Bidirectional harmonic filtering reducesdistortion to and from your equipment. Provides protection against brownouts, spikes, surges, sags, noise, and harmonics. Ideal for workstations, remote computer peripherals, and microcomputers, LANs, and fax machines. Output voltage: 120VAC ±5%. Input voltage: 96-132VAC. Output waveform: sinewave, approximately 5% THD. Response time: instantaneous (no measurable delay). All types have plug-type 5-15P **type PCLC-1800**s, which has a 5-20P plug. 6″ line cord. All have on/off switch except, **type PCLC-110**. UL listed and CSA certified. 50Hz units also available; *contact your local Newark sales office.*

SENTREX® COMPUTER LINE CONDITIONERS

- **Solve 99% Of All Power Quality Problems**
- **Bidirectional Harmonic Filtering Reduces Distortion to and from Your Equipment**
- **Multistage MOV Surge Suppression Provides a Higher Level of Computer Protection**
- **Include 6′ Line Cord, On/Off Switch and Indicator Lights**

Provide completely regulated, computer-compatible sinewave power. Super-isolation and tight regulation for sensitive microprocessors. Designed to isolate electrical equipment from imperfect commercial power lines. Also provide protection against brownouts, spikes, surges, sags, noise, and harmonics. Ideal for medical and factory automation equipment, mini-computers, large LANs. Response time: instantaneous (no measurable delay). Input voltage: 90-132VAC. Output voltage: 120VAC ±3%. Output waveform: sinewave, approx. 3% THD. All have plug-type 5-15P except **types CLC-2100-AAA** and **CLC-3100-AAA** which have a L5-30 type plug. 50Hz units also available; *contact your local Newark sales office.* UL listed.

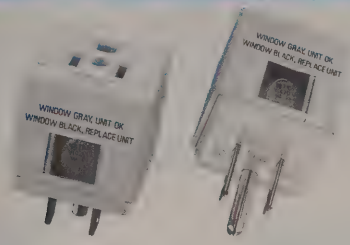
MULTIMEDIA SURGE SUPPRESSORS

COMPACT PLUG-IN SURGE PRODUCTS



- **Absorb Destructive Overloads**
- **Type SS1E Dissipates Noise**
- **Protect Against Drop-Outs**
- **Help Cut Repair Costs**

Type SSF1E and **SSF1** surge suppressors plug directly into a wall socket. They protect appliances, computers, and other sensitive equipment against powerline disturbances, such as voltage spikes, over-voltages, and noise interference. These single-plug units have indicator windows to warn of over-voltage conditions. **Type SSF1E** features noise filtration, has 3 MOVs, and 210 joules. **Type SSF1** has 1 MOV (70 joules). Each has varistor(s) which turn black when the unit needs to be replaced. Maximum voltage: 225VDC, 175VAC RMS. Maximum surge current: 2500 amps (2 times), 4500 amps (1 time). Rated at 15amps, 125 volts. 440 V clamping voltage. Response time: 1 nanosecond. UL listed.

Stock No.	Type	Varistors	1-9	10-24

OFFICE/HOME SURGE SUPPRESSORS

SSA series surge suppressors provide LED surge indication, RJ-11 voice/fax ports, 6 outlets, and rocker on/off switch. Meet UL/IEEE standards. Clamping response time: 1 nanosecond. **Types SSA62** and **SSA63** have 330V UL standard 1449 rating, and 55dB noise attenuation. Maximum energy dissipation: 590 joules. Maximum surge current: 49,000 amps. Multimedia applications include: computer, digital TV, and satellite signals. **Type SSA61** has 400V UL standard 1449 rating and 35dB noise attenuation. Maximum energy dissipation: 350 joules. All have a 5-year warranty and a protected-equipment warranty. UL listed.

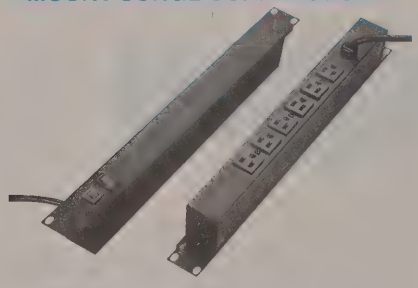
HIGH-PERFORMANCE AND COMPUTER-GRADE RACK MOUNT SURGE SUPPRESSORS



- **Designed to Fit All Standard 19″ Cabinets, Carts, and Racks**
- **Matte Black Steel Housing with Black 14/3 SJT Cord**
- **Six Rear Outlets**
- **1½″ Receptacle Center-to-Center**
- **1¼″ Mounting Center**
- **Dimensions: 19L x 1¾W x 2¾″H**
- **UL Recognized, CSA Certified**

Types SSD66 and **SSD615** are high-performance surge suppressors designed to work with networking products and feature 11,000A surge capability and 260V clamping voltage. UL 330V rated. **Types SSG66** , **SSG615**, and **SSG66NS** are computer-grade surge suppressors that feature 4.3A surge suppression and 336V clamping voltage. UL 400V rated.

SURGE AND NOISE SUPPRESSORS

SS7408-6

TRIMLINE SURGE SUPPRESSORS

Rugged, versatile multi-length surge suppressors protect sensitive electronics. Widely used in racks, workbenches, production lines, lab tables, and similar applications. Rating: 15A/125VAC, 60Hz, 1875W continuous duty. All models feature surge indication light, master switch/pilot light, and circuit breaker. Outlets "U" ground. UL listed.

Stock No.	Type	Case	No. of Outlets	Max. Surge Current	Joules	Cord Length	Each

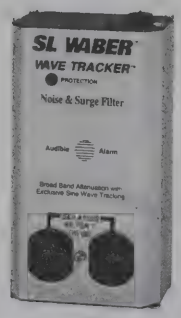
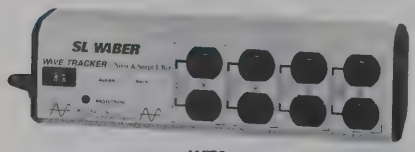
(3907) (ne08079)



WT2P



WT8

WAVETRACKER™ SURGE AND NOISE SUPPRESSORS

3-stage surge protection (gas tube, avalanche diode, MOV). Feature sine wave tracking which exhibits a clamping envelope that molds to the shape of the sine wave and greatly reduces the magnitude of the spike. UL 1449 rating of 330V. Applications include CAD stations, telecommunications equipment, and multimedia systems. Units come with 6′ cord (except **type WT2P** which is direct plug-in). Audible and visual surge indicators. UL listed. Lifetime connected equipment warranty.

Stock No.	Type	No. of Outlets	Noise Attenuation	Max. Surge Current	Each
93F5115	WT2P	2	75dB	104,025A	**55.67**
93F5116	WT4	4	100dB	116,025A	**102.09**
93F5117	WT4M*	4	100dB	116,025A	**115.16**
93F5118	WT6**	6	110dB	128,025A	**115.16**
93F5120	WT8**	8	125dB	140,025A	**133.37**

*Offers telecommunications line protection (RJ-11), **15′ cord versions available.
(3906) (ne08078)

MGS6-6

HOSPITAL-GRADE SURGE SUPPRESSORS

- **"Green Dot" Medical-Grade Components**
- **3-Stage Surge Filter**
- **Visual Surge Indicator**
- **Lifetime Warranty**

White steel case. Rating: 15A/120VAC, 60Hz. Maximum surge current: 44,025A. Voltage: 6000V. UL1449 rating: 400V. Maximum leakage: 30µA. Clamping response: <1psec. UL listed plug, cord, and receptacles.

Stock No.	Type	No. of Outlets	Cord	Each
93F1838	MGS4-6	4	6′	**89.86**

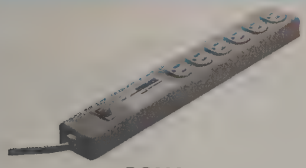
SURGE AND NOISE SUPPRESSORS

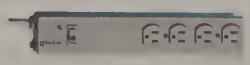
DATAGARD® SERIES

Datagard units meet UL Standard 1449 with 330V rating. Units have visual or audible surge indicators and resettable circuit breakers. Ratings: 15A, 60Hz, 1875W. UL listed. All offer 10-year/$2,500 connected equipment warranty.
(14726) (ne10628)

DATAGARD® ECONOMICAL SURGE SUPPRESSORS



DG206



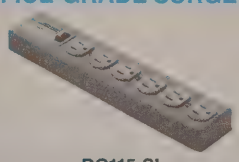
DG204

Provide basic surge protection for general office equipment. 6′ cord. Joule rating: 450J. Max surge current: 36,000A. UL listed.

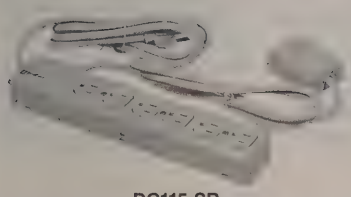
Stock No.	Type	Outlets	Mounting Centers	Each
87F2859	DG204	4	11.00″	27.34
87F2860	DG206	6	11.00″	19.95

(3841) (de51651)

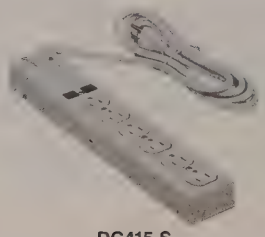
DATAGARD® OFFICE-GRADE SURGE SUPPRESSORS



DG115-SI



DG115-SR



DG415-S

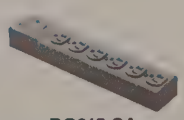
Specifically designed to protect computers, P.O.S. terminals, sensitive instrumentation, and other electronic equipment containing sensitive microprocessors. All 3 models meet UL 1449 Standard with 330V rating. Units have visual surge indication (except **type DG115-SR**, which has audible surge indication) and resettable circuit breaker. Ratings: 15A/125V, 60Hz, 1875W continuous duty. Cord length: 6′. Color: cool gray. Lifetime $10,000 connected equipment warranty.

Stock No.	Type	Joule Rating	Max. Surge Current	Noise Attenuation	No. of Outlets	Each
90F2090	DG115-SI	450	36,000A	Up to 55dB	6	54.75
90F2092	DG115-SR*	450	36,000A	Up to 55dB	6	70.24
89F852	DG415-S†	450	36,000A	Up to 55dB	6	65.22

*Remote switch cord is 4/12′; †Comes with 2 RJ-11 phone jacks.
(3908) (ne08340)

DATAGARD® INDUSTRIAL SURGE SUPPRESSORS

DG315R



DG315-SA

Designed for large office and industrial applications, specifically where noise is a critical factor. Both models meet UL 1449 Standard with 330V rating. 15A/125V, 60Hz, 1875W continuous duty. Color: **type DG315-SA** is cool gray; **type DG315R** is black. Cord length: 6′. Lifetime $10,000 connected equipment warranty.

Stock No.	Type	Joule Rating	Max. Surge Current	Noise Attenuation	No. of Outlets	Each
90F2091	DG-315-SA	450	36,000A	Up to 65dB	6	70.24
50F2819	DG315-R	450	36,000A	Up to 65dB	6	111.95

*Dimensions for 19″ rack mount: front plate: 19L x 1 23/32″W; back cover: 17L x 1 11/16W x 2 3/8″D
(3909) (ne08341)

POWERMASTER® SURGE SUPPRESSORS

PM900V

- **Protects Telecommunications and Satellite Equipment**
- **Right-Angle Plugs for Transformer Applications**
- **Audible and Visual Indicators**

UL1449 rating: 330V. Voice/fax line: RJ-11. Noise attenuation: 55dB. Max. energy dissipation: 1230 joules. Max. surge current: 74,500A. Clamping response time: 1ns. Switch is rocker type. Case is black plastic. All units have 6 outlets and 1 set of voice/fax jacks. Dimensions: 12 7/16L x 3 5/32W x 1 3/8″H. All UL listed/IEEE certified.

Stock No.	Type	Coax Line	Audible/ Visual Indications	Ground Indication	Each
52F166	PM900	1 Set	Both	LED	57.54
52F167	PM1600	2 Sets	Both	LED	70.35

(3889) (ne06314)

POWER MASTER® SURGE/NOISE SUPPRESSORS

PM6-S

PM1-N

PM6-NP

Protect equipment from surges and EMI. Rating: 15A, 125VAC, 60Hz, 1875 watts, continuous duty. Cord: 14/3 SJT. Visual surge indicator. UL listed and tested to UL1449. 5-year warranty.

Stock No.	Type	Outlets	Cord	Description	Each
87F2865	PM6-NS	6	6′	Strip w/Circuit Breaker	31.53

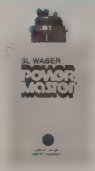
*Surge suppression only
(3842) (de51657)

POWER MASTER® WHOLE HOUSE SURGE ARRESTER



Protects household electrical/electronic equipment from transient voltage surges entering via the main power line. Mounts on breaker box. Max. surge current: 32,000A. Joule rating: 490J. Clamping response: less than 1nsec. Rated: 15A, 120/240VAC, 60Hz. Filter integrity indicator light. UL listed. 3-year limited warranty.

50F2815 Type WH-1. **Each** **77.98**
(3843) (de51658)

DATAGARD® 20-AMP SURGE SUPPRESSOR

Protects 20A heavy-duty office equipment and industrial machinery. UL1449 rating of 500V, 3 lines protected. 6′ double-insulated 12/3 SJT cord with molded 3-prong, 20-amp NEMA 5-20P insulated grounding plug. UL listed. Lifetime connected equipment warranty.

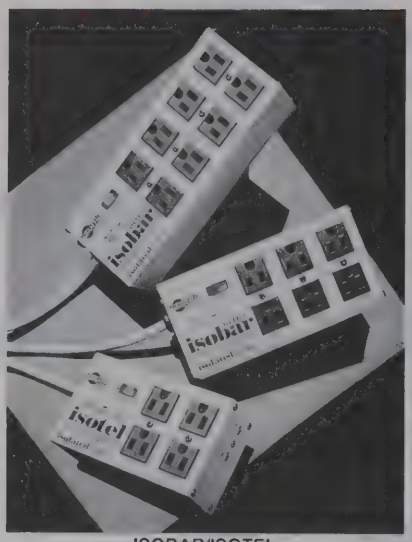
50F2820 Type DG4-20A. **Each** **90.34**
(3844) (de51659)

TRIPP LITE POWER PROTECTION

PREMIUM SURGE SUPPRESSORS

ISOBAR® AND ISOTEL® SURGE/NOISE SUPPRESSORS WITH DIAGNOSTIC LEDS

ULTIMATE LIFETIME INSURANCE



ISOBAR/ISOTEL

"Cascade circuitry" offers increasing levels of protection for more sensitive equipment. Features all-metal housing and lighted on/off switch. Logical outlet configuration accommodates bulky transformers. Diagnostic indicators provide advance warning of potential power problems. Isolated filter banks eliminate interference between equipment. "Ultra" modles feature diagnostic LEDs. Provides instantaneous surge response with suppression up to 96,000 amp spikes. Up to 50,000 Ultimate Lifetime Insurance protects Isobar and connected equipment against surge damage, including direct lightning strikes. UL listed; CSA certified.

PQI SERIES TRANSIENT VOLTAGE SUPPRESSORS/RFI FILTERS

WARNER ELECTRIC MOTORS AND CONTROLS DIVISION SUPERIOR ELECTRIC

- **Industrial-Grade Power Protection**
- **Available in Rack Mount, Hardwired, and NEMA 12 Versions**
- **Full 10-Year Warranty**

PQI series Stabiline® Power Quality Interfaces are transient voltage suppressors/RFI filters that divert and attenuate all modes of power disturbances before they reach the circuitry of sensitive electronic equipment. Some models are of a unique state-of-the-art, performance proved, multistage suppression and filtration design that utilizes MOVs, gas tubes, filter capacitors, inductors and silicon avalanche diodes. The circuit allows bidirectional protection from source or load power disturbances. **Type PQI-2115BR** is compact, quiet, lightweight and packaged in an aluminum enclosure with cord/plug convenient access for AC input and output connections. It conforms to ANSI standards for 19-inch rack mounting. Panel height is 1U (1.75-inch space). The unit features a front panel pilot lamp, a rocker-type combination circuit breaker-on/off switch and rear panel provision for equipment connection to 6 conditioned output NEMA 5-15R style receptacles. Double-circuit **type PQI-2115R2** has double the power in the same rack panel space. Two separate circuits provide a total of 30A of 120V protection.

Type PQI-3120H is designed for mounting in a user-supplied enclosure. It has an external 6-position terminal strip connection, mounting hardware, and a sturdy mounting bracket that allows vertical side and horizontal rear mounting. It is lightweight and packaged in an attractive, injection-molded, high impact ABS plastic case which is nonconductive, static-free and fire-rated. **Types PQI-3120N12** and **PQI-3220N12** are packaged in steel NEMA 12 panel enclosures with access for connections from top, bottom or right side of the unit. They come with 2 liquidtight metal conduit connectors. All industrial-grade PQI units listed in this catalog are UL 1449 recognized (clamping level 330V) and CSA certified. Wall mount and international applications versions are also available; *contact your local Newark sales office.*

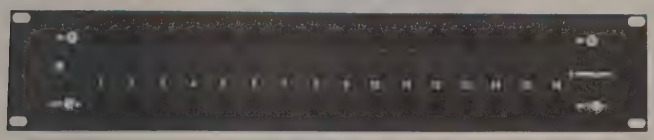
SURGE PROTECTORS

16- & 32-PORT 19″ RELAY RACK SURGE PROTECTORS



RAK16-E-C5

RAK series Category 5, 16- and 32-port wall mount and 19″ relay rack surge protectors for individual on-line port replacement. Ideal for 19″ relay racks supporting LAN hubs, concentrators, and multiport interfaces. Feature high-speed, high-energy handling capability. Available for most communication interfaces including: Token Ring, 10Base-T and 100Base-T Ethernet, ATM155, CDDI, 100VG-Anylan, Telco, RS-232, RS-422, RS-423, and RS-485. Convenient front input and output or standoff bracket for full-size data cabinets. UL listed.

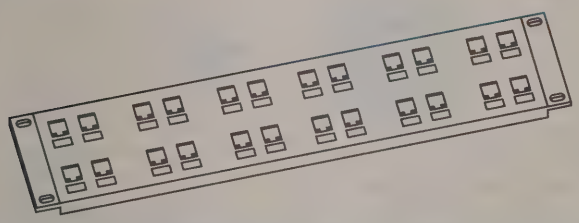
24-PORT PATCH PANEL SURGE PROTECTOR

NEW



Ideal for 19″ relay rack applications supporting hubs, routers, switches, and other high-speed communication/networking equipment. 24-port, 2U(3.50″), 110 IDC to RJ-45 patch panel features built-in surge protection for superior security and maximized system up-time. For use in 100Base-T, ATM-155, CDDI, and other 100MHz applications where system availability is critical. Low capacitance, avalanche diode technology offers fast response time of less than 5 nanoseconds. Self-resetting, 1500- watt, bi-directional circuit provides maximum reliability. Clamping voltage of 12 volts. Meets Category 5, TIA/EIA 568-A requirements. UL listed, CE compliant.

Stock No.	Type	Description	Each
48F1490	PCH24-C5	24-Port Patch Panel	624.60
48F1491	MOD24-C5	Replacement Modules	65.98

(42472) (ne42472)

DB9, DB15 & DB25 SUBMINIATURE PROTECTORS

DB15-EN

DB series SIP protectors provide protection for most subminiature D-based communication interfaces. Designed to protect electronic devices with extremely low tolerance for voltage rises or ground loop energies. Ideal for use in high-lightning areas and for equipment networked at distances greater than 30 feet. Response time of less than 5 nanoseconds. UL listed.

Stock No.	Type	Application	1-2	3-5
01F905	DB25-RS232	RS-232	55.68	53.21
01F903	DB9-RS232	RS-232	40.97	39.16
01F930	ILB1206 151 RE4	RS-422, 423, 485	103.61	86.94
01F904	DB15-EN	Ethernet AUI	72.49	69.28

(13132) (ne10329)

RJ-11 & RJ-45 TELCO AND DATA COMMUNICATION LINE PROTECTORS

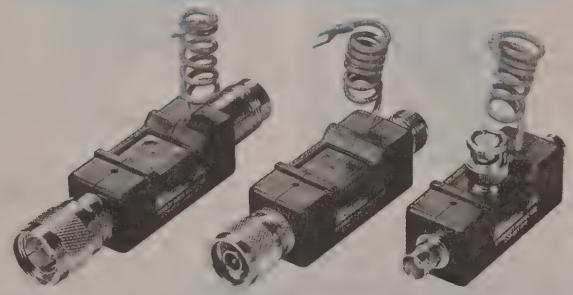
MTJ-04E/RJ-45

Type MTJ Category 5 surge protectors for RJ-11 and RJ-45 style twisted pair interfaces in LAN and WAN networks. Protects most equipment using standard modular telephone jacks. Helps guard hubs, repeaters, muxes, modems, fax machines, terminals, and file servers against lightning-induced surges, AC power interference, electrostatic discharge, and ground loop energies. UL listed.

Stock No.	Type	Application	1-2	3-5
01F908	MTJ-02G/RJ-11	Telco, Dial-Up, Modem/Fax	36.77	35.14
01F907	MTJ-04E/RJ45	Ethernet 10Base-T	42.03	40.16
01F910	MTJ-08B/RJ-45	Telco, Lease Line (CSU/DSU, DDS, ISDN, T-1	68.29	65.26
01F909	MTJ-08E/RJ45-C5	Ethernet 100Base-T, CDDI, ATM155, 100VG-AnyLan	89.30	85.34

(13129) (ne10328)

COAXIAL & TWIN AXIAL CABLE PROTECTORS



CCP

CCP series protectors help guard against lightning-induced surges, AC power interference, electrostatic discharge, and ground loop energies. These units protect both center and shield circuits and help promote reliable operation of networked equipment using IBM® 3270, AS400, Ethernet, Arcnet, cable/satellite/closed circuit TV, and most other wideband communication interfaces. Features separate grounding wire. UL listed.

Stock No.	Type	Application	1-2	3-5
01F899	CCP-2DT-(EN)	10Base-2, Ethernet	54.63	52.21
01F901	CCP-FCT-M/F	Cable TV	51.48	49.20
01F341	CCP-CCTV	Closed Circuit TV	57.78	55.22
01F342	CCP-2BMM/F	AS400/3X Twinaxial	72.49	69.28
01F343	CCP-FST-M/F	Satellite Transceiver	52.53	50.20

SOLID-STATE SILICON SURGE SUPPRESSORS

66 PUNCH DOWN BLOCK PROTECTOR

PBM-6605

RMP-620AT

Type PBM-6605 66 punch down block clip-mounted twisted pair protector guards against overvoltages. Replaces bridge clip. Mounts directly to block. Voltage protection: 240-380V peak. Operating temperature: –20°C to + 50°C. Includes metal grounding strip to connect the protectors via the unit's grounding studs. **RMP620AT** is a 19″ rack mounted protector designed for AC voltage and telephone line applications. Equipped with 6 NEMA 5-20R outlets, a 20 AMP power switch/circuit breaker and a front and back visual indication system. Voltage protection: 300V peak. Operating temperature: –20°C to + 65°C.

Stock No.	Type	1-2	3-5	6-10
01F868	PBM-6605	53.58	51.21	49.09
83F8350	RMP620AT	365.00	346.75	328.50

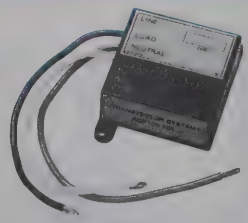
ACP100 SERIES HARDWIRE SURGE SUPPRESSORS

ACP100BWN3



ACP100MN

ACP100 series surge suppressors offer surge protection for 120VAC, 15-amp hardwire applications. Feature all-silicon solid-state dependability. Eliminate both short- and long-waveform transients, induced lightning, and similar overvoltages. No special wiring or tools. 5ns response time. Service voltage: 120VAC. Current: 15 amps (max.). Frequency: 50/60Hz. **Type ACP100BWN3** disconnects load from AC power. **Type ACP100BW3R** features an external warning light and allows for remote status indication of suppressor. **Type ACP100MN** is a compact unit that automatically disconnects the load in the event of a suppressor overload. All carry a 3-year warranty.

Stock No.	Type	1-2	3-5	6-10
01F864	ACP100MN	158.36	150.44	142.52
01F865	ACP100BWN3	168.71	160.27	151.84
01F866	ACP100BW3R	227.70	216.32	204.93

DR SERIES SURGE SUPPRESSORS

DR series surge suppressors are specifically designed for current loop and data circuits. Installed parallel to the protected circuit, and if capabilities are exceeded, the suppressor will short the line. Each suppressor's modular design allows for quick removal from a separate mounting base. The mounting base provides for grounding of the suppressor to the DIN rail. Fit on standard EN50022 type DIN rails.

Stock No.	Type	Voltage		1-2	3-5
		Operating	Protection Lever		
83F8346	DR-7	7V	15V Peak	155.00	147.25
83F8347	DR-12	12V	23V Peak	155.00	147.25
83F8348	DR-24	24V	46V Peak	155.00	147.25
83F8349	DR-48	48V	67V Peak	155.00	147.25

TSJ SERIES AND TYPE SLN-FX SURGE SUPPRESSORS

NEW

SLN-FX

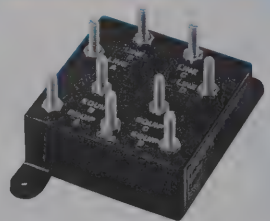
TSJ

TSJ series and **type SLN-FX** high-speed, high-current solid-state suppressors for ISDN, RJ11 and RJ48 connections. Protect phone lines and equipment from overvoltages. Offer transient suppression for dial-up and T1 telephone equipment. Life expectancy: 10+ years. Up to 200V peak protection. Impedance per line: 33 ohm. Peak power dissipation: 15,000 watts. **Type TSJ-6** is a dial-up telephone line surge suppressor with RJ-11 modular connectors. Protect 1T/R pair. **Type TSJ-48/48L** protects T1 carrier lines and features RJ-48 connectors. **Type TLP 408-003** protects all data communication equipment and systems. Configured with a 10″ cord and RJ-45 connector. **Type SLN-FX** provides superior surge protection for standard 120VAC plug-in applications and dial-up fax and modems. 5ns response time.

Stock No.	Type	Description	1-2	3-4
01F869	TSJ-6	6-Position RJ-11 Connectors	75.64	72.29
01F871	TSJ-48/48L	8-Position RJ-48 Connectors	134.55	127.83
01F870	TLP 408-003	ISDN Surge Suppressor	143.87	136.68
01F867	SLN-FX	RJ-11 Female Telephone Jack and Direct AC Plug	175.90	167.11

(13532) (ne10439)

FSP 4000 SERIES AND TYPE LMP-4 SURGE SUPPRESSORS



FSP 4001

LMP-4

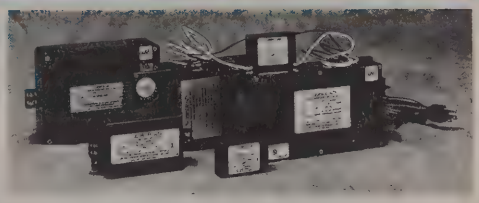
FSP4000 series surge suppressors are specifically designed for data lines and can be installed in the data transmission line or can interface between a cable and a piece of equipment. **Types FSP4001** and **FSP4002** are bidirectional and bipolar devices. **Type LMP-4** provides transient suppression for 4-wire leased lines. Installed at the equipment location. Dimensions: 2.125L x 2.125W x 0.80″H.

Stock No.	Type	Line-Line Voltage (Peak)	Line-Ground Voltage (Peak)	1-2	3-5
01F873	FSP 4001	13	13	143.87	136.68
01F874	FSP 4002	27	27	143.87	136.68
01F872	LMP-4	Max. 4V	Max. 4V	88.25	84.34

(13534) (ne10440)

TRACKING FILTERS AND SURGE SUPPRESSORS

ISLATROL® PLUS SINGLE-PHASE ACTIVE TRACKING FILTERS



Provide continuous sine wave tracking filtration and high-energy protection from spikes, transients, and noise on AC power lines. Both normal (line-to-line or line-to-neutral) and common (line and/or neutral to ground) modes are protected. Units are bi-directional, offer EMI/RFI noise rejection, and offer the lowest UL1449 suppressor clamping categories. Units are single-phase. Available in 120VAC or 240VAC versions. All have barrier strip at input and output. Line frequency: 50/60 Hz. Response time: less than 1 nanosecond in normal mode; less than 5 nanoseconds in common mode. Load regulation: 1% total from no load to full load. Load surge current rating: 10 msec (100 x nominal), 1 sec (10 x nominal), 10 sec (5 x nominal). Operating temperature range: –40°C to +45°C (derate linearity to 60% at +70°C. Mean time between failure: greater than 100,000 hours (per MIL-217F). Package: black, high-impact plastic case, vacuum impregnated magnetics, epoxy encapsulated. Frequency response EMI/RFI small signal RFI or large signal transients, (normal mode, forward-reverse, 100KHz to 50MHz, 60db minimum; common mode, forward-reverse, 5MHz to 50MHz, 60db minimum). Surge energy capacity: 120VAC models, 480 joules (L-N, L-G, N-G 160 joules); 240VAC models, 840 joules (L1-L2, L1-G, L2-G 280 joules). Peak surge current capability (8 x 20µs): 6,500 amps, 39,900 amps total. Meets UL1283 (EMI/RFI filter), UL1449 suppressor classifications.
